

**The Jews.**

An important movement among the Hebrews of Europe is announced in the Jewish Chronicle. It is the feeling of alarm felt among them in respect to the revolutions taking place, that thousands have been baptised into the Catholic church to escape persecution, and that more than one thousand from the city of Perth, in Hungary, have resolved to emigrate to the United States. Among these are some of the most respectable Hebrew families of Europe, and in emigrating, the rich are to support the poor. The Jews have been wantonly persecuted for centuries in most parts of Europe, especially in Prussia, Russia, and Austria, but nowhere more than in Hungary, where they form a numerous portion of the population. Many of them possess immense wealth, which in America they can employ and enjoy without fear.

**Execution of Bell.**

Harris Bell, the poor degraded being who murdered an old lady, the wife of Rev. Gerthom Williams of Mount Pleasant, something over a year ago, was hung at Honesdale pursuant to his sentence on Friday the 29th ult. Though the execution was performed in the jail yard according to the law abolishing public executions, the Honesdale papers say there was quite a crowd of people—men, women and children, who thronged the windows and housetops, eager to see something of the affair. He was attended to the scaffold by the Presbyterian and Episcopal clergymen of the place, who at his request offered up prayers in his behalf, and he also addressed the persons present, professing his repentance and faith in the pardon of a Redeemer, and warning all to beware of the indulgence of the wicked passions which had brought him to such an ignominious punishment.

Mr. Charles Wilson, of Springfield, Massachusetts, has patented an invention for cutting stone which bids fair to effect wonders in the process. One of the machines is now in operation at New Haven, (Conn) where the intelligent may at any day view it dressing down at the rate of a square foot in from one to two minutes, and with two attendants only and limited amount of steam power, doing the labor of more than a hundred men. There is said to be no mistake in the thing; and, if so, it promises to make stone supersede brick, and revolutionize entirely our modes of building.

**WASHINGTON AND BALTIMORE RAILROAD.**—By the Report of the President and Directors, just published, it appears that the gross income from the Washington road, for the year ending 30th September, 1848, has been \$255,647.73; the total expenditure properly chargeable thereto \$143,524.92, and the net revenue \$111,639.76; showing an increase over the preceding year \$36,746.43 in the gross income, \$14,714.22 in the expenditure, and \$22,332.20 in the net revenue.

**DISTANCE FROM THE UNITED STATES TO ENGLAND.**—The distance sailed by the Atlantic steamers is as follows:

By Mercator's sailing.

Boston dock to Liverpool dock	2,883 miles
Battery (N. Y.) to Liverpool dock	3,084 "
Boston dock to Southampton dock	2,852 "
Battery (N. Y.) to Southampton dock	3,156 "

By Mercator and Great Circle.

Boston dock to Liverpool dock	2,849 "
Battery (N. Y.) to Liverpool dock	3,023 "
Boston dock to Southampton dock	2,849 "
Battery (N. Y.) to Southampton dock	3,037 "

**Snow.**—A gentleman from River Wells, twenty leagues below Quebec, informs us that since last Thursday the second range of mountains on the north side of the St. Lawrence were quite covered with snow; it must lie about a foot deep.—Montreal Herald.

**The Grape Crop.**—The vintage on the Ohio has commenced, which will last for two or three weeks. We are glad to hear that the damage to the grape crop has proved very light, to what was feared. Many vine dressers who, a few weeks since, expected to lose two-thirds of their crop, will not lose one-eighth. There are now several hundred acres in Hamilton county alone devoted to vineyards, and the amount of wine made will be quite large, for which a sure demand exists.

**Determined to Die.**

A man named Short, in Dayton, Ohio, on the 30th ult. who had been very intemperate for some time past, cut his throat in six or seven places with a razor, and then, not succeeding in killing himself, he deliberately walked to the river, waded a considerable distance off, and plunged in and drowned himself.

**A Mammoth Tooth.**

The fragment of a mammoth tooth was recently found near Sulphur Springs, Alabama, weighing 80 1/2 pounds. It is of a bluish cast, and in a petrified state, and when found was embedded in the earth with the grinding surface exposed. The teeth of the monster of which this is a part, must have weighed over two hundred pounds—its head several thousand. The animal, we suppose, was one of the earliest inhabitants of Mississippi Valley, and was well calculated for traversing its majestic rivers, prairies and forests,—perhaps one of those tremendous creatures which Hirst so graphically describes, in his "Coming of the Mammoth."

**Early Voyages to America.**

At the late annual meeting of the British Association for the advancement of Science, Professor Elton read a paper, exhibiting evidence that America was known to Europeans as early as the tenth century. He revived the statements of the Copenhagen Antiquarian Society, making it out that the Scandinavian Northernmen explored a great extent of the eastern coasts of North America, repeatedly visited Massachusetts and Rhode Island, fought and traded with the natives and attempted to establish colonies.

**Americans in Mexico.**

Since the ending of the war, American soldiers seem to be in remarkable repute in Mexico—in fact they are looked upon as the only reliable soldiers to defend and sustain the government of that unhappy country. We see by a notice in the New Orleans papers that Captain George W. White, of that city, is authorized by the Mexican government. For this purpose Captain White has opened his rendezvous.

**Steel Pens.**

Who does not remember the time when a steel pen cost as much as a dozen quills? Who is ignorant of the marvellous reduction that has taken place in the market value of these tiny bits of steel? Sixpence a piece, sixpence a dozen, sixpence a gross—thus have they come down in value. All this could not have been done but for the application of machinery. Men's hands employed in cutting, and pressing, and shaping the pens, would never have permitted this cheapening to have gone to such an extent; and yet there are actually more men employed in the manufacture than were employed when machinery was less used. The machinery, in fact, has created a demand which requires large numbers both of machines and of men to supply. Some of the steel pen manufacturers of Birmingham are very large establishments, containing ranges of highly-finished machines, and giving employment to large numbers of workmen. One of these manufacturers, in his advertisements, states his yearly produce at a millions of dozens, and there is no reason to doubt that it does reach that extraordinary pitch.—[The Land we Live in.

**INFAMATION OF THE EYES.**—Wright's Indian Vegetable Pills will be found a certain cure for the above painful malady; because they purge from the body those corrupt and stagnant humors which are the cause not only of inflammation of the eyes, but of every description of disease. From three to six of the above named Indian Vegetable Pills, taken every night on going to bed, will in a short time completely rid the body of everything that is opposed to health; and therefore will assuredly make a perfect cure of inflammation of the eyes, and at the same time the blood and other fluids will be of such a healthy quality, that disease of any kind will be absolutely impossible. Beware of Sugar Coated Counterfeits.—Remember, that the original and only genuine Indian Vegetable Pills have the written signature of WILLIAM WRIGHT on the top label of each box. For sale by George H. Miller, who is the only authorized agent for Stroudsburg; see advertisement for other agencies in another column. Office and general depot, 109 Race st. Phil'a.

**(We cut the following from an exchange paper)**

MONROE COUNTY, N. J. July 18th, 1844. Gentlemen, I think it highly proper that I should make known to the world my gratitude for the benefits I have experienced from the use of Clickener's Sugar Coated Purgative Pills and endeavor to the utmost in my power, to extend a knowledge of their many virtues and wonderful efficacy in removing diseases.

After a long and painful confinement, during which I was attended by three Physicians of eminent standing, I was so much reduced and enfeebled as to cause my friends to despair for my life. In fact I was left in a state of weakness and suffering, and concluded all had been done which was possible for my recovery. I was about yielding in despair when a relative of my husband advised me to try some of your pills stating at the same time she knew of their having effected most miraculous cures, and they might prove efficacious to me. I purchased a box and took them according to directions. In five days from the time, I commenced their use I felt like a different person, all pains were removed, my appetite for solid food was as good as it was before my sickness, and I gradually regained strength. I am now in a fair way for recovery, thanks to Clickener's Pills. I send this communication, trusting you will give it an insertion in the editorial columns of your paper, in order that the afflicted will follow my example, and, as they value health, make use of Clickener's Sugar Coated Vegetable Pills. Believe me to be yours sincerely,

SUSAN WRIGHT.
