

in making a trip, from 4 to 6 days. I could off all my horses—three at \$100 a piece, the common price for horses, and mules vary from \$100 to \$400 per head, a great many sold at the latter price, the great demand is for transporting provisions and tools. I sold the belt for \$75, in gold. I have been in the country some three weeks, and have raised the price of \$3000 in gold.

My little girls can make from 5 to 25 dollars per day washing gold in pans. So soon as we get ready I expect to ship at this port for Jackson county, Mo., where I expect to spend the balance of my days in peace and quietness and in the enjoyment of my family and friends, where of all places I most delight to be. My average income this winter will be about 150 dollars per day, and if I should strike a good lead it will be a great deal more. The large majority of persons who have done well here are in the mines, (and all have done so that have returned) are going back to the States to live, at least nine or ten.

You know James M. Harlin, he has just bought a Mexican ranch, for which he has paid \$12,000 for the stock and land, averaging the stock at \$20 per head, and it is thought that he has made at least twelve thousand dollars in the operation, which makes him stand in the lead of \$24,000; but this is nothing.—Jesse Beasley is said to be worth at least \$40,000. Governor Boggs has made an independent fortune for all his children. You know Bryant, a carpenter, who use to work for Ebenezer Dixon, he has dug out more gold the last six months than a mule can pack."

Arrival of the Steamer America.
SEVEN DAYS LATER FROM EUROPE.
The America had on board for the United States two hundred thousand pounds sterling specie—a million of dollars.
The commercial accounts from India by the overland mail are regarded as very satisfactory.

From the manufacturing districts the accounts are less encouraging, though there has been no diminution of employment.

The French government have come to the important resolution of an armed intervention to re-instate the Pope. A force adequate to the emergency has already started for Civita Vecchia.

The article in Proudhon's journal which led to his seizure implied directly that Louis Napoleon was under pecuniary obligations for purchasing his present course of politics.

The Commissioners appointed to report upon the expenses of the foreign office at Paris, have proposed to abolish the title of Ambassador, and substitute, as in the United States, that of Minister Plenipotentiary, with reduced salaries. Their number likewise is to be reduced, and the following places are proposed as retaining a regular Minister: At St. Petersburg, London, Constantinople, Bern, the Hague, and Canton. By a later resolution, a Consul General only is appointed at the latter place.

Germany is occupied with a gigantic project, being no less than the junction of the Baltic with the North Sea. The medium proposed is a canal without locks.

The warlike contests between the States of the Continent continue with unabated fury, and with most disastrous results to all the parties engaged.

The Danes are enforcing a strict blockade of all the German ports. It is stated that emigrant vessels will not hereafter be allowed to sail unmolested.

A telegraphic despatch has been received at Frankfurt stating that the Prussian Ministry had sent in their resignation.

Arrangements have been made for returning the visit of the French National Guards to London.

The Bank of France will shortly resume specie payments.

The Sultan of the Sublime Porte has signed his non-compliance to bias a part of the Egyptian fleet. It is said that this application was instigated by Russia.

Prince Cavigno has ordered a levy en masse on all the inhabitants of the Lombardy Venetian provinces of from 18 to 40 years. Those who do not appear within five days will be considered refractories.

The Wild Animals of England.
It is to be remarked that wild animals of large size were then far more numerous than at present. The last wild boar, indeed, which had been preserved for the royal diversion, and had been allowed to ravage the cultivated land with its tusks, had been slaughtered by theasperated rustice during the license of the war. The last wolf that has roamed our land had been slain in Scotland a short time before the close of the reign of Charles the Second. But many breeds now extinct or rare, such as quadrupeds and birds, were still common. The fox, whose life is, in many countries, held almost as sacred as that of a human being, was considered as a mere nuisance.—

John told the Long Parliament that Stafford was to be regarded, not as a stag or hare, to whom some law was to be given, but a fox, who was to be snared by any means, and knocked on the head without pity. This declaration would be by no means a happy one addressed to country gentlemen of our time, in St. John's days there were not seldom massacres of foxes, to which the peasantry engaged with all the dogs that could be mustered. Traps were set, nets were spread, no quarter was given, and to shoot a female with a young one was considered as a feat which merited the gratitude of the neighborhood. The red fox was then as common in Gloucestershire and Hampshire as they are now among the Hampshire Hills. On one occasion Queen Anne on her way to Portsmouth, saw a herd of

no less than five hundred. The wild bull, with his white mane, was still to be found wandering in a few of the southern forests. The badger made his dark and tortuous hole on the side of every hill where the copewood grew thick. The wild cats were often heard by night waiting round the lodges of the rangers of Whitebury and Needwood. The yellow-breasted marten was still pursued in Cranbourne Chase for his fur, reputed inferior only to that of the sable. Fen eagles, measuring more than nine feet between the extremities of the wings, preyed on fish along the coast of Norfolk.— On all the downs, from the British Channel to Yorkshire, huge buzzards strayed in troops from fifty to sixty, and were often hunted with greyhounds. The marshes of Cambridgeshire and Lincolnshire were covered during some months of every year by immense crowds of cranes. Some of these races the progress of cultivation has extirpated; of others the numbers are so much diminished that men crowd to gaze at a specimen as at a Bengal ugar, or a Polar bear.—*Macaulay's History of England.*

DIED.
At Easton, on the 30th ult., Mr. AUGUSTUS B. SCHOOLEY (Printer.) aged about 25 years.

CLICKENER'S SUGAR-COATED PURGATIVE PILLS are every where all the rage. And wherefore not? For all other medical compounds make you worse before they make you better, while Clickener's Pills give pleasure from the first instance, and cure one entirely without giving him to suppose that he has been taking medicine at all. Had Byron been living he would have called Clickener's Sugar-coated Purgative Pills the Poetry of Medicine, for heretofore medicine, in almost all its forms, was nearly as disgusting as it was beneficial, but now the evil is most effectually removed, for Clickener's Sugar-coated Pills have no taste whatever of medicine, produce none of the nausea and griping attendant on the operation of other medicine, and their speedy effect in removing all impurities from the system cannot be excelled by any other medicine which has been discovered.

M'Alister's All-Healing Ointment, Or, The World's Salve.
Contains no Mercury or other Mineral.
From the Reading Eagle.

There was never, perhaps, a medicine brought before the public, that has in so short a time won such a reputation as M'ALISTER'S ALL-HEALING OR WORLD-SALVE. Almost every person that has made trial of it speaks warmly in its praise. One has been cured by it, of the most painful Rheumatism, another of the Piles, a third of a troublesome pain in the limbs, &c., &c. If it does not give immediate relief, in every case, it can do no injury, being applied outwardly. As another evidence of the wonderful healing power possessed by this salve, we subjoin the following certificate, from a respectable citizen of Maiden-creek township in this county:
MAIDENCREEK, Berks Co., March 30, 1847.

Messrs. Ritter & Co.—I desire to inform you that I was entirely cured of a severe pain in the back, by the use of M'ALISTER'S All-Healing Salve, which I purchased from you. I suffered with it for about 20 years, and at night was unable to sleep. During that time I tried various remedies, which were prescribed for me by physicians and other persons, without receiving any relief, and at last made trial of this Salve, with a result favorable beyond expectation. I am now entirely free from the pain, and enjoy at night a peaceful and sweet sleep. I have also used the Salve since for other complaints, with similar happy results.
Your friend,
JOHN HOLDINBACH.

Prof. Burry's Wonderful Tricopherous, or Medicated Compound, cures baldness, prevents gray hair, and eradicates scurf and dandruff. This article differs from all other advertised nostrums of the day. Its manufacture is based upon a thorough physiological knowledge of the hair and its connection with the skin, as well as a knowledge of the various diseases which effect both. This celebrated Compound, in addition to its usefulness as a preserver and beautifier of the hair, is unequalled by any other article as an external application for bruises, sprains, erysipelas, swellings, ringworm, scald head, inflamed skin, prickly heat, scrofula, tetter, pimples, sore throat, tender feet, salt rheum, rough hands, headache, chapped skin, chilblains, internal pains, rheumatism, &c. &c.; and the pain occasioned by the sting of insects is immediately relieved by its application; and as a ready and effective resource for all cutaneous diseases of the skin, it merits a place among the household treasures of every family. Sold in large bottles, price 25 cents, at the principle office, 139 Broadway; and by all the druggists in the United States. For sale by JAMES S. WALLACE. Milford, Pa. April 12, 1849.
