The Telegraph states that the political news which she brings is unimportant. Its most interesting feature is an account of the interview, dress on the occasion, in which he abstained from any allusion to the late diplomatic misunderstanding between the two Governments .-President Bonaparie, however, alluded to the affair in terms highly flattering to Mr. Rives and his country.

It appears that Mr. Bulwer, Minister to the United States, did not embark on board the Hecate steamer until the 15th instant, and had not sailed in the evening of that day.

There is no news from Rome. It is still said that the Pope meditates an early return to that city. The Spanish troops had received ! orders to return to Spain.

Cheap Postage.

It will be very generally gratifying to know that the Postmaster General intends to recommend a reduction of Postage, and the establishment of a uniform rate of five cents. A Washington correspondent of the North American very truly observes, that "this measure of reform has long been needed, and can now he adopted, if the majorities in Congress are dis- tration. The correspondent of the Philadelphia posed to second the popular and judicious sug. North American gives the record of "the do gestions of Mr. Collamer. The reduction is ings of the Post Office Department, from the entirely practicable, if Congress will relieve 4th of March to the 30th of October, inclusive. private correspondence from the enormous and by which it appears that within these dates unjust tax which is now imposed upon it, for there werethe transportation of the correspondence and documentary matter of the departments and members of Congress. It may be asked with propriety, why should this imposition be levied upon one branch of the public service more than another? Why should the expenses of Custom Houses, Land Offices, &c . be liquidated policy of the age is in favor of the diffusion of knowledge in the cheapest and most expeditious manner, and the member of Congress who sage of the old compensation bill."

A reform in Newspaper Postage is also demanded. Owing to the " second hand" system of publishing in the cities, country publishers need a sort of a " Tariff" to protect them from the ruinous competition. This can readily be story never had the semblance of truth to sussecured by a new postage system, authorizing tain it, but was a pure intention of the newsthe circulation of newspapers, by mail, in the counties or Congressional districts in which they are printed, free of postage. The present rates are grossly unequal and unjust to the country press, and we hope our Editorial brethren will speak out and stand up for their inter-

New States and Territories.

A Washington letter writer says that on the first day of the session notice will be given in the The Messrs. Rotchild, Bankers, Senate, of a bill to establish certain Territories; to provide for the admission of California; the creation of a new State in Texas; and the adjustment of the boundary between Texas and London and Liverpool Insurance New Mexico.

The bill will provide for the establishment of the Territory of Deseret; also for the Territory of California, north of 36 degrees 30 min. The bill will provide that the Territory of North California shall be admitted as a State into the Union; and, at the same time it will provide that a portion of Texas, south of 36 degrees 30 min. shall be permitted to form a State Constitution; and that the question of boundary between Texas and New Mexico shall be submitted to a board of commissioners.

Emigration to Iowa.

Our lowa exchanges state that an unsually large emigration to that State is now going on, The Muscatine Enquirer says that an average of five families a day has crossed the Mississippi at that point for a month or six weeks. There are three or four points below where the number of persons crossing is greater than at that place, and some points above where it is probably as large. Assuming that ten points on the river, taken together, will average as many as Muscatine, and we have fifty families a day, and in forty days two thousand families. or ten thousand persons. The emigration by river is much larger than by land, and, therefore, the lowest estimate of the aggregate emigration to the State, the present fall, must be twenty thousand. There will be at the next census, half a million of people in the upper valley, north of the States of Missouri and Illinois.

Some five years since a man and woman of Kamaloo, Molokai, abaconded into the distant mountain junyle, where, under a dense mass of overshadowing convolvulus, they constructed a hu, in which they lived without being seen by any human being, the succeeding five years. Tired at last with their stolen enjoyments, they have just abandoned their seclusion, and returned to the abodes of men, where they were instantly seized and condemned to the usual fine by lew imposed for breach of the seventh commandment. They had for fear of detection, cooked all their food, and done what was necessary for the support of life, in the night, and lurked in the day time in their gloomy cell. Polynesian, 18th August.

Duty on Coal.

The Pottsyille Miner's Journal states that the Coal Mining Association held a meeting there last week, at the instance of one of the gentlemen who had been invited to visit Washington, to confer with the Secretary of the Treasury. They decided upon recommending at the National Palace, between the President 28 per cent, less than the duty in the bill of he frequently took with him in his hunting extion to those branches of industry into which time. the consumption of coal enters largely, the rate manency is beginning to be regarded as of named Fletcher, who had by some means posmore value than high duties. Taxing the Property of Non-Residents.

Many of the richest and most extensive bankers in Europe, have capital invested to a large amount in New York, and which entirely escapes taxation Among these, as part of the capital so invested, may be mentioned :

\$93,800,000 Many more names might be added, swelling the amount of capital invested here, and which draws out immense yearly earnings, without paying a penny of tax, to more than five hundred millions of dollars. Now, if these foreign merchants and others were taxed, we have the authority of the "Globe" for saying that instead of having in New York only \$256,217,-093 worth of taxable property, we should have \$756,217, 092 worth, and the tax on the real and personal property in this city, would be reduced from 118 cents on the hundred dollars, to 50 cents on the dollar, or even less.

A Cure for Cancer.

N. Y. Express.

The following, says the Indiana State Journal, is a very simple and effectual cure for cancers :- The extract of wood sorrel, used as a plaster through the day, and slippery elm bark at night, will cure any cancer that has ulcerated, or that has not live ekin over it; in that case the skin should be broken in some way. To burn a piece of spunk on the place, is a good method, then apply the salve, as before directed. The extract is obtained, simply by pounding the common sorrel in a mortar, or other vessel, and pressing out the juice, then put it in a pewter dish or basin, and place it in the sun, until it dries to the consistence of tar, when it is fit for use.

A Monster Tape-Worm.

The gentleman had consulted eminent physicians in the South as well as in the North. had taken vast quantities of powerful and nauseating medicines, but the most they had done was to bring away small portions, only a few feet in length, so that he had nearly despaired of ever being relieved.

Finding himself entirely rid of the parasite which had been for years preying, as it were, upon his very vitals, and which must in a short time have destroyed his life, he was almost delirious with joy. He has now returned to his family and friends in a state of perfect health.
