He was born July 16, 1798, and educated at the Lyceum of Zarske-Salo. His first diplomatic service was

Selo. His first diplomatic service was at the European conferences of Laybach and Verona, the first of which was called to settle the affairs of Italy, in 1821, and the second called to settle the disturbed condition of Turkey and Spain, and check the progress of revolution in Europe. This conference sat in 1822, and in 1824 Gortchakoff was appointed Secretary of the Russian Legation in London. In 1830 he was made Charge d'Affairs at Florence, and two years later Councellor of the Embassy at Vienna. In 1841 he negotiated the marriage between n Crown Prince of Wurtemberg and the Russian Grand Duchess Olgo, and five years later was raised to the post of Privy Councillor. In 1850 he went as Plenipotentiary to the German Diet at Frankfort and in should be well corked. 1854 was sent as Ambassador to Vienna. He earned distinction for his of the envelope.

Whether your home be large or Whether your home be large or small, give it light. There is no house so likely to be unhealthy as a dark and g'oomy house. In a dark and gloomy house, you can never see the dirt that pollutes it. Dirt accumulates on dirt, and the mind soon learns to apologize for this condition because gloom conceals it. Flowers will not healthily bloom in a dark house; and flowers are, as a rule, good indices. We put the flowers in our windows that they may see the good indices. We put the flowers in our windows that they may see the light. Are not our children worth many flowers? They are the choicest of flowers. Then, again, light is necessary in order that the animal spirit may be kept refreshed and invigorated. No one is truly happy who in waking hours is in a gloomy who in waking hours is a gloomy who in waking hours is in a gloomy who in waking hours is vigorated. No one is truly happy who in waking hours is in a gloomy house or room. The gloom of the prison has ever been considered as a part of the punishment of the prison. It is so. The mind is saddened in a home that is not flushed with light, and when the mind is saddened the whole physical powers soon suffer; the heart beats languidly, the blood flows slowly, the breathing is imperfect, the oxidation of the blood is reduced, and the conditions are laid for the development of many wearisome and unnecessary constitutional failures and sufferings. Once again, light, sunlight I mean, is of itself useful to health in a direct manner. Sunlight favors nervous function; sunlight favors nervous function; gunlight sustains, chemically or physically, the healthy state of the blood. DR. CULVERWELL'S CELEBRATED ESSAY on the radical cure
(without medicine) of SPERMATORRHGA or Seminal Weakness, Involuntary Seminal Losses, IMPOTENCY, Mental and
Physical Incepacity, Impediments to Marriage,
etc.; also, Consumption, Epilepsy and Firs,
induced by self-indulgence or sexual extravagrance, &c.

The celebrated author, in this admirable Essay, clearly demonstrates, from a thirty years's successful practice, that the alarming consequences of self-abuse may be racically cured without the dangerous use of internal medicine or the application of the knile; pointing out a mode of care at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately, and radically.
