

Eclipses for 1851.

There will be four eclipses in 1851,—two of the sun and two of the moon. A partial eclipse of the moon, on the 17th of January, will be invisible on this continent. An annular eclipse of the sun on the 1st of February, invisible in North America, but central and vertical in the Indian Ocean, near the Isle of Java. A partial eclipse of the moon, on the 18th of July, visible throughout the United States; first contact with shadow, 1 o'clock, 6 min.; middle of eclipse, 2 o'clock, 35 min.; last contact with shadow, 4 o'clock, 8 min.; mean time, moon; magnitude of eclipse, 8 2/5 digits on moon's southern limb. A total eclipse of the sun, on the 28th July, partially visible, as follows: Beginning of eclipse 7 o'clock, 30 min.; A. M.; middle, 9 o'clock, 37 min. A. M.; end of eclipse; 7 min. P. M. This eclipse will be total at Baffin's Bay, Labrador, a part of Greenland, and in the Atlantic Ocean, east of Newfoundland. Eclipse on the sun's northern limb.

HOW TO KEEP WORMS OUT OF DRIED FRUIT.—Have a pot full of scalding water on the fire, then put the fruit into sacks of suitable sizes, and dip them in the boiling water, which will kill the worm or what causes it. After dipping, spread the fruit out to dry—the scalding does not do the fruit any injury. Whatever it is that causes the worm, is deposited on the fruit during the process of drying.

An old acquaintance of ours in the country, indulges in a very exaggerated style of description and illustration, in his ordinary conversation. For instance, when describing the effect of an alteration of his kitchen chimney which he had ordered his mason to make, he said that "before the chimney was altered, it drew the wrong way so powerful that every flock of geese that flew over the town for ten years was sucked down into his fireplace, but since the alteration had been made, the draught was so strong that if he should hook one end of an ox chain in the middle of the kitchen floor, the other end would stand quivering up the chimney!"

DAUBING IT ON THICK.—An exchange says, the man who would systematically and willfully set about cheating a printer, would commit a highway robbery upon a crying baby and rob it of its gingerbread—rob a church of counterfeit pennies—lick the butter off a blind rigger's last "flutter"—paw his grandmother's specs for a drink of whiskey—steal acorns from a starving sow, and take clothes from a scare-crow, to make a respectable appearance in society.

A Spanish Pawnbroker.

The City of Barcelona, in Spain, possesses a peculiar pawnbroking establishment, where loans are made without interest to necessitous persons, on the deposit of any articles. Two-thirds of the value of the deposit are at once advanced, and the loan is made for six months and a day; but if at the expiration of that period, the depositor should declare himself unable to redeem it, another period of six months is allowed. At the end of the second six months the pledges are sold; but if they yield more than the amount advanced, the difference is given to the original owner. The Marquis de Lila is President of this charitable establishment; and he has just addressed a letter to the clergy of the diocese, praying them to make its advantages known. It bears the name of the Pawnbroking Establishment of our Lady of Hope. In the year 1849, 5,666 persons availed themselves of its generosity.
