ESOTERIC ANTHROPOLOGY,

BY T. L. MICHOLS, M. D. DRINCIPAL of the Americal Dydropath ic institute, diducational and Therareutical, at Purtchester, N. Y., one hour's distance from New York city on the New York and New Haven Railfoad, A comprehensive and confidential Treatise on the and Perversions, True and Faise Physical nd Social Conditions, and the most intimate Relations of Men and Women,

The title, Esoteric Anthropology, will seem strange to many, but it is thoroughly appropriate. Authropology is from Anthropos. a man, and Logos, a description. Esoteric, from Eso, within, signifies private, secret, interior, and was used by the ancient philosophers to distinguish their private lectures, given in the interiors of their dwellings, gupon the sacred mysteries of science and philosophy, to their chosen disciples, from their Exsteric discourses, which were given to the public. Exoteric Anthropology is, therefore, a private treatise on man-plain in language, full and faithful in When Haven. illustration, and written with all the frankness of a private letter, under the seal of professional confidence. It contains the highest and deepest touths in every department of Human Physiology, with their individual and social application; the true nature and hidden cause of Disease; the conditions of Health, physical and passional; all that information which every human being needs, which few dare ask for, or know how to obtain, but which, amid the discordances and depravilies of civilization, is of priceless value.

There are many subjects connected with the broad science of Human Life, of the deepest and most vital interest to man and the race, in regard to which a terrible ignotance every where prevails; an ignorance which is destroying the healths, shortening the lives, and sacrificing the happiness of millions-which threatens the power of nations, and the perpetuity of races. Professional works on Physiology are dry.

mechanical, or chemical, astonishingly ignorant, as well as technically incomprehensible. The popular works are superficial. meager, and necessarily wanting in the most important matters. The quack books are full of errors, false in science, absurd in philosophy, mischeivous in morals, and basely meccenary in their motives. In most

From the Boston Bee.

The editor said, Dec. 22nd-Dr Hoofland's celebrated German Bitters for the cure of Liver complaint, jaundice, dyspepsia, chronic or nervous debility, is deservedly one of the most popular medicines of the day. These Bitters have been used by thousands, and a friend at our elbow says he has himself received an effectual and permanent cure of Liver complaint from the use of this remedy We are convinced that, in the use of these Bitters, the patient constantly gains strength and vigor --- a fact worthy of great consideration. They are pleasant in taste and smell and can be used by persons with the most delicate stomachs with safety, under any circumstances. We are speaking from experience, and to the afflicted we advise their use. 'Scorr's WEEKLY,' one of the best Liter-

ary papers published, said, Aug. 25-"Dr. Hoofiand's German Bitters, manufac-

tured by Dr. Jackson, are now recommended by some of the most prominent members of the faculty as an article of much efficacy in cases of female weakness. As such is the case, we would advise all mothers to obtain bottle, and thus save themselves much sick-

The world has need of a different book from any of these + such a book as has never been written, and as cannot now be published in the usual way, sold by booksellers, of hawked by agents or peddlers. The author of Esoteric Anthropology, a Teacher, a Physician, a public and private Lecturer on all branches of Medical Science, has written this book with a frankness he never could have used in a work for the public, or one open to criticism. It is for his pupits and patients, for intelligent men and women, who wish to understand the deepest mysteries of life; especially it is for the noble and herenio few, who are brase enough to examine and accept new truths, and wise enongh to profit by them. . There can scarcely be any important question, which any man or woman can ever need to ask a physician, to which this volume does not contain an answer. It is so complete in this respect, that the author hopes and beliaves that no one who reads it will ever need to trouble himself with a professional consultation. It is henceforth his chosen method of medical instruction and practice, and in it he has performed the doty he owes mankind as a healer of the sick, a preserver of health, and a teacher of the Laws of Life. Among the subjects treated of in this work, are the following: Man, and his relations to the Spiritual and Material Universe Human Anatomy; the Chemistry of Man; fore recommend it. Principles of Physiology and the Active Forces of Nature; The Three Groups of Fouctions, Organic, Animal, and Generative; The whole Philosophy and Processes of Reproduction; The True Law of Marriage Diseases of the General System; Brain Vermijuge. and Nerves; Respiration; Digestion; Generation; Gestation and Parturition; Lactation and the Management of Infancy, etc., etc., including every important condition and process from the beginning to the close of life,

and containing especially-1. A clear and amply illustrated view of the structure of the human body, and all its complex organism, male and female.

2. A full account of the functions of life, with such an illustrated description of the evolution of the embryo, as has not before been given.
