A few days since the cook came to us with a glass can of peaches, the cap of which was screwed on so tight that dipped in hot water be applied to the outside of the cap, to cause expansion by the heat. This was done and it so this principle on many other occasions. The ground stoppers of bottles sometimes are found immovably fast. In this case the heat must be applied to the neck of the bottle, so as to increase its size and leave the stopper loosened within it.

Care should always be taken that the ground stopper when inserted is not colder than the bottle neck, for if it is Bll which I desired him to take.

## THAT BIG HORSE AGAIN. The Fredonia (N. Y. ) Advertises

of last Friday contains the following in reference to the big horse which K. H. Stivenson, of Kittanning sold to Mr. W. B. Archibald: "It seems but a few days since W. B. Archibald brought to this village from Pennsylvania the very worst looking rack of bones in the shape of a great overgrown horse that was ever seen in this part of the country. Even Joel Hoyt, the great horseman of Jamestown, was heard to remark to Archibald. 'For heaven's sake, kill him.' Mr. A. replied, Joel, I can see something in that horse.' Last Saturday he did see something, something few country editors ever see—\$1,000. A stranger came to town and inquired of one of our liverymen, Dwight Dutton, if he knew wh he could buy some large horses to work on the dock in Philadephia. Mr. D. told less to dicker the stranger accep ed the very plainly beard.
