Among the languages of civilized nations English is the most widely spread. It is the mother tongue of about 80,000,000; German of between 50,000,000 and 60,000,000; French of petween 49,000,000 and 50,000,000; Spanish 40,000,000; Italian of 28,000,000,000, and Russian of between 55,000,000 and 60,000,000. In Bavaria, out of 1,000 children born alive, there died, flegitimate children, 248 boys and 212 girls; of illegitimate, 361 boys and 342 girls. Out of 100 children suckled by their mothers, only 18.2 died during the first year; of those nursed by wet-nurses, 29.33 died; of those artificially fed, 60 died; of those brought up in fed, 60 died; of those brought up in institutions, 80 died in 100. Taking 1,000 well-to-do persons and another 1,000 of poor persons—after five years there remained alive of the prosperous, 943; of the poor, only 655. After 50 years there remained of the prosperous, 557; of the poor, 283; at 70 years of age there remained 235 of the prosperous and of the poor, 65. The average length of life among the well-to-do was 50 years, and among the poor, 32 years.

The effects of professions and trades on mortality is great, the term of life varying from 65 years 11 months for ciergymen to 40 years and 10 months for lithographers and copper engravers. In England, according to the census office statistics, the duration of life has been found most defective among the steel workers, polishers, and grinders; and next to these the life of the collier—that fearless delver in the bowels of the earth—is least secure, owing greatdoubt, to the cocurrence of acci-

False Reasoning. Suppose a machine should fail to perform its work, and the owner, inperform its work, and the owner, instead of trying to ascertain the cause of failure and remedy it, should conclude to run right along, and argue that as the machine had heretofore come around all right it would soon be so again. If a general and permanent break-down ensued could any body be blamed but himself? Now, precisely this way do people act and argue when the "human machine", is out of order. When the liver is "torpid" and bowels constipated every one knows that Dr Pierce's Pleasant Purgative Pellets afford prompt and permanent relief Yet some guess the "machine" will come around all right, and do nothing. Could any system of false reasoning be more pernicious? Suppose the blood be out of order and there be pimples, ulcers, or running sores with scrofulous tumors, swellings and general debility, and those thus ed should refuse to use Dr. Pierce's affected should refuse to use Dr. Pierce's Golden Medical Discovery, guessing that the blood would purify itself, could any body be blamed but themselves, if a general and permanent break-down of health ensued? No remedy yet known equals the Discovery in curing all scrofulous, throat, bronchial and lung diseases. Sold by druggists.

THE SUN FOR 1881.

Everybody reals The Sun. In the editions of this newspap rethroughout the year to come everybody will find:

I. All the world's news, so presented that the reader will get the greatest amount of information with the least unprofitable expenditure of time and eyesight. The Sun long and discovered the golden mean between redundant fallness and unsatisfactory brevity.

II. Much of that sort of news which depends less upon its recognized importance than upon its interest to mankind. From morning to morning Tub Sun prints a continued story of the lives of real men and women, and of their deeds, plans, loves, hates and troubles. This story is more varied and more interesting than any romance that was ever devised.

III. Good writing in every column, and freshness, originality, accuracy, and decorum in the treatment of every subject.

IV. Honest comment. The Sun's habit is to speak out fearlessly about men and things.

V. Equal candor in dealing with each political party, and equal readiness to commend what is praise worthy or to rebuke what is blamable in Democrator Republican.

VI. Aboolute independence of partisan organizations, but enwavering loyalty to true Democratic principles. The Sun believes that the Government which the Constitution gives us is a good one to keep. Its notion of duty is to resist to its utmost power the efforts of men in the Republican party to set up another form of government in place of that which exists. The year 1881 and the year immediately lollowing will probably decide this supremely important contest. The following are the Directions for Use, so simple that a child can understand them.

Dent do anything so ridiculous as to buy the Soap unless you intend following them. \$3-\$100 positively forfeited if it injures the clothes, or will not do everything claimed. First, put the white clothes in a tub of water, only made warm enough to be comfortable for the hands. Then take one piece out at a time on the wash-board, rub the Soap lightly over it, roll it up and put it back into the same tub, and so on with each piece until all have the Soap rubbed on them. Then go away and let them soak at least twenty minutes, without touching them, when the dirt will all be loosened, and a very little rubbing on the wash-board, out of that one suds, will make them perfectly clean, being particular to turn each piece while washing so as to get at the seams. Then wash lightly on the washboard, through a lukewarm rinse-water (without any Soap,) so as to get the dirty suds out. Then put through blue-water, and on the line, without scalding or boiling a single piece.

Afterward put flannels and colored pieces to soak, and wash them exactly the same way. It is important not to heat the wash-water in a tin, brass or copper kettle. A tea-kettle will heat enough water for a large wash with this Soap.

Just Think What You will Save by this Easy Way of Washing! No Wash-boiler! No Steam! No Smell of Suds through the House! It has the remarkable Property of keeping the Dish-Cloth, Wash-Rag and Sponge always Sweet, and of Washing Freely in Hard Water. Get a Cake and Try it for Yourself next Wash-Day.

To Points where this Soap is not yet Introduced a Trial Cake will be sent by Mail, on receipt of Price, (10 Cents), in Money or Stamps. ADDRESS ALL LETTERS FRANK SIDDALLS SOAP,

THE BEST HEMEUY

FOR

In diseases of the pulmonary organs a safe and reliable remedy is invaluable. Aven's Cherry Pectoral is such a remedy, and no othersoeminently merits the conditions of the public. It is a scientific combination of the pulmonary diseases, affording prompt relief and rapid cures, and is adapted to patients of any age or either sex. Being very palarable, the youngest children take it readily. In ordinary Coughs, Colds, Sore Throat, Brouchitis, Influenza. Clergyman's Sore Throat, Asthma, Croup, and Catarrh, the effects of Aven's Cherry Pectoral are magical, and multitudes are annually preserved from serious filness by its timely and faithful use. It should be kept at hand in every household for the protection it affords in sudden attacks. In Whooping -cough and Consumption there is no other remedy so efficacious, soothing, and helpful.

Low prices are inducements to try some of the many mixtures, or syraps, made of cheap and ineffective ingredients, now oftered, which as they contain no curative qualities, can afford only temporary relief, and are sure to deceive and disappoint the patient. Diseases of the throat and lungs demand active and effective treatment; and it is dangerous experimenting with unknown and cheap medicines, from the great liability that these diseases may, while so trifled with, become deeply seated of incurable. Use Aven's Cherky Pectoral, and you may confidently expect the best results. It is a standard medical preparation, of known and acknowledged curative power, and is as scheap as its careful preparation and fine ingredients will allow. Emiment physicians, knowing its composition, prescribe it in their practice. The test of half a century has proven its absolute certainty to cure all pulmonary complaints not already beyond the reach of human aid.
