

Letter from Gov. Ramsey.

In a letter from Gov. Ramsey, says the Lebanon Courier, to one of our friends in this county, which we have been permitted to read and extract from, we find information which will be of advantage, perhaps, to some of our readers, and which gives an idea of the resources and prospects of the new territory that can be relied on.

St. Paul, Minnesota, September 19, 1849.

In almost every industrial pursuit, as farmers, mechanics, merchants, &c., Pennsylvanians would be at home here, and from their high character for integrity, would, I am sure, soon place themselves in comfortable positions. The great characteristic of this country, and one that I am satisfied will insure its rapid settlement, is this: that while the soil is as fertile as any in the Valley of the Mississippi, it is happily as healthy as the mountain regions of Pennsylvania.

Of all other people I shall be most happy to see Pennsylvanians among us. There are now a large number here. I shall myself feel more at home when they settle amongst us, and I know that in them the Territory will have its best and most reliable population.

By all means advise your friends and mine to pay us a visit, and see for themselves; if they do so, I have no doubt they will remain. Remember me to your Lebanon county friends, for whom I shall ever cherish the warmest feelings. Very truly, yours &c., ALEX. RAMSEY.

Mr. JOAN MEELY, Jonestown, Lebanon Co., Pa.

From the New London Chronicle.

Interesting and Probably Important News from Sir John Franklin.

Capt. Chapel, of the bark McLellan of this port, from Davis' Straits, whose arrival we announced yesterday morning, furnishes information which will at least be read, with interest in the United States, and indeed in every part of the world. About the 1st of August, while the McLellan laid in Pond's Bay, an indentation of Baffin's Bay, in lat. 74. lon. 72, the natives of the coast came on board the Chiefstain, an English whaler, and gave information by signs that two large ships were then lying in Prince Regent's Inlet, and had been there fast in the ice for four seasons; and being asked with regard to those on board, whether they were dead or alive, they replied in the same way that the crews were not "asleep" (that is, not dead) but were all well.

This information was considered by the Englishman and by Capt. Chapel, as indicating that the ships of Sir John Franklin were clearly meant. The Englishman landed at Cape Hay, some distance from Pond's Bay a quantity of coal and provisions with which his ship was furnished by the British Government for the use of the long missing ships, if they should chance to come there, as they would be obliged to do on their return to England. This is certainly the latest news from that quarter, and there is a possibility, perhaps a probability, that the commander of the unfortunate expedition and his crews are still alive. Heaven send that it may be so!

The McLellan and her gallant officers and crew have reached home almost by miracle—at any rate have done so under circumstances that entitled them to the highest credit.

On the 12th of June the bark got "nipped" in the ice and only escaped destruction by the almost superhuman exertions and good conduct of those who were in charge of her. She was so severely injured that she leaked so as to keep afloat only by the incessant work of nearly all hands at the pumps, and by means of two large metallic pumps obtained by Capt. Chapel from the wreck of the English ships crushed and totally lost just ahead of him. The leak was, however, partially remedied by thrumbed sails under the bow, though she continued to leak badly until her arrival home, and was only kept above water by continual and unceasing labor at the pumps, till she reached the dock, which indeed is still obliged to be continued as she lies at the wharf. The two English ships, Superior and Lady Jane, mentioned yesterday, were both lost very near the McLellan. Two of the crew of the last ships arrived in her. They are natives of the Shetland Islands.

On the 30th of August, the McLellan lost a man named Joseph Schneider, of New York; who fell from the mizen-top mast head and lived but 20 minutes, being shockingly mangled in the head and limbs. He was 21 years old.

It is due to Captain Chapel, his gallant officers and ship's company, again to say that their conduct in bringing home their vessel, is deserving of more than common praise, and even with their exertions, it could not have been done, but for the staunch and enduring qualities of the ship. The skill and perseverance of the officers and men were objects of admiration to the Englishmen who witnessed them. We may give more particulars of the McLellan's voyage hereafter.

Overflow of Red River.

The Alexandria Republican states the losses through the inundation will be immense. In that parish alone, if the crop of cotton be estimated at 25,000 bales, and of sugar at 40,000 hogsheads, with the usual quantity of molasses, the loss will be 1,700,000 dollars; and should the injuries done to the corn crop and property generally be taken into consideration it will run up to 3,000,000 dollars. The Red River valley, instead of giving 130,000 bales of cotton will not yield this year more than 30,500 dollars. Here is a loss of 5,000,000 dollars.

Half an ounce of Alum in powder, will purify twelve gallons of corrupted water.

Remarkable Cholera Story.

An incident of the cholera occurred in this city a few days since, which for several reasons we think worth recording. Among the households which had been entered and stricken by the fatal disease was that of Mr. Hangley, a worthy Irishman, who has long been employed by the Commissioner of streets. His wife, a warm hearted, motherly woman, devotedly attached to children and self-sacrificing to promote their welfare and happiness, was taken with the cholera and died and was buried on Thursday, Sept. 20th. Next a lovely little daughter, 7 years of age, was taken sick, and she too died, and her body laid out and her limbs adjusted in the embrace of the king of terrors. The father applied to Alderman Wingate for a coffin, but for some cause it could not be had immediately, and its delivery was postponed for an hour or two; during this time Mr. Hangley returned home, when the supposed dead child stretched forth her arms, with the exclamation, "Oh, Father! I have been to heaven and it is a beautiful place!"

After the surprise and the excitement of the girl had subsided, she gave a relation of what she had seen as she expressed it, "in heaven."

She saw her mother in heaven, and she was taking care of little children, many of whom she called by name, among others she said were four children of Uncle Hangley, and three children of Uncle Casey's. "Aunt Lynch is not there now, but she will be to-morrow; and on Sunday I shall go back again."

"But," said an older sister, "it cannot be so, dearest, for there are but two of Uncle Casey's children dead!" "Yes, I saw three of them in heaven, and dear mother was taking care of them. All were dressed in white, and all were very happy and the children playing. Oh! it was beautiful there: and I shall go there again next Sunday afternoon at four o'clock."

Mr Hangley immediately informed Mr. Wingate that his daughter was not dead; when he, in company with Dr. Morrison, visited the house, and the little girl related substantially the same story. It seems, too, that shortly after this relation of the little girl, of what she had seen and heard in heaven, a message came from Mr. Casey in Carmel, giving information of the death of another child, and inviting them to attend the funeral.

Of the four children of her uncle Hangley, two died in this city, and two were drowned on their passage from Ireland.

We called on Saturday to see and talk with this little girl, but she was very feeble, and just then in a drowse and we did not allow her to be disturbed. She is said to have a very thoughtful and serious countenance, and to be a very interesting child. She had no wish to live, but preferred returning to her mother. The father and sisters are seriously, but very happily, impressed with the relations of this sweet child, and joyfully believe the story she tells. Their house is a pattern of neatness, and they all possess hearts overflowing with affection, and are sincerely happy on account of their heavenly messenger.

"I was sorry," said Mr. H. to Dr. Morrison, in the honest, truthful simplicity of his heart, "when my good wife died, but I'm not now, but only wish to be with her." The elder sisters too, live now in joyful hope of meeting at length, and they care not how soon, if it be God's time, their dear mother, in heaven, where she had been seen by their angel sister, who has been permitted to return to the earth, and to make the fact known to them.

Since the above was published there have been a great many inquiries respecting this little girl, some of which we will now answer. Although at the time of the seeming death of this child it was not supposed that her aunt Lynch was dangerously ill, she not having the cholera but attacked with dysentery. But she died the next day as stated.

On Sunday afternoon, Mr. Daniel Warren, a very worthy religious man, who has been much among cholera patients, and feeling, perhaps, a little moved by curiosity, called to see the little girl, and addressed her cheerfully, and told her that she appeared better, and would soon be well, and get out in a day or two.

"But I am going to mother again at four o'clock," she quietly and softly said.

"When, to-morrow?"

"No, to-day."

Mr. Warren endeavored to turn her attention to hopeful prospects of recovery; but the little sufferer was fast sinking away—the death-rattle was heard, and she soon ceased to breathe, her pulse stopped and the fixedness of death was impressed upon her beautiful countenance. She was dead!

Mr. Warren looked at the town clock, in the distance, from the window, for there was no clock in the house, and it was four o'clock. While pondering upon, to him, the singular coincidence in this case, and about half an hour had passed when new signs of life appeared and again the spirit of the sweet girl returned. She asked for water and said she was tired, and sank away into a quiet sleep.

Since then she has been gradually recovering, but her elder sister who watched her so tenderly, and who would so willingly have accompanied her to live with her blessed mother in heaven, was the next day taken with the cholera and the following day died and was buried.

The father of this girl is ignorant, yet a specimen of a pure warm heart, with all the unsophisticated simplicity and truthfulness of nature. He is poor. He had a large family; and he says that for the whole season he had but two pounds of butter in his house, and they had only meat but twice. They had lived almost wholly upon bread and tea.

Such are the simple facts in the case which we leave for the present without comment or attempted explanation.—Bangor Whig of Friday.

The Erie Bank.

This institution has resumed specie payments, the Erie Pa.) Gazette says:

We learn from those who are well informed, that its former liabilities have been honorably cancelled, and it is now placed upon a healthy and permanent basis. Its notes are redeemed in Philadelphia at one per cent.

Gov. Manly, of North Carolina, has set apart Thursday, the 15th November, as a day of general Thanksgiving.

Singular Adventure with a Rattlesnake.

A young man named Geo. Keller, in Union Township, Berks Co. Pa., on the 5th ult., came across a large rattlesnake; arming himself with a stick he made for the reptile and pinned it fast, after two-thirds of its body had disappeared between the rocks. He then very coolly took out his knife, and proceeded to cut off the rattles, but while in the act, the head of the snake found an opening in the rock, and with its body fast, reached round and bit him on the point of one of his fingers. He immediately cut out the bitten part, and wound a string tightly round the finger to prevent the circulation of the poison through his system. The hand and arm soon became enormously swollen. After severe suffering in which the young man became almost blind, the physicians succeeded in placing him beyond the reach of danger. One of the first acts, after his recovery, was to visit the scene of his disaster, where he found the snake still pinned to the rock. This time he made sure work by killing it outright.

The Poor Londoner's Meat and Drink.

In this great metropolis the food we eat, and the water we drink, are grossly sophisticated. The shambles teem with unwholesome meat, which, by the craft of the butcher, is sold to the poor as cheap and wholesome food. The grocer finds it to his profit to vend for "genuine young Hyson" sloe-leaves and raisin-stalks; and the milkman aids in the work of destroying the health of this city by selling for "genuine milk and cream," a vile mixture of sheep's brains, sugar of lead, and chalk. The artisan, moreover drinks in his "London stout," copperas and cocculus indicus; in his gin, cayenne pepper and oil of vitriol; in his brandy, a fiery malt spirit, disguised with burnt sugar and different essential oils to give it a red cognac flavor; in his water a clarified infusion of decayed vegetables and human excreta.

Indigo-Curious Fact.

The Indigo plant was a native of South Carolina. It grew spontaneously among its weeds and woods and hills. More than one hundred years ago the planters there commenced its cultivation. In the year 1748, South Carolina exported to Great Britain, 200,000 lbs., and the Parliament granted a bounty of 12 cents per pound to induce its greater cultivation. In 1787, when that ordinance was passed, indigo was one of the staples of South Carolina, and we believe of Georgia also. Now in 1849, not a single pound of Indigo is raised in South Carolina, or as far as we know, in all the South. A plant which is indigenous to that region, and which in its early cultivation was exceedingly profitable, has been driven from existence by the cheap labor of India. Great Britain now pays seven millions of dollars a year for Indigo raised in India.

Death by a drop of Laudanum.

There is an account in the last number of the New England Surgical Journal, of a child being poisoned by the administration of one drop of laudanum, by its mother, for griping. It was a fine healthy child, and it lived but eleven hours after the laudanum was administered.—People should be very careful about the use of drugs that are reputed dangerous, especially in administering the same to children, who cannot tell the state of their feelings.

Iron for Apple Trees.

A correspondent of the Albany Cultivator, writing from Fredericksburg, Va., says: "A friend who has a large orchard of 'Rawl's Jannet' apple, has ten trees upon one corner of the orchard which always produce fruit a third larger, and flavor so much superior, that it was supposed by all who saw and ate the apple, that they were of a superior variety of the Jannet. This spring I examined the soil, and found that a vein of iron ore passed just under the ten trees, so near the surface that it had been ploughed and worked up with the top soil. A variety of the large blue plum growing upon the same ground is also very fine, while grafts taken from the same plum trees and worked upon stocks grown on different soil, prove worthless."

Bachelors at a Premium.

The Nottingham Mercury says that a bachelor living at Mansfield, lately ordered the town clerk to announce his want of a wife, 30 years old, of amiable temper, and clean and industrious habits. He was so overwhelmed with applicants that he found himself unable to make a choice, and was compelled to leave the town to escape his impending fate.

In a bad Way.

The editor of the Abbeville Independent, published in Vermillion Parish, Louisiana, says he has been on the borders of starvation ever since he has been there. Corn cannot be had at any price, there not being a sufficiency raised in the Parish for breadstuff. He longs to eat a corn dodger with fresh butter smeared on it.

Gutta Percha Solutions.

Gutta Percha readily dissolves in a solution of chloroform without the aid of heat. The solution thus formed makes a capital varnish, for if it is brushed on any object, the chloroform evaporates with great rapidity, and leaves a thin skin of the Gutta Percha, which acts as a preservative against the influence of water and air. It is therefore excellent as a plaster for cuts. This solution is excellent to preserve fruit in a collection of natural history. Heretofore wax has been used for this purpose, but it is not so good as this, for this solution prevents the fruit from drying. This solution is the best and most delicate varnish for paintings and drawings on paper.

Fort Penn Lodge, No. 134.

The members of this Lodge are hereby notified that a special meeting will be held at the Court House in Stroudsburg, on Saturday, the 17th day of November next, at 2 o'clock in the afternoon, to decide upon the plan of the Hall to be erected by the Lodge; several plans will be submitted. This is a matter of importance to each member, and it is hoped that every one will be in attendance.

By order of the Lodge, THEODORE SCHOCH, Secy. Stroudsburg, October 25, 1849.

SHERIFF'S SALE.

By virtue of a writ of venditioni exponas issued out of the Court of Common Pleas of Monroe county, Penn'a, to me directed, I will expose to public sale at the public house of Jacob W. Kresge, in Polk township, on

Friday the 9th day of November

next, at 1 o'clock p. m., the following described property, to wit: A certain Lot of land situate in Chesnut Hill township, containing about

One Acre.

The improvements are a Frame Dwelling House, two stories high, one frame STORE HOUSE, one and half stories high, one frame STABLE and a LOG SHOP.

Seized and taken in execution as the property of Adam Huffman, dec'd, and to be sold by me.

PETER KEMMERER, Sheriff's Office, Stroudsburg, Sheriff. October 18, 1849.

SHERIFF'S SALE.

By virtue of a writ of venditioni exponas issued out of the Court of Common Pleas of Monroe county, Penn'a, to me directed, I will expose to public sale at the public house of Jacob W. Kresge, in Polk township, on

Friday the 9th day of November

next, at 1 o'clock p. m., the following described property, to wit: A certain Lot or piece of land situate in Polk township, in the county of Monroe, containing

Three Acres,

more or less, adjoining lands of John Shafer and others, about one acre of which is cleared.

Seized and taken in execution as the property of Israel Savitz, and to be sold by me.

PETER KEMMERER, Sheriff's Office, Stroudsburg, Sheriff. October 18, 1849.

SHERIFF'S SALE.

By virtue of a writ of venditioni exponas issued out of the Court of Common Pleas of Monroe County, Penn'a, to me directed, I will expose to public sale at the public house of Washington Winters, in Tobyhanna township, on

Wednesday the 14th day of November

next, at 3 o'clock, p. m., the following described property, to wit: A certain tract of land in Tobyhanna township, adjoining lands of Jacob Sox, Henry Fisher, and others, containing about

Four Hundred Acres,

more or less, about 20 acres cleared, all Meadow. The improvements are one

Log House and a Log Stable,

and other out buildings. An excellent stream of water passes through the same.

Seized and taken in execution as the property of William Adams, and to be sold by me.

PETER KEMMERER, Sheriff's Office, Stroudsburg, Sheriff. October 18, 1849.

SHERIFF'S SALE.

By virtue of a writ of levari facias issued out of the Court of Common Pleas of Monroe county, Penn'a, to me directed, I will expose to public sale at the public house of Jacob W. Kresge, in Polk township, on

Friday the 9th day of November next,

at 1 o'clock, p. m., the following described property, to wit: A certain message, tract or piece of land situate in Chesnut Hill township, in the county of Monroe and State of Pennsylvania, bounded and described as follows, to wit: Beginning at a post, thence along land of Peter Hawk north forty-two degrees west, two hundred and six and six-tenths perches to a stone, south forty-nine degrees, west eighty-six perches to a pine, thence along land now or late the heirs of William Henry, the elder, deceased.

North one and a half degrees, west two hundred and eighty four perches and one-tenth of a perch to a stone; north eighty-nine and three quarter degrees, east three hundred and sixteen and a half perches to a stone, thence along land of now or late Felix Weiss, south one hundred and three perches to a stone, thence along land of now or late the heirs of Henry Schupp, south eighty-eight and a half degrees, west twenty-one and a half perches to a pine, south one and a half degrees, east one hundred and fourteen perches to a stone, thence along land of now or late Peter Schupp, south eighty-eight and a half degrees, west ninety-six perches and three tenths to a post, south two and a half degrees, east one hundred and sixty-four perches to a stone, south thirty-eight and a half degrees, west two perches to the place of beginning, containing

500 Acres and 49 Perches,

more or less.

Seized and taken in execution as the property of Joseph Smith, deceased, and to be sold by me.

PETER KEMMERER, Sheriff's Office, Stroudsburg, Sheriff. October 18, 1849.

NOTICE.

Notice is hereby given to the members of MONROE DIVISION, No. 271, Sons of Temperance, that their annual meeting will be held on Monday the 5th of November next, to commence at 6 1-2 o'clock p. m.

SAMUEL MELICK, R. S. JOHN R. RUXTON, F. S. Stroudsburg, October 18, 1849.

Printers and Publishers

Of Newspapers are informed that the subscribers are extensively engaged in the manufacture of PRINTING INK of every color and quality, which they know to be equal to any manufactured and which they will sell at the lowest prices for Cash. As they are determined that their INK shall recommend itself, they only solicit ONE TRIAL of it, relying upon its merits for future patronage. Their Colored Inks are warranted superior to any manufactured. A circular containing prices &c.; will be sent to those who desire it. Orders for Cash on City Agents accepted.

ADAMS & CO., Agents for the sale of new and second hand Printing Materials, No. 107 N. 3rd St. Philadelphia, Sept. 20, 1849.

SIX CENTS REWARD.

Ranaway from the Subscriber on Tuesday the 9th instant, a colored boy named Jack Quacko, an indentured apprentice, aged about 17 years. Said boy had on when he left a dark colored satinet coat and linsley pantaloons. The above reward, but no charges, will be paid if he is brought back. ROBERT BROWN. Stroud township, October 18, 1849.

DR. TOWNSEND'S COMPOUND EXTRACT OF Sarsaparilla. Wound and Bleeding of the Age. The most extraordinary medicine in the world!

The Extract is put up in Quart Bottles; it is six times cheaper, pleasanter, and more superior, than any other. It cures disease without vomiting, purging, sickening, or debilitating the Patient.

The great beauty and superiority of this Sarsaparilla over all other Medicines, is, while it eradicates disease, it invigorates the body. It is one of the best of the world. SPRING AND SUMMER MEDICINES ever known: it not only purifies the whole system and strengthens the person, but it creates new, pure and rich blood, a power possessed by no other Medicine. And in this lies the grand secret of its wonderful success. It has performed within the last two years, more than one hundred thousand cures of severe cases of disease; at least, 50,000 were considered incurable, but were cured by means of this Sarsaparilla in the three past seasons.

100,000 cases of General Debility and want of Nervous Energy.

Dr. Townsend's Sarsaparilla cures the whole system permanently. To those who have lost their muscular energy, by the effects of medicine, or indigestion committed in youth, or the excessive indulgence of the passions, and brought on by physical prostration of the nervous system, lassitude, want of ambition, fainting sensations, premature decay and decline, hastening toward that fatal disease, Consumption, can be entirely restored by this pleasant remedy. This Sarsaparilla is far superior to any

INVIGORATING CORDIAL. As it renews and invigorates the system, gives activity to the limbs, and strength to the muscular system in a most extraordinary degree.

Consumption Cured. Cleanse and Strengthen. Consumption can be cured. Bronchitis, Consumption, Catarrh of the Lungs, Croup, Hoarseness, Spitting of Blood, Soreness in the Chest, Hectic Flush, Night Sweats, Difficult or Profuse Expectoration, Pain in the Side, &c. have been and can be cured.

Spitting Blood. Dr. Townsend—A very Believer your Sarsaparilla has been the means, through Providence, of saving my life. I have for several years been afflicted with Hemoptoe, and worse. At last I raised large quantities of blood, had night sweats, and was greatly debilitated and reduced, and did not expect to live. I have only used your Sarsaparilla, in your time, and there has a wonderful change been wrought in me. I am now able to walk all over the city. I raise no blood, and my cough has left me. You can well imagine that I am thankful for these results. Your obedient servant, WM. RUSSELL, 65 Catherine-st.

Rheumatism. Backwell's Island, Sept. 18, 1847. Dr. Townsend—Dear Sir: I have been afflicted for several years with the Rheumatism; considerable of the time I could not eat, sleep or walk. I had the most distressing pains, and my limbs were terribly swollen. I have used four bottles of your Sarsaparilla, and the Rheumatism has left me. I am now able to walk all over the city. I raise no blood, and my cough has left me. You can well imagine that I am thankful for these results. Your obedient servant, JAMES CUMMINGS.

Fits! Fits! Fits!!! Dr. Townsend, not having tested his Sarsaparilla in cases of Fits, of course never recommended it, and was surprised to receive the following from an intelligent and respectable Farmer in Westchester County:

Dr. Townsend—Dear Sir: I have a little girl seven years of age, who has had several years afflicted with Fits; we tried almost everything for her, but without success; at last, although we could not understand it, we tried your Sarsaparilla for cases like hers, we thought, as she was in very delicate health, we would give her some of your Sarsaparilla, and are very glad we did, for it not only restored her strength, but she has had no return of the Fits, to our great pleasure and surprise. She is fast becoming rugged and healthy, for which we feel grateful. Yours, respectfully, JOHN SUTHERLAND.

Female Medicines. Dr. Townsend's Sarsaparilla is a sovereign and speedy cure for Incipient Consumption, Barrenness, Profluvium Uteri, or Falling of the Womb, Costiveness, Leucorrhoea, or Whites, obstructed or difficult Menstruation, Incontinence of Urine, or involuntary discharge thereof, and for the general prostration of the system—no matter whether the result of inherent causes or caused accidentally. It is a most powerful and safe medicine, and is highly recommended by the most successful practitioners of the art. Nothing can be more surprising than its invigorating effects on the human frame. Persons all weakness and lassitude, from taking it, at once become robust and full of energy, under its influence. It is a most powerful and safe medicine, and is highly recommended by the most successful practitioners of the art. Nothing can be more surprising than its invigorating effects on the human frame.
