SAMUEL MELICK

To whom it may concern-To the intelligent. the thoughtful, the philanthropic. Your at tention is respectfully invited to a new, original, peculiar, and important work, of 480 pages 18 mo., and containing nearly one hundred engravings, and entitled,

ESOTERIC ANTHROPOLOGY.

BY T. L. NICHOLS, M. D. DRINCIPAL of the American Dydropath. ic Institute, Educational and Therapeutical, at Portchester, N. Y., one hour's distance from New York city on the New York and New Haven Railroad. A comprehensive and confidential Treatise on the Structure, Functions, Passional Attractions and Perversions, True and False Physical and Social Conditions, and the most intimate Relations of Men and Women,

The title, Esoteric Anthropology, will seem strange to many, but it is thoroughly appropriate. Anthropology is from Anthropos. a man, and Logos, a description. Esoteric, from Eso, within, signifies private, secret, interior, and was used by the ancient philosophers to distinguish their private Choice and Milford. Returning, leaves Port dwellings, upon the sacred mysteries of Jervis immediately after the arrival of the science and philosophy, to their chosen disciples, from their Exoteric discourses, which were given to the public. Esoteric Anthropology is, therefore, a private treatise on Human Anatomy, Physiology, Therapeutics and Obstetrics-on the whole science of man-plain in language, full and faithful in illustration, and written with all the frankness of a private letter, under the seal of professional confidence. It contains the righest and deepest truths in every department of Human Physiology, with their individual and social application; the true nature and hidden cause of Disease; the conditions of Health, physical and passional all that information which every human being needs, which few dare ask for, or know how to obtain, but which, amid the discordances and depravities of civilization, is of There are many subjects connected with

the broad science of Human Life, of the deepest and most vital interest to man and the race, in regard to which a terrible ignorance every where prevails; an ignorance which is destroying the healths, shortening the lives, and sacrificing the happiness of millions-which threatens the power of nations, and the perpetuity of races. Professional works on Physiology are dry

mechanical, or chemical, astonishingly ignorant, as well as technically incomprehensible. The popular works are superficial, meager, and necessarily wanting in the most important matters. The quack books are full of errors, false in science, absurd in philosophy, mischeirous in morals, and basely meccenary in their motives. In most cases these books are the advertising medium of some specious charlatan, who wants patients, or letters of consultation, or who has some instrument to sell, or some nestrum to palm off upon the credulous.

The world has need of a different book from any of these -- such a book as has never Physician, a public and private Lecturer on all branches of Medical Science, has written this book with a frankness he never could have used in a work for the public, or one open to criticism. It is for his pupils The retail price is 25 cents per vial which and patients, for intelligent men and women, who wish to understand the deepest myste-Brooklyn, L. I. January 16, 1847, ries of life; especially it is for the noble and I do certify that I gave one bottle of hereoio few, who are brave enough to examine and accept new truths, and wise e nough to profit by them. There can scarcely be any important question, which any man or woman can ever need to ask a phy tain an answer. It is so complete in this respect, that the author hopes and believes that no one who reads it will ever need to Poughkeepsie, N. Y. March 2, 1844. trouble himself with a professional consultakind as a healer of the sick, a preserver of health, and a teacher of the Laws of Life.

Among the subjects treated of in this work, are the following: Man, and his relations to the Spiritual and Material Universe Homan Anatomy; the Chemistry of Man. Principles of Physiology and the Active Forces of Nature; The Three Groups of Functions, Organic, Animal, and General tive; The whole Philosophy and Processes of Reproduction; The True Law of Marriage Diseases of the General System; Brain and Nerves; Respiration; Digestion; Generation; Gestation and Parturition; Lactation and the Management of Infancy, etc., etc., including every important condition and pro-The subscriber hav- cess from the beginning to the close of life
