

The Cincinnati Tragedy—A Woman's Revenger.

The Cincinnati Commercial gives the particulars of the murder committed in that city by a woman.

The history of this bloody affair is, in brief, as follows: Not many years since Captain John Howard married the daughter of a physician residing in Montreal, Canada. They lived together in apparent happiness and domestic comfort for some time in this city, but difficulties occurred, not necessary here to name, and the parties separated—the wife taking the two children: a boy and a girl. Not long after the separation Capt. H. obtained the two children by violent means—having no recourse to the law—and placed them in charge of a friend in Kentucky; at the same time an application for a divorce was pending in a court in that State. Mrs. H. was of an impetuous and determined temperament—a woman of many accomplishments, and capable of occupying high places in society—and felt her humiliation in a high degree, and had often sworn revenge.—Heaven knows she has got it!

Capt. H. married again, (it is said,) and was living at the time of this terrible transaction with the lady (quite handsome by the way and amiable in her manners) who fell a victim to the wild fury of jealousy and vengeance, and perished by the knife of the abandoned wife. The circumstances of the tragedy are as follows:

About five o'clock, last evening, a woman called at the boarding house of Mrs. Wolf, on 5th street, between Plum and Western Row, and walked into the entry. Meeting Mrs. W. she said—"Madam, I saw your door open and took the liberty of walking in. I came to see Mrs. Howard." Mrs. W. said she would call Mrs. H. and immediately went up stairs for that purpose.

Mrs. H. soon came down, and upon meeting the stranger, the latter sprang at her, and plunged a knife into her neck severing the jugular, and then walked off. Mrs. H. staggered back into the kitchen, the blood gushing from the wound, cried, "O, Mrs. Wolf, I am killed!" and expired in a short time. Mr. Howard was in the house at the time, and upon being made acquainted with the facts, he seized a knife, and calling the name of the murderer, rushed down stairs—but she had escaped. The bleeding object of his love was writing in death before him, and he became frantic.

Pursuit was made for the murderer, but she could be found no where. Mr. John L. Scott, member from the Second Ward, however, met her a short time after the murder, on Fourth street, near Nine, when she called his attention, by showing him a knife reeking with blood and exclaiming—"I have done it!—I killed her!—can I get this much out of Howard?" She was determined in her manner, and here she had the glaze of a fanatic! Her hand and arm to the elbow were besmeared with blood, and there were some spots upon her face. Mr. S. was so completely confounded by this meeting, that he suffered her to pass on. She was arrested at a late hour last night by officer Huse, Sr., near her residence.

DANGEROUS COUNTERFEIT.

We have been requested to publish the following accurate description of a dangerous counterfeit, of the denomination of \$5, on the Bank of Pennsylvania, and which has been circulated pretty freely in Milton, from Thompson's Counterfeit Detector. The notes are so well executed and so well calculated to deceive, that one of the bills, we are informed was taken for genuine at the counter of the Northumberland Bank, but was shortly afterwards detected. The following is the description of the counterfeit:

'5s imitation of genuine—surrounding the border on the right end, are the words, five dollars—five dollars, in very small print—in the genuine the inside line reads from the bottom and the outside line from the top; while in the counterfeit both of the lines read from the top of the note. The smoke-pipe of the locomotive between the President and Cashier's names is under the letter 'a' in Philadelphia—in the genuine the smoke-pipe is under the letter 'e'—and before the a in the same word.

Mr. CLAY.—The telegraph informs us that Mr. Clay has pledged himself, if elected Senator, to support General Taylor's Administration.—New York Sun. Then, says the Louisville Journal, the telegraph informs you falsely. Mr. Clay has repeatedly said, that, in the event of his going into the Senate, he should go with every disposition to support and strengthen the administration, but he has not pledged himself to its support. Neither Mr. Clay nor any other high-souled and independent Whig would pledge himself in advance to the support of the administration of any President whatever.

CURE FOR THE POLL-EVIL, IN ITS WORST STATE.—When the swelling breaks, or if it has been sometime a running sore, it will have a pipe or tube from which the matter discharges—in this crowd a lump of pearlash or potash, as big as you can with your finger. Three such applications will cure the worst case of poll evil or fistula that ever I saw.

Orphans' Court Sale of Real Estate.

BY virtue of an order of the Orphans' Court of the County of Wyoming, there will be exposed to public sale at the house of N. C. Martin, in the Borough of Tunkhannock, Wyoming county, Pa. on Thursday the 15th day of March next at 1 o'clock P. M. of that day the following described real Estate, late the Estate of J. J. Miller, deceased, bounded and described as follows:—

One piece or parcel thereof situate in the Township of Nicholson, Wyoming County, Pa., the same being the one half of a large tract of land in the Warrantee name of John Ely, beginning at a corner at a small white Ash, it being the South West corner, thence west eighty-five and a half perches along the line of Asa Horton to a corner, thence north two hundred and thirty-two perches to a corner, thence east eighty-five and a half perches to a small beech, being a corner of lands surveyed to John Whitehead, thence by and with the last mentioned lands south two hundred and thirty-two perches to the place of beginning; containing one hundred and twenty-three acres and one hundred and fifty-six perches, with about sixty acres improved, with a small frame house and fence thereon, being the same lands purchased by said Decedent at Sheriff's sale, sold as the property of William Scott. Also

One other piece or parcel of land, situate in the township of Tunkhannock in said County, bounded on the north by lands of Hammond's heirs, east by lands of Welch, south by lands of Thomas T. Slocum and Nicholson, containing forty three acres being the same more or less, and being the same lands purchased by said Decedent at Sheriff's sale, as the property of William Hammond & Henry G. Hammond, conveyed to the Decedent by Sheriff's Deed duly acknowledged on the 3rd day of May 1847, and recorded in Sheriff's Deed Book in said county in Deed Book page 147.

THE equal undivided half of the following described piece or parcel of land, situate in the township of Tunkhannock aforesaid, bounded on the North by lands of H. & S. Stark, on the East by lands of Welch & Ware, on the South by other lands of the Decedent, and on the West by the township of Tunkhannock to Monroeville, containing one hundred acres being the same more or less, and being a part of the John Shaler, which land were conveyed to the said John J. Miller, deceased, by Deed of William F. Lease and wife, dated the 20th day of February, A. D. 1848, and recorded in Wyoming County, in Records Office, in Book No. 3, page 210 &c.—Conditions as follows:—

One third of the purchase money on the day of sale, one third on confirmation of sale and delivery of Deed, and one third in one year after delivery of deed with interest to be secured by Judgment Bond, or by personal security at the option of the Administrators. A. K. PECKHAM, Administrator. N. C. MARTIN, Clerk. P. M. OSTERHOUT, Clerk.

To the Patrons of the "Record".—In late publisher owes an apology for the long delay of its successor. I was constantly negotiating for a sale, with different individuals, but did not succeed in closing a bargain until a year had elapsed. Mr. Lathrop, the publisher of this paper, will fill up all my engagements for papers and advertisements paid for, and payments due for papers may be made to him, so far as both are contained in lists furnished him. I trust the accounts are correct—that the arrangement may be satisfactory to all, and the change advantageous—and that the "Whig" may enjoy the favors of the people, and the people realize the happy results anticipated in the change of Government they have wrought. O. N. WORDEN, Lewisburg, Pa., Jan. 1849.

CALIFORNIA GOLD!

DISCOVERED BY SIGNOR D'ALVEAR'S GOLDOMETER, THE GOLD SEEKER'S GUIDE! OR Secret Art of finding Mines of Gold, Silver, Iron, Lead, Copper, Coal, and other Mineral Riches.

The first discovery of Gold in California was made by DON JOSE D'ALVEAR, an eminent Spanish Geologist, Chemist and Natural Philosopher, by means of a newly invented Magnetic instrument, called The Goldometer, or Gold Seeker's Guide! Signor D'Alvear has just arrived at New York, from the Gold regions of California, by way of Panama, Chagres, and New Orleans, bringing with him a very large quantity of Gold ore, valued at nearly one million of Dollars, which he collected there, long before the existence of the Gold mines became known to the residents of California generally.

History of the Discovery. Signor D'Alvear went into California certain years ago, in consequence of the geological character of that country, with the firm belief that vast mines of precious metals would be revealed there, upon careful investigation. He was confident of the powers of a certain Magnetic instrument which he had invented, called the "Goldometer," by whose aid he expected to be directed at once to the "Gold Placers," if any such existed. Nor were his expectations disappointed. His scientific calculations proved to be founded in truth and profound wisdom, and his new instrument, the "Goldometer," fulfilled his highest hopes. In less than two months after reaching California, he struck upon one of the richest gold mines in that country, upon an obscure branch of the Sacramento river, in a gorge of hills extremely rocky and difficult of access, and seldom visited by the natives. Discovering his object in the presence of a party of scientific men, he obtained the aid of some fifteen or twenty simple and faithful Indians, and steadily pursued his task, collecting often more than \$3,000 worth of gold in a single day, which he concealed in a deep ravine without exciting any suspicion whatever, until after the discovery of gold at Capt. Sutter's Mill, when the mountains were ransacked by gold seekers, and Signor D'Alvear's "gold placer," the richest in all California, was beset with greedy adventurers. It is now found that the real mines or sources of the gold, lie in the gorges of the mountains, and not in the beds of sands of the rivers. Previous to leaving California, Signor D'Alvear sold his instrument, the Goldometer, a very imperfect one, for \$3,000. The person who purchased it confidently expected to make a handsome fortune, by simply finding "gold placers," and selling out the right of digging to the gold workers.

Manufacture of the Goldometer, and Publication of the Guide. Signor D'Alvear, in compliance with the request of numerous scientific gentlemen, has commenced the manufacture of his new Magnetic Instrument, the GOLDOMETER, which he now offers for sale, in the United States, at the remarkably low price of THREE DOLLARS each, accompanied by full instructions for use, and a variety of Philosophical hints drawn from the ancient and modern sciences, or The Art of Finding Mines of Gold! Silver, Platinum, Quicksilver, Coal, Iron, Lead, and other Mineral Riches, the whole being given in a publication called the Gold Seeker's Guide.

This new work, and the GOLDOMETER, are both now ready for sale. The GOLDOMETER is so simple an instrument, that a child may learn to operate with it in five minutes. It is not affected by climate, moisture, or any other known cause, (except the natural magnet), and will retain its power of pointing out mineral riches in the earth for any number of years. By the aid of the Guide any person may use the instrument at once with perfect success.

Farmers and Land Owners. Farmers and Land Owners throughout the United States, who have reason to suspect the existence of any kind of Mineral riches upon their lands, should avail themselves of this opportunity to test that fact, by the surest of all known tests, before the abundance of discoveries in all parts of the country shall have lessened this source of wealth in their estate.

Adventurers to California. Persons going to California cannot make a better investment than by purchasing one of these instruments, which will not only be worth five times its value there, to sell again, but will be of inestimable worth to the person who goes in search of Gold, as has been proved by the most abundant experiment both in California and the United States.

Testimonials. Signor D'Alvear does not deem it necessary to encumber this notice with a list of testimonials, inasmuch as the GOLDOMETER, and GOLD SEEKER'S GUIDE, the brilliant results of his labors in California, and the discovery, this very week, of fresh veins of Gold in Virginia and the United States, by the aid of his instrument, are alone sufficient to stamp it as the greatest discovery of the age. Nothing but the extreme cheapness of the instrument, and his desire to see it used for the benefit of mankind induces him to dispose of it at the low price for which he offers it. Besides this, his own desire for wealth is nearly satisfied.

The following Testimonials, in proof of the value of the Goldometer, delivered from a great number of equally satisfactory, must suffice for the present: ASTOR HOUSE, New York, Dec. 21, 1848. The undersigned, having this day witnessed the practical operation of Signor D'Alvear's newly invented magnetic instrument, the Goldometer, feel entirely satisfied that it possesses the extraordinary power of detecting Mineral ores hidden beneath the surface of the earth, and have no doubt that it will prove an invaluable aid to the discovery of the Mineral resources of the United States and the world. J. R. DRAPER, JR., CHEMIST. DR. HANX, M.D., MARRIOTT'S MARKET. G. S. DANX, GEOLGIST.

FOR ANGELES, CALIFORNIA, AUGUST, 1848. "This very worthy instrument, which I have seen successfully applied to the discovery of veins of gold ore, in places where no indications of that substance appeared upon the surface of the earth. T. W. SHERMAN, Lieut. 3d Artillery U. S. Army. No Agents.

In consequence of the difficulty of finding articles of this nature, and of preventing frauds, where articles of this nature are set out for general sale, Signor D'Alvear has determined to sell none of his works or instruments unless ordered by letters sent direct to him, where the full description, or instructions, will be forwarded under his signature and seal, so that all doubts as to its genuineness may be removed.

BEWARE OF ALL IMITATIONS of this instrument which may hereafter appear, as the secret of imparting the Gold Detecting power is known to no person whatever, except the original inventor. THE GOLDOMETER, and GOLD SEEKER'S GUIDE, will both be sent by mail, closely enveloped and sealed, not subject to inspection by Postmasters, for the sum of THREE DOLLARS, sent post paid to SIGNOR JOSE D'ALVEAR, Box 2713, New York City. The Instrument is very light, and the Guide is printed on this paper—so that the charge by mail, or express, will be very small to any part of the United States. The price of the GOLD SEEKER'S GUIDE alone, is ONE DOLLAR, sent as above.—Address, SIGNOR D'ALVEAR, Box 2713, New York City. OFFICE for the sale of the GOLD SEEKER'S GUIDE and GOLDOMETER, No. 33 CENTRE St., New York City, where visitors may see several cases of California Gold, in the rough state as extracted by Signor D'Alvear from the Sacramento Mines, and also witness the operation of the GOLDOMETER, when held within the magnetic influence of the preloam metal, and the ensuing manifestation in which it indicates the presence of that and other metallic substances.

RAYMOND'S OREGON PILLS.

QUESTION: what's your pills good for? Answer: They are good in many cases to leave the Doctors at home in peace, to pursue the plow and follow their agricultural pursuits unmolested. Q. Will they cure everything? A. No, but they will relieve as many family complaints as any other pill in these U. S., and are warranted to cure the dysentery if taken according to directions. This medicine is the invention of a celebrated and learned physician living near the Catskill mountains, New York. It will bear its own credit if used enough to feel its effects, and hundreds of respectable names as any in the counties of Luzerne and Wyoming could be presented to the public as a recommendation to this pill: but the proprietor would forbear, as it is generally calculated that those who purchase pills, small in size, at a cent each, do also pay the printers' bills, &c.

THE OREGON PILLS are of two kinds, one Anti-Dysentery, the other Anti-Bilious—are made by JOHN RAYMOND, and sold by Phelps, Durham, Osterhouts, Tunkhannock; Goodenier, Nicholson, A. C. Smith, Esq.; H. Elsworth, Sterling, Washington; C. Sturdevant; A. Knapp, Springville; L. C. McKeon; Gulick, Falls; Swarwood, D. Austin, Northumberland; Benjamin & Gardner, Exeter; H. Woodhouse, New York; Gildersleeve, Wilkesbarre; Benedict, Pitts ton; Winton, Providence; Gardner & Co Abington; Wells, pondaff; Babcock, Dimock

A Universal History. FROM THE INFANCY OF MAN, KIND TO THE PRESENT TIME. By G. C. HEBBE L. D. Now ready, 1st volume bound in cloth. Price \$1 75—and to be continued in monthly parts, until finished, five numbers forming a volume, 25 cents per number.

The author of this work seems to have had in constant view the celebrated treatise of Lucian—"How a history ought to be written." Truth in its serenity, and reason in its manly state, are the chief Muses and graces to which he has done obedience. What a different view has been opened to us of the state of nations of by-gone ages, from that which has been presented to us by other historians. No wonder that the numbers already issued met with a large sale, and have been hailed by frequent laudatory notices of the press, of which a few abridged extracts here subjoined. [From the Democratic Review.] This beautiful octavo—the first volume of Dr. Hebbe's Universal History—forms the initial volume of a new and greatly improved work, devoted to the history of the Universe, based not merely upon the usually received data of former historians but derived from the best authorities, attested by revelations of modern discovery. The recent researches in archeology by Chevalier Bunsen, and other learned investigators, among ancient monumental records, have so entirely changed the aspect of primitive times and revealed so many important new data, that the wonder has been not that such a work as the present should make its appearance but rather that the task should not have been before attempted in Europe. From a somewhat careful examination of this volume, however we find no cause to regret that the theme should have been reserved for the judicious and laborious press of Dr. Hebbe. To such as cannot command the leisure for more systematic course of study, this work proves eminently important and valuable, since, when completed; it will form a compendious library of universal history, the most accurate and complete extent, and written up to the spirit of the age. [From the N. York Tribune Sept. 23.] In regard to the literary execution of this work, we have spoken as the numbers appeared but not as fully as its merits deserve. Now, on re-examination, we hesitate not to pronounce that this volume, as a history of the earliest period of mankind has no rival in any single work of universal history in the English language. [From Graham's Magazine.] The author of the Universal History, now in publication, judging from the portion of it already published, is equal to his task. He comes to it prepared by twenty years of study, and a familiar acquaintance with all the necessary authorities, not only those to whom we look for solid records of facts but those who have gone beneath the surface of events, and tracked the source of political convulsions by a thousand pulse back to the hidden heart of some great principle. [From the Boston Transcript.] Dr. Hebbe, by availing himself of the light which the Egyptian hieroglyphs and other investigators of antiquity, have shed on the earliest history of man, by means of his vast erudition enabling him to avoid the errors of compilers, and to draw from the original and most unquoted sources of authority; and by his acute judgment, his liberal philosophy, his deep sympathy with humanity, and his enthusiastic love for his favorite study has produced what may be termed in many respects an original history of the infant nations of the world. The work is written in the most enlarged and liberal spirit, while the author rejects the superstitions of the ancient priesthood, he is a stout defender of the immortal and sublime truths of Christianity. [From the New York True Sun.] The style of Dr. Hebbe, though writing in a tongue foreign to him, is always flowing and animated, sometimes picturesque, and sometimes even eloquent and sublime. This work appears in monthly numbers—seven numbers now ready. A liberal discount to the trade. Sent by mail to any part of the country. DEWITT & DAVENPORT, Tribune Buildings, Nassau street, New York.
