## MONROE COUNTY Mutual Fire Insurance Company.

The rate of Insurance is one dollar on the thousand dollars insured, after which payment no subsequent tax will be levied, except to cover actual loss or damage by fire, that may fall upon members of the company.

The net profits arising from interest or otherwise, will be ascertained yearly, for which each member in proportion to his, her, or their deposit, will have a credit in the company. Each insurer in or with the said company will be a member thereof during the term of his or her policy. The principle of Mutual Insurance has been thoroughly tested—has been tried by the unerring test of experience, and has proved successful and become very popular. It affords the greatest security against loss or damage by fire, on the most advantageous and reasonable terms.

Applications for Insurance to be made in person, or by letters addressed to

## Professor Webster.

The case of Dr. Webster, still occupies a large share of public attention, and the justice of the verdict is questioned with increasing earnestness. It would not be surprising therefore, considering the state of public opinion—which seems to be the final Court of Appeal in this country—if the contemplated appeal to Executive interposition should be successful. The Boston papers discredit the story that a student now in Maine passed there through the Professor's laboratory and saw the body of Dr. Parkman.

The Boston Post, says:—This unfortunate man, so far as external appearances indicate, has become reconciled to his fate. His demeanor is that of a person endeavoring to solve some problem—calm and thoughtful. He reads much, and has recourse to many books and newspapers. His family visit him almost daily. The statement in one of the penny papers, that a daughter of Professor Webster had been rendered insane by the conviction and sentence of her father, is totally destitute of truth. No such calamity has befallen this afflicted family. They bear the terrible trial which has come upon them with submission, patience, and a Christian fortitude the furthest possible removed from that despairing anguish which produces insanity.

## Another Shower of Flesh and Blood.

Mr. G. W. Bassett sends to the Richmond Whig, an account of a small cloud passing over, a few paces from the south bank of the Pamunkey river, in the lower end of Hanover county, Va., on the estate called Farmington, and discharging around, over a surface of something less than one rood of ground, various pieces of flesh and liver. The Whig says:—The specimens sent to us have been sent to Dr. Gibson, and the result of his examination will be given. They had very much the smell of frogs—and were probably originally denizens of some swamp—taken up by a water spout.

A similar occurrence happened in Samson county, N. C., on the 15th of February.

Hon. F. H. Elmore, at present President of the Bank of South Carolina, has been appointed to fill the vacancy in the U. S. Senate, occasioned by the death of Mr. Calhoun, and has accepted.

## Important.

It is asserted that the unsuccessful portion of the California adventurers are only those who left the States without paying the Printer? It seems astonishing that a delinquency which is almost sure to be followed by personal misfortune should be so very common.

## Qualifications for Church Members.

One of the boys in town, being, as he expressed it, "slightly miscellaneous," went into a dissertation on church affairs. Said he, "If a man wants to stay in the church, he must have either piety or money, by thunder! I know it, for that's the principle they hussed me out on." No one questioned the force of the reasoning—and for once "commentators did not differ."

## 100 Days of the Session Gone and what has been done?

The Legislature has now been in session upwards of one hundred days, and the House has not yet passed the appropriation bill on second reading. A motion to take it up, was voted down by the Locofocos, by a strict party vote. This bill must first pass the House before the Senate can act upon it.

Nor has there been any action upon the numerous applications for the extension of bank charters or granting of new ones, nor upon many other important measures recommended to their consideration by the Governor in his annual message. The Locofoco majority which have had the entire control of the legislative action, have seemed to labor for nothing but to thwart the Executive in all measures of reform, and form schemes to deprive Whigs of the right of representation and of holding office. They have attempted no legislation on public questions in the usual way of open session before the world. All has first been fixed and determined upon in secret conclave; and their public actions has only the ratification of the edicts of their secret caucuses. These have been held day and night, and all who have had objections to such a course have been driven into them by the potent influence of the party lash, which has been applied as unsparingly as it is on the bare back of the blistering negro slave at the South.

In 1847 the Legislature was Whig in both branches. How different were things managed then. They commenced the session on the 5th of January and ended it on the 16th of March, doing all the business necessary to be done, and much more than has been done by the present one, although they have already been in session a month longer. The Whig Legislature saved some thousands of dollars to the State, while the Locofocos are squandering with a prodigal hand. These are facts for the people to remember at the ballot-box.

## Odd Fellowship in Maryland.

It appears from recent statistics that there are upwards of 7,000 members of the various lodges in Baltimore, and more than 9,000 in the State. The amount of contributions during the last quarter is \$15,806; expenditures for charities to the Order \$9,098; leaving a surplus of \$6,706.

JUDGE HEPBURN, of Pitsburg, has decided that neither a Mayor nor an Alderman has the Authority which has hitherto been exercised to Sentence individuals charged with "disorderly conduct," "night walking" &c., for so many hours or days—no more power to sentence them to the County jail than to the Penitentiary for the same period. They may only Commit them to answer for the offence before the Court, and at any time they may be released by the usual forms. This decision was given, in the case of a constable who had been sentenced by Mayor Barker of that place for attempting to serve a bench warrant. The proceedings are to be taken up to the Supreme Court. The constable was released.

Blessings of being sick.—Adversities are blessings in disguise. We know a man who lived six months on a sprained ankle. He belonged to half-a-dozen societies, and draws four dollars a week from each. He once spent a whole summer at Saratoga on a sore throat.

A New Balloon.—A Paris paper tells a wonderful story of Mons. Pain, who has invented a balloon to be propelled on some principle which has been suggested by the muscular apparatus of birds, and which when finished, will carry some three thousand people through the air at a very rapid rate.

Since Father Mathew came to the U. States, he has administered the temperance pledge to one hundred and seventy-five thousand persons—an incredible number, we admit; and this before he went to the South, if we mistake not.

## Religious Revivals in New Jersey.

The Methodist, Baptist and Presbyterian churches at Wantage, Deckertown, and Mt. Salem in Sussex county have had large accessions within a few weeks—not less than 400 persons having made a profession of religion among them, within four months. The College and Churches at Princeton continue more than usually interested in the subject, and many converts are reported. A similar state of feeling exist at Amboy.—Newark Daily.

## New kind of Coal.

The schooner Pericles, arrived at this port on Tuesday, brought part of a deck load of a new kind of coal. A vein was discovered, this spring, near Dorchester, Nova Scotia, and some few chaldrons have been got out. It has a glossy appearance, and when lighted with a match it burns like gas.—Dr. Johnson is analysing a piece of it.—Boston Traveller.

## Union of three Republics.

At a meeting held in the city of Leon de Nicaragua, by the ministers of the States of Honduras, San Salvador and Nicaragua, it has been decided that the three republics will form a single national body for the conduct of its foreign relations, under the name of "National Representation of Central America."

The National Washington Monument at the Capital, is progressing rapidly, having already reached a height of 50 feet. According to the plan adopted, the extreme altitude will be about 6000 feet.

## Oh, Crickee!

Married, in Louisville, Ky., on the 27th ult., Miss Rachael Fitzbergirzspinger, of Germany, to Mr. Dennis O'Keefengreigherty, of Ireland.

The office of Sheriff in San Francisco is worth from \$20,000 to \$25,000 per year.

## Texas Claret.

It is stated that excellent claret is now manufactured in Texas from the Mustang grape; the spontaneous production of which exceed all belief. Thousands of hogsheads of wine, nowise inferior to French claret, could be manufactured every year from this hardy native grape.
