#### HIGHLY IMPORTANT WORK. Child-Birth:

A Valuable Scientific Work, upon the Subject of deceased. SAMUE REES, Jr. Register. Gestation and Child-Birth, by R. M. WEIS. Register's Office, Stroudsburg, SELHOFF, M. D., late of Paris, fust published in New-York by the Author.

This Work contains recently discovered information upon a subject of the highest importance to Married Persons, or those contemplating Marriage. It will be found of special value to those whose means, health of other cir- lic sale at the Court House, in Milford, on cumstances, do not permit them to increase the number of their family, without great inconvenience, suffering, or perhaps risk of life .-A method of avoiding these troubles and dangers, at will, (recently discovered by a celebrated French Physician) is fully communicated in this work, so that any person may avail himself of it at once, without purchasing any instrument, medicine, or other article, from the author. The means of prevention here set forth, cost comparatively nothing, and are within the reach of all. The process is new, safe, infalliable, convenient, simple, and cannot injure the health of the most delicate. Nor does it curtail matrimonial privileges in the least.

Morality Considered. The object of this work can be shown to be of the highest utility, and sustained by the soundest principles of ptudence, political economy, and virtue. It shows how a physiological effect may be produced, scientifically and without injury to the constitution, which thousands attempt to accomplish by the most unwise and reprehensible means. The object is by no means new to the world. The means will be esteemed by all scientific, rightminded and sensible people, as a discovery in physiology of happiness.

Love, and the desire for union between the sexes, will be indulged, talk of prudence as we may. Without marriage, we have, in all countries, a debasement of one sex, and the criminal indulgence of the other; with marriage, and the unrestrained indulgence of the natural instanct, very often suffering and misery of the most fearful character. Who, then, shall deny to man, (a free agent,) the right to marry, and to regulate the instinct of nature?

Young Married People.

Young Married People, whose fortunes are not yet established, will find in this work matter to interest them deeply, and information of of the highest value, which they should not, on any account, be ignorant of. Hundreds of married people, now advanced in life, have assured the author, that if they had possessed such a treasure in early life, it would have saved them more than half the suffering and deprivation they have since endured.

Unhappy Wives. Unhappy Wives, who feel that their physical condition and health totally unfit them to become the mothers of a numerous offspring, and who reasonable fear that each period of confinement will terminate their existence, will hail the discovery of this certain means of relief with unbounded joy. Let all such unfortonate and unhappy wives lose no time in obtaining this important work. It will be to them precious boon through life, and prevent many an early and premature death.

Hereditary Diseases. Scrofula, Consumption, Insanity, Apoplexy, Disease of the Heart, and other horrible complaints, capable of transmission from parent to child, afflict many worthy people, who, at the same time, are as capable of enjoying themselves in the marriage state as their more fortunate fellow beings. Shall such persons refrain from marriage on this account, or shall they marry and give birth to a feeble offspring, destined to a life of suffering or an early death? The answers to these serious questions will be

found in the work here recommended. Early Marriages. Early marriages are strongly advised by all philosophers and writers upon social and political subjects. Early marriages, beyond all questions, tend to promote virtue and happiness; and with the power of regulating the procreative function, made known in this work, may be freely entered into, without fear of incuring

responsibilities which cannot be sustained. Over Population of the Earth. Over Population of the earth need be no lon- and FRAME BARN, and other farm ger apprehend. The calculations of Malihus, buildings; also, a large and the wild fears of Robert Dale Owen, are alike rendered baseless by the discovery here Also M'en's and Boys's white and black man over his accidents," in this respect at

Honesty of the Work.

There is no deception or humbuggery Having had considerable experience in the of any kind about this work. It is precisely to swell the number of its pages. The whole the objects of the work fully and faithfully given, so that the reader may avail himself of No. 158 North Second Street, Phildelphia. P.
