Specie and its Exportation.

The exportation of specie from New York during the month of April amounted to \$3,-482,182. Since the beginning of the present month the flow of coin to Europe has gone on with increased volume. The Asia which sailed on Wednesday, took out about \$870,-000: the Humboldt, on Tuesday, took out \$858,031; and the Pacific, which is to leave for Liverpool to-morrow, has \$325,000 engaged-making a total of nearly two millions of dollars-a larger amount than was received from California by Georgia.

The importations of foreign merchandise placed in his Museum ! at New York for the month of April amounted in value to \$10,330,883, while the exports of domestic and foreign goods and produce amounted to \$4,847,660. With such a balance of more than five millions against us, in the business of one month, it may be easily seen why specie is exported to Europe.

Mammoth White Ash Coal Vein. Many of our readers are aware that the Delaware Coal Company, at their Mines just north of this borough, have been engaged for months past in sinking a Shaft with the view of reaching the Mammoth White Ash Coal Vein, which according to the theory of Mr. E. Mr. McGinnes, who has charge of the work, sunk a Shaft about 65 feet, and then bored some 435 feet, when on Thursday last, at a perpendicular depth of 500 feet, as he informed us, they struck the White Ash Vein and brought up Coal, specimens of which he showed us .-The value of this discovery, not only to the Company but to the contry at large, cannot be estimated .- Pottsville Emporium.

Foreign News.

By the arrival of the Europa at New York, on Thursday morning of last week. we have Liverpool dates to the 26th ult The news from Europe is not of much importance. Cotton had declined fully three-eighths of a penny per pound ; and bread stuffs were also lower-the supply greatly exceeding the demand. Flour was worth about 20 shillings per barrel and grain in proportion. The Exhibition or World's Fair appears to absorb public attention almost entirely.

LATER .- The Arctic arrived at New-York on Sunday morning last, with Liv. erpool dates to the 30th. Cotton had still further declined. There is no news of importance.

Great Fire at Montrose.

One-third of the Business part of the Tearn Destroyed .- Loss from \$40,000 to \$60.

Tuesday morning (6th inst.) a few minutes before one o'clock, a fire was discovered in the out-buildings attached to L. Searles' Hotel. When first discovered it had just broken through the roof. The wind was blowing a steady breeze from the West, and in a few minutes it communicated to the rear of the large storehouses fronting on Public Avenue, which were soon enveloped in a sea of flame .---Our citizens were on the spot en mass, and put forth every exertion to stay the progress of the destroying element. The fire swept on towards the Court House. and in two hours the whole West side of Public Avenue, from Searle's Hotel to the dwelling house of H. J. Webb, on the corner fronting Hatche's hotel, was a mass of ruins. The following are the names of the suffers: L. Searle, all the outhouses attached to his Hotel, with large quantities of hay, and several thousand bushels of oats, together with several coaches and other carriages, harnesses, &c.

and eight horses, five of which, however, belonged to travellers and others who were stopping with him. A Mr. Gregory, of Auburn township, lost one span of horses and a load of wheat. The large store building of Mr. Searle, occupied by R. Searle, Dry Goods merchant; George Fuller, Book and Clothing dealer; Wm. Dr. E. Park's office ; J. Groves, Tailor ; and L. B. Hinds, Boot and Shoemaker, was wholly consumed. The losses of these different individuals we have not yet ascertained, though but little comparatively, was saved. M. Searle's whole loss will reach nearly \$10,000, of which about \$2,800, we believe, is insured. Next, the store of J. Etheridge, with nearly all its contents, was consumed. It is thought that Mr. Etheridge's insurance will nearly cover his loss. The shop occupied by Mr. R. Jameson, Tailor, was burned .-His loss we have not ascertained. The large store, sheds, stove and tin shops of S. H. Sayre & Co., with nearly all their contents, together with the dwelling house of B. Sayre, the law office of F. B. Streeter, Esq. and carriage house of B. S. Bentley, Esq. were consumed. Mr. Sayre's loss is estimated at about \$15,000, on which was an insurance of \$1,500. Mr. Streeter's loss is about \$400, no insurance. Mr. Bentley's from two to three hundred. The fire was undoubtedly the work of an incendiary. A dark lantern was found near where the fire was first discovered. Mr. Sayre is the greatest sufferer of all. The whole loss of our citizens is variously estimated, from \$40,000 to \$60,000. The insurance on this sum is small. Our beautiful town is now a melancholy spectacle indeed .- Montrose Democrat.

THOMAS H. SEYMOUR, the present Governor of Connecticut, was re-elected to that station on the 9th inst., by the Legislature of Hartford on Wednesday. This may be regarded as settling the question as to which of the parties has a majority in joint meeting of the Legislature. Other State Officers are to be elected, (the people having failed to elect them,) as well as a United States Senator.

Manufacture of Jewelry in New Jersey.

Few persons, says the Newark Aduertiser, have an adequate idea of the extent and value of this branch of manufacture in New Jersey :--

"A recent estimate puts the number of manufactories at 18, employing 6000 hands, whose average wages, including boys, amounts to \$12 a week. The weekly product of manutactured articles is about \$35,000, or \$1,-820,000 a year. In the manufacture of watch cases alone, about 50 hands are employed .---In some manufactories chains are made, in others, principally rings, while in others, almost every article yet invented for the adornment of persons of both sexes, are manufactured. The gold used for a year past, has mostly the product of California, brought here assayed, and in bars ; the precious stones forming a part of the ornaments are imported from Europe ready cut for use. An erroneous idea, we understand, is prevalent in relation to the increase of value of all the gold manufactured into jewelry. A large number of articles prove to be unsaleable and out of fashion, and when that occurs, they are re-

A Fast Funeral.

A Race to the Grave .- On Saturday last two Funeral processions, of unusual length, on their way to the Catholic Cemetry in Camldge, neared each other above Porter's Hotel. A rivalry immediately set up between the drivers of the hearses, to see which should reach the gate of the Cemetry first ! By a great application of the whip a sample of fast driving developed itself-but the race was of short duration. The coffin in one of the hearses was thrown out on the ground, and before the cortege following could draw up, was then before them, and though the bet it was run over by three or four hacks, and seriously mutilated. This accident suddenly put an end to the mad career of the Jehus. The body was restored to its proper place, and the two funerals preceeded in order .--Fast driving to the grave often occurs in Cambridge.-Boston Mail.
