Cows. For Milk Cows, we are fully convinced that it not only improves the quality, but that it increases the amount of Milk, Gream and Butter; some who have tried the experiment say a pound a week, others say half a pound, while one person insisted upon it that he for the cure of Heaves, and approve of it made two pounds more a week from each Cow. We think it will be found to average from a half to a pound per week each Cow, if the Cows are perfectly healthy. This additional amount is made by the conversion of the Hippuric Acid into Nitrogenous and fatty compounds; also by supplying the oxygen taken in by the lungs, with the elements of reaction; without taking any of the Nitrogen-ous portions of the feed.
