FARMERS' LIBRARY

Prospectus of the Farmer's Library, and Monthly Journal of Agriculture. JOHN S. SEINNER, Editor. None can well have studied the true sources of National welfare, without perceiving the natural and friendly connexion existing between Manufactures, Commerce and Agriculture. The policy which strikes at the prosperity of the Mannproducer, and neither can be injuriously affected sumer and carrier for both. As, however, the elements of manufacturing and commercial industry must be derived chiefly from the soil, is it not the obvious interest of all other classes that the one which gives to all their employment and subsistence, should be encouraged and benefitted with every advantage that science can confer and the most enlightened industry make available ! Yet it has not been until comparatively a late period in Europe, and still later in America, that the public mind has been made properly sensible of the necessity of science to Agriculture, and so to respect Farming as essentially an intellectual and dignified pursuit-one which should imply for its followers high mental cultivation and various attainments. Happily, however, educated young men are now betaking themselves to Farming, as a business, which, like the learned professions. has its own principles and will have its literature : and truly it may be asked what subject has lately given rise to memoirs and works more profound and instructive, or been fruitful of more interest-With these advantages backed by some ex- ing results of scientific investigation, than Agrimore enviable distinction than Liebig and Johnston, and Boussingault and Candolle ? The taste for Agricultural Literature in our country, thanks to the able journals that encourage it, keeps pace with its progress in Europe. The more fully to meet the demand thus created, we have decided to publish on the first day of July, and monthly thereafter, the Farmer's Library and Monthly Journal of Agriculture, to be edited by John S. SKINNER, late Assistant Postmaster General and founder of the first Agricultural periodical published in this country.

Far from being designed or in any way calcuated to affect injuriously the circulation of existing journals of less price and wider circulation, they may supply the Farmer's table with lighter and more agreeable refreshment, while in the Library he may may find more solid as it will be more costly food.

Each number will consist of two distinct parts, VIZ.

I. The Farmers' Library, in which will be published continuously the best Standard Works on Agriculture, embracing those which, by their cost or the language in which they are written, would otherwise seem beyond the reach of nearly all American Farmers. In this way we shall give for two or three dollars the choicest European treatises and researches in Agriculture, costing ten times as much in the original editions, not NIGHT SWEATS AND FAIN IN THE SIDE. the reach of men who live by following the plough. easily obtained at any price, and virtually out of Jonathan Haworth, Esq. the well known Tem- In the Farmers' Library they will be accompanied start for the city of New York, and in three weeks' riodicals devoted to Agriculture, with extracts time he was perfectly restored to his usual health. from new books which may not be published in He often announces the fact to his hearers, when the Library, &c. dc. 2. The leading characteristics of this paper will be as follows :

1. Early and Copious Intelligence of all interesting occurrences in Literature, Society, and Art, both at home and abroad.

2. A Foreign Correspondence of tried popularity and acknowledged merit has been engaged, Counterfeit Notes, &c. Terms, \$3 per annum and will be commenced with the first number.

3. Productions in fiction, romance and histori cal narrative ; Sketches of the taste and manners cial interests; biographical notices and anecdotes, 1-2 cents. literary and professional ; bon-mots, epigrams, and elegant trifles of every kind; the rumors of the day, and the comments that float upon the conversation of the hour-materials of this kind will form the ordinary staple of the work.

4. The department of Criticism will exhibit a discriminating and popular survey of the Literary Productions of the day. There will be a thorough of produce, and buy Lumber cheaper, at Miland careful chronicle of every thing of value ac- ford than in any other market in this section of complished in Painting and Sculpture, and a candid and patriotic estimate of the National productions in comparison with other countries. Such exposition of the character and special excellencies of what is exhibited in Music will be constantly given as may lead to the more intelligent enjoyment of that most imaginative and delicate branch of the Fine Arts.

5. No original papers will appear, but those of obvious and decided merit; and the selections (which will commonly be from the foreign journals the least known in this country) will be made with the utmost attention and care.

The predominant design of the Editor is to add to the Republic of Letters a Weekly Journal, distinctly and decidedly national in tone and features, and at the same time, to avoid all connection with mere party politics. THE NATIONAL PRESS will, in brief, combine the striking and novel attractions of the newspaper, with the more abiding interest of the higher class of periodicals. It will be printed in the folio form, on large and superior paper, on a new and clear type, obtained expressly for the purpose, and will be, in its whole arrangement and details, a favorable specimen of the best typographical skill of the country. In addition to these, and as one of its most valuable peculiarities, it will be, in reference to the diversity of talent that will be employed upon it, the cheapest paper in the United States.

Terms --- Two dollars a year, or three copies for five dollars, invariably in advance.

It will be sent by mail to all parts of the United States, and to the British Provinces, done up in strong wrappers, with the utmost punctuality and despatch.

Postmasters are requested to act as agents, receive subscriptions, and make remittances.

The first number will be issued on Saturday, the fourteenth of February next.

That a proper estimate may be formed of the number of copies that will be required, subscribers would oblige the Editor by sending in their names at as early a period as possible.

Worms Kill Thousands.

CHILDREN are most subject to them, but persons of all ages are liable to be afflicted with them. Bad breath, paleness about the lips, flushed cheeks, picking at the nose, wasting away, leanness, pain in the bowels, joints or limbs, disturbed sleep, frightful dreams, moaning and sometimes a voracious appetite, are among the symptoms of worms. Many are doctored for months for some other imaginary disease, when one box of Sherman's Worm Lozenges would effect a cure. Dr. Ryan, corner of Prince street and the Bowery, cured a man of worms that was reduced to a skeleton, and by only one box of Sherman's Lozenges: he is now as fat as an alderman. The Hon B. B. Beardsley has saved the life of one of his children by them. The sale of over 2,000,000 of boxes has fully tested them. They are the only infallible worm destroying medicine known. What

WORMS CAUSE DEATH.

Thousands upon thousands have gone down to graves from Marasmus, or a wasting away of the body, Epilepsy, Fits, St Vitus' Dance, Locked Jaw, Apoplexy, Mania, Dropsy in the Head, Palsy, Consumption, Pleurisy, Dysentery, Convulsions, and many other supposed apparent diseases; and many have suffered for years and years, and den & Schlaugh, has this day been dissolved have been doctored for some imaginary complaint when the proper treatment would have saved their lives, and restored them to health. Every observant mother cannot but see and admit the truth ; but still many physicians shut their eyes to that all-important cause of disease.

Persons of all ages and sexes, from the tender infant at the breast to old age, are all liable to be afflicted with worms. Many a person has suffered his whole life from them, and never suspected it. Different kinds of worms inhabit different parts of the body; but a long dissertation on their particular locality, origin, &c. is superfluous and unnecessary, so long as a proper. safe and certain remedy is at hand. That is all the public wants or cares for. The sale of over two millions of boxes of Sherman's Worm Lozenges, in less than five years, say places their reputation far above all other worm medicines.
