WHAT CONTAINS.

astonishing or frightening, as the populations are superstitious or cultivated.

These showers are simply silicious particles whipped up to the superior regions of the atmosphere, and driven along by aerial currents. Such particles have been lifted in Guiana and showered on New York, the Aggree and France as the standard of the world who begins to the superior regions of the atmosphere, and driven along by aerial currents. Such particles have been lifted in Guiana and showered on New York, the Aggree and France as the superstitute of the superior regions to the superior regions are superstituted in Guiana and showered on New York, the Aggree and France are the superior regions to superstitute of the superior regions pheric currents are ever charged with ico the crests of mountains act as veritable bars, and compel the deposi-tion from these air streams of the dust,

a trace of saline matter and that a sea breeze carries far inland. Space contributes as well as earth and ocean to the production of aerial dust. When meteorites and falling stars are rendered luminous and incandescent by their rubbing against strata of air in their vertiginous flight, they part with quantities of their metallic elements in the form of powder, iron, nickel, and cobalt, substances that Nordenskjold has gathered on the virgin snow of the has gathered on the virgin snow of the

The air is a vast storehouse of animalcules. Expose a solution of some organic substance to the atmosphere for twenty-four hours, it will be speedily inhabited by mysical and in extreme cases thirty days. Seven days are about the average in which a cure can be effected.

DO SHARKS HARBOR THEIR

YOUNG? for twenty-four hours, it will be speedily inhabited by myriads of infusoria, rolling and tumbling, yet so small that hundreds of them if placed in a row would not form a line in length. These worms resemble little eels. Analogous animalcules induce decomposition and fermentation, for the latter cannot take place unless the organic matters be in contact with the organic matters be in contact with the air to receive the seed of the leaven.

carbolic acid or other antiseptic; then dressing it with a wadding that will intercept, by acting as a filter, the germs to be deposited, from being salt water again, and in due time been big enough to give some unfortunate fisherman considerable trouble." The specimen measured six feet eleven inches in length, and was captured in

a school of moss bunkers or menha-In many factories workmen become victims to the dust, generated by their special industry, entering and saturating the lungs. On dissecting old colliers, their lungs after forty years' respiration of dust, instead of being rose colored as in health, were as black as the coal itself. The dust in this impalpable form is often the cause of accidents; it can take fire and blaze

CALIFORNIA VINEYARDS.—The average of vines in California is officially rated at about 60,000 acres, and it is thought that from six to eight thousand acres or more will be planted to vines this year. If the entire grape crop were made into wine the yield in ordinary years would exceed 25,000,000 gallons. The actual wine product during the past five years has ranged between 4,000,000 and 6,000,000 gallons, the smallest yield falling in 1878. The possible yield in wine is lessened by the large distillation into brandies (about 250,000 gallons a year) the (about 250,000 gallons a year) the production of sweet wines, the consumption of grapes for table use and export to the Eastern States, and finally by the manufacture of raisins.

The production of sweet wines, the consumption of grapes for table use and export to the Eastern States, and finally by the manufacture of raisins.

o00,000 gallons.

The friends of a murdered man in Texas played a very sharp ruse to avenge his death a few days ago. They simply gave out that the murderer was a horse thief, whereupon a crowd collected and hanged him upon the first limb.

Over the summits of the high mountains of the latter county the atmostains of the latter county the l noble horse .- Honesdale Citizen, Pa. dilicious powder, and in parts of Mex-The claims of Dr. Unger for a rem

tion from these air streams of the dust, and which accumulate in the valleys to the depth of ninety yards. Geology recognizes these atmospheric deltary and authority as the Chicago Tribune for the evidence. Mr. Joseph Medill, the editor, is said to be against the coast is pulverized into feathery pellicles, which float skyward with a trace of saline matter and that a sea breeze carries far inland. Space

Remedy—Take one pound of best, fresh, quill red Peruvian bark, powder it, and soak it in one pint of diluted alhas gathered on the virgin snow of the Polar regions. When atmospheric dust, whether collected directly on a sheet of paper, or from the sediment of snow and rain, is probed by a magnet, the tiny particles of iron attracted have all a spheroid family likeness, resembling furthermore iron filings if melted in a flame of hydrogen, or the extinguished sparks that fall on striking an ordinary flint and steel. Nay more, similar atoms of meteoric iron have been traced in the Lower Lias formation, geology thus affording evidence, that as now, so before the appearance of man on earth, atmospheric dust existed.

The third day take as previous, but reduce the dose to one-half teaspoonful. Afterward reduce the dose to fifteen drops, and then down to ten, and then down to five drops. To make a cure, it takes from five to fifteen days, and in extreme cases thirty days. Seven days are about the average in

been dead more than seven hours. From the immense size of her stomach is the whole mass.

It has lately been shown that the process of nitrification in certain soils is due to a peculiar ferment, that is to say, to a spore floating in the atmosphere, and finding its conditions for action stops and operates.

Marsh fever is due to cellules or spores existing in a bog neighborhood. The same spores have been detected by the microscope in the expectorations of the patient, in the dew that was examined, and on the surface of the peaty soil where they were generated. This is simply poisoning. To a like cause is due the fell disease known as hospital gangrene; the germs in the polluted ward atmosphere enter the wounds, induce putrefaction and death. Hence the importance of washing the affected part with dresholic acid or other antiseptic; then dressing it with a wadding that will

impalpable form is often the cause of accidents; it can take fire and blaze like alcohol. Witness the catastrophe at the Minneapolis flouring mills; the confined air highly charged with the flour became on a par with ether or alcohol, awaiting only ignition from the heated millstone to burst into flame and explode.

decision to that effect has just been rendered by the Supreme Court of that State in the case of the State vs. John Jackson and Love Ann Jones, from New Hanover. MILLING SUPERIOR

BOOS

Proprietors of the Well-Known Splendid

BUTLER, PA.

We wish to inform the public that we have remodeled our Mill with the latest improved

Gradual Reduction System Machinery, which is well known by Millers to be the best in existence. We can say to Farmers and Producers of wheat that it will be profitable to them to give us a trial. We claim that we can make a

BETTER ARTICLE OF FLOUR, AND MORE OF IT, of the same number of bushels of wheat than any other Mill in the

county, and equal to any first-class Mill in the city, or Western Mills. The new Under-running Mill, used for Regrinding, bought of Munson & Bro., Utica, N. Y .; the George T. Smith Middlings Purifier, bought at Jackson, Mich., together with Bolting Cloths, Reals, Conveyers, &c., suitable for the Machinery, cannot be

Excelled in the United States

or elsewhere. This may seem an exaggeration to some, but we wish the pub lic to know that we are able to perform all that we publish, as we have given our machinery a thorough test in the presence of several good Millers and Millwrights, and it has proven even better than it was guaranteed to do. We are also remodeling our Mill for

Grinding Other Kinds of Grain, which will be entirely satisfactory to our customers. Farmers wishing to have their grist home with them the same day, can do so on short notice. They will thereby save another trip.

WE HAVE ALWAYS ON HAND THE BEST GRADES OF WHEAT FLOUR, GRAHAM FLOUR, RYE FLOUR, Buckwheat Flour, Bolted and Unbolted Corn Meal, different kinds of Chop, Bran and Mill Feed, all of the best quality and at the

LOWEST PRICES. Parties in town purchasing from us will have their orders promptly d to and articles delivered at their place of residence.

We Pay the Highest Market Price for all Kinds of Grain.

A PURELY VEGETABLE REMEDY For Internal and External Use,

Is a SURE CURE for all the Diseases for which it is recon and is ALWAYS PERFECTLY SAFE in the hands of

It is a sure and quick remedy for COUGHS, SORE THROAT, CHILLS, and similar troubles; affords instant relief in the most multiment forms of DIPHTHERIA, and is the best known remedy for RHEUMATISM and NEURALGIA. THE GLDEST, BEST, AND MOST WIDELY KNOWN FAMILY MEDICINE IN THE WORLD.

It has been used with each wonderful success in all parts of the world for CRAMPS, CHOLERA, DIARRHEA, DYSENTERY, and all BOWEL COMPLAINTS, that it is considered an unfailing cure for these diseases. HAS STOOD THE TEST OF 40 YEARS' CONSTANT USE IN ALL COUNTRIES AND CLIMATES. It is RECOMMENDED by Physicians, Missionaries Ministers, Managers of Plantations, Work-Shops, an Factories, Nurses in Hospitals—in short, by Everybody everywhere who has ever given it a trial.

IT IS WITHOUT A RIVAL AS A LINIMENT. It should stways be used for Pain in the Back and Side, and brings epecdy and permanent relief in all cases of Bruices, Cutes, Sprains, Severe Burns, Seadlas, etc.

NO FAMILY CAN SAFELY BE WITHOUT IT. It will annually save many times its cost in doctors' bills, and its price brings it within the reach of all. It is seld at 25c. 50c. and S1.00 a bottle, and can be obtained from all druggists.

JOHN H. FRENCH, LL. D., PRINCIPAL.

CANCER.

This disease like many others is regarded as incurable. It is not so. If it is taken in time it is as easily cured as a wart or a corn. We know very well that it is a fearful disease and will eat away until it destroys life, that is if it is neglected, but if it is attended to when it first makes its appearance, or soon after, there is no trouble in eradicating it from the system. Persons will have to be here during part of the treatment, consequently there is no use writing to me for information whether it can be cured without my seeing the case. I also treat with success, Rupture, Piles, Fistula, Ulcers, Ulcerated legs, Varicose Veins, Varicoccle Tumors, Hydrocele, and every form of Skin Disease.

A NEW DEPARTURE! BEST PLOW IN THE WORLD! THE SYRACUSE CHILLED PLOW CO.

of Syracuse, N. V.

Are now putting on the market a Plow that is as much superior to any Plow heretofore made as the Plows of the past few years have been superior to those made half a century

It obviates all the objections made to any It obviates all the objections made to any other Plow.

In addition it embraces several new features of the greatest value, for which we have obtained exclusive Patents.

Its Beam, Clevis, Jointer Standard and Wheel Standard will be STEEL, and its moid board will be a composition of Steel and Iron chilled under a process for which we have also obtained an exclusive Patent. It will be called

THE SYRACUSE CHILLED STEEL PLOW

Its weight will be eighteen pounds less than Its weight will be eighteen pounds less than our present styles.

A first-class Steel Plow, made in the ordinary way, full rigged, retails for twenty-two dollars. Inferior Steel Plows retail from sixteen to nineteen dollars.

The price of our new Plow will be but Seventeen Dollars, and it will be the cheapest Agricultural Implement ever sold. Its mold board will outwear three of the very best kinds of the ordinary steel mold boards.

and all other plows have hitherto and all other plows have nitherto proved a failure.
With this Plow will be introduced a corrugated Plow Point and Jointer Point, on which we have also obtained a Patent, and which is also a great improvement, both as regards strength and wear.
The Jointer can be shifted so as to take more or less land, and also more or less pitch, and it can always be kept on a line with the Plow.

The wheel will run under the beam or one side of it as desired, and always kept in line.

The beam is adjustable for Spring or Fall Plowing, and also for two or three horses.

The handles can be adjusted to accommodate a way or boy on the same Plow.

The beam is adjusted for Spring or Fair
Plowing, and also for two or three horses.

The handles can be adjusted to accommodate a man or boy, on the same Plow.

It is a perfect Plow.

Wooden beams are going out of use because they shrink, swell and warp, and never run two seasons alike.

Iron beams are too heavy.

Malleable beams become demoralized and bend, which is much worse than to break.

A Steel beam is the necessity of the day. It is three times as strong and very much lighter than any other style.

When we say a Mold board is chilled, the farmers know it is so.

We do not palm off on them a composition of various metals and call it chilled metal.

We want agents for this new Plow in every town in this State.

We can give but a very small discount to them, but we will pay the Railroad Freight.

We propose to place this Plow in the hands of Farmers as near the cost of manufacture as possible.

as possible.
It will be the best Agricultural Imp It will be the best agraculture.

It shall also be the cheapest.

Persons therefore who are not willing to act as agents on the principle that "a nimble sixpence is better than a slow shilling," need not apply for an agency.

No Plows on commission. All sales absolute.

This is the only Steel Chilled Plow in the World.
Steel costs several times more than Iron.
But this Plow, full rigged, by giving small discounts, can be sold for Seventeen Dollars.
Compare this price with that of any Iron Plow ever made.

It is cheaper than any other Plow now made would be at five dollars and a haif.

Where there are no agents we will, on receipt of Seventeen Dollars, send a Plow to any Railroad station in the State and pay the
