SALERATUS

Which is the same thing.

Impure Saleratus or Bi-Carb Soda which is the same it hing; is of a slightity dirty white color. It may appear white, examined by itself, but a COMPARISON WITH CHURCH & COYS "ARM ANDHAMMER" BRAND will show the difference.

See that your Saleratus and Baking Soda is white and PURE, as ahould be ALL SIMILAR SUBSTANCES used for food.

A simple but severe test of the comparative value of different brands of Soda or Saleratus is to dissolve a dessert spoorful of each kind with about a plut of water (hot preferred) in clear glasses, stirring until all is thoroughly dissolved The deleterious insoluble matter in the interior Soda will be abown after settling some twenty minutes or sooner, by the milky appearance of the solution and the quantity of floating flocky matter according to quality.

Be sure and ask for Church & Co.'s Soda and Saleratus and see that their name is on the package and you will get the purest and whitest made. The use of this with sour milk, in preference to Baking Powder, saves twenty times its cost.
