ESOTERIC ANTHROPOLOGY.

BY T. L. NICHOLS, M. D. DRINCIPAL of the American Dydropath. ic Institute, Educational and Therapeutical, at Portchester, N. Y., one hour's distance from New York city on the New York and New Haven Railroad. A comprehensize and confidential Treatise on the Structure, Functions, Passional Attractions and Perversions, True and False Physical nd Social Conditions, and the most intimate Relations of Men and Women. The title, Esoteric Anthropology, will

seem strange to many, but it is thoroughly appropriate. Anthropology is from Anthropos, a man, and Logos, a description. Esoteric, from Eso, within, signifies private, secret, interior, and was used by the ancient philosophers to distinguish their private lectures, given in the interiors of their were given to the public. Esoteric Anthro. pology is, therefore, a private treatise on Human Anatomy, Physiology, Therapeutics and Obstetrics-on the whole science of man-plain in language, full and faithful in illustration, and written with all the frank. ness of a private letter, under the seal of professional confidence. It contains the highest and deepest truths in every department of Human Physiology, with their individual and social application; the true nature and hidden cause of Disease; the conditions of Health, physical and passional; all that information which every human be. ing needs, which few dare ask for, or know how to obtain, but which, amid the discordances and depravities of civilization, is of priceless value.

There are many subjects connected with the broad science of Human Life, of the deepest and most vital interest to man and the race, in regard to which a terrible ignorance every where prevails; an ignorance which is destroying the healths, shortening the lives, and sacrificing the happiness of millions-which threatens the power of nations, and the perpetuity of races.

Professional works on Physiology are dry mechanical, or chemical, astonishingly ignorant, as well as technically incomprehensible. The popular works are superficial, meager, and necessarily wanting in the most important matters. The quack books are full of errors, false in science, absurd in philosophy, mischeivous in morals, and basely mecrenary in their motives. In most cases these books are the advertising medium of some specious charlatan, who wants patients, or letters of consultation, or who has some instrument to sell, or some nest-The testimony in its favor is over- rum to palm off upon the credulous.

The world has need of a different book from any of these-such a book as has never been written, and as cannot now be publishall branches of Medical Science, has written this book with a frankness he never could have used in a work for the public, or who wish to understand the deepest mysic-Brooklyn, L. I.
