

**FARMERS' LIBRARY.**

Prospectus of the *Farmer's Library*, and *Monthly Journal of Agriculture*. JOHN S. SKINNER, Editor. None can well have studied the true sources of National welfare, without perceiving the natural and friendly connexion existing between Manufactures, Commerce and Agriculture. The policy which strikes at the prosperity of the Manufacturing consumer, must damage the Agricultural producer, and neither can be injuriously affected without detriment to the Merchant, at once consumer and carrier for both. As, however, the elements of manufacturing and commercial industry must be derived chiefly from the soil, is it not the obvious interest of all other classes that the one which gives to all their employment and subsistence, should be encouraged and benefited with every advantage that science can confer and the most enlightened industry make available? Yet it has not been until comparatively a late period in Europe, and still later in America, that the public mind has been made properly sensible of the necessity of science to Agriculture, and so to respect Farming as essentially an intellectual and dignified pursuit—one which should imply for its followers high mental cultivation and various attainments. Happily, however, educated young men are now betaking themselves to Farming, as a business, which, like the learned professions, has its own principles and will have its literature; and truly it may be asked what subject has lately given rise to memoirs and works more profound and instructive, or been fruitful of more interesting results of scientific investigation, than Agriculture? Who, among modern Literati, enjoy more enviable distinction than *Liebig* and *Johnston*, and *Boussingault* and *Candolle*? The taste for Agricultural Literature in our country, thanks to the able journals that encourage it, keeps pace with its progress in Europe. The more fully to meet the demand thus created, we have decided to publish on the first day of July, and monthly thereafter, the *Farmer's Library* and *Monthly Journal of Agriculture*, to be edited by JOHN S. SKINNER, late Assistant Postmaster General and founder of the first Agricultural periodical published in this country.

Far from being designed or in any way calculated to affect injuriously the circulation of existing journals of less price and wider circulation, they may supply the Farmer's table with lighter and more agreeable refreshment, while in the Library he may find more solid as it will be more costly food.

Each number will consist of two distinct parts, viz.:

I. *The Farmer's Library*, in which will be published continuously the best *Standard Works* on Agriculture, embracing those which, by their cost or the language in which they are written, would otherwise seem beyond the reach of nearly all American Farmers. In this way we shall give for two or three dollars the choicest European treatises and researches in Agriculture, costing ten times as much in the original editions, not easily obtained at any price, and virtually out of the reach of men who live by following the plough. In the *Farmer's Library* they will be accompanied by notes from the Editor, explaining what may be obscure to American readers, or calculated to mislead the beginning in Farming, owing to differences of Soil, Climate, &c. The works published in the *Library* will form a complete series, exploring and exhibiting the whole field of Natural Science, and developing the rich treasures which Chemistry, Geology, and Mechanics, have yielded and may yield to lighten the labors and swell the harvests of the intelligent husbandman. The work will be so arranged that the *Farmer's Library* may be bound up by itself, forming a mammoth volume of 600 pages at the end of each year; or each work contained therein may be bound separately.

II. *The Monthly Journal of Agriculture* will likewise contain about 50 pages per month, and will comprise, 1. *Foreign*: Selections from the higher class of British, French and German periodicals devoted to Agriculture, with extracts from new books which may not be published in the *Library*, &c. &c. 2. *American*: Editorials, communicated and selected accounts of experiments, improved processes, discoveries in Agriculture, new implements, &c. In this department alone will our resemble any American work ever yet published. It can hardly be necessary to add that no Political, Economic, or other controverted doctrine, will be inculcated through this magazine. Its price will be Five Dollars a year in advance, for two royal octavo volumes of 600 pages each.

Each number of the *Library* will be illustrated by numerous engravings, printed on type obtained expressly for this work, and on good paper—the whole got up as such a work should be. If it does not prove the best as well as the amplest and most comprehensive Agricultural work ever published in this country, the fault shall not rest with the publishers, and we are sure it will not fall short for want of industry or devotion in the Editor. The low and definite rate of postage chargeable on such a periodical after the 1st of July—say six to eight cents a number—will enable many to take it who would otherwise have been repelled by the heavy and capricious exactions of the Post Office. As Postmasters are permitted to frank money letters to publishers until that period, and as we wish to print only so many copies as may be wanted, we respectfully solicit orders from all who may incline to aid us, as early as will suit their convenience. Address

GREELEY & McELRATH,  
Tribune Office,  
Corner of Spruce-street, opposite the City Hall,  
New York, July 31, 1845.

The first number will be published on the 1st day of July, and thence regularly on the first secular day of every month.

**Spitting of Blood,**

**NIGHT SWEATS AND PAIN IN THE SIDE.**

Jonathan Haworth, Esq., the well known Temperance Lecturer, was attacked with a cold from sleeping in damp sheets, in the winter of 1841. He neglected it at first, but soon found it assuming a somewhat alarming aspect, and then resorted to the various remedies usually recommended for lung complaints. When one thing failed he tried another, until he had exhausted his patience and the whole catalogue of remedies. His cough was almost incessant, so that he could get little or no sleep—attended with pain in his side, spitting of blood, night sweats, and all the usual symptoms of Consumption. While at Rome, (N. Y.) he felt that his end was nigh—that in that place he must soon end his journey of life. Provisionally, a lady who visited him advised a trial of Dr. Sherman's Cough Lozenges. He accordingly sent and got a box, and the first dose gave him more relief than all the other medicines he used before. By the time he had taken one small box, he was able to start for the city of New York, and in three weeks' time he was perfectly restored to his usual health. He often announces the fact to his hearers, when lecturing on Temperance, and says he owes his life to Dr. Sherman's Lozenges.
