### OUR SIZE.

The New York Herald publishes an interesting outline map of the United States, on which the areas of the different European States are laid out, suggesting at once to the eye the relative size of this country and the countries of the old world lying west of Turkey and Russia. England is as large as New Brunswick, Scotland as Nova Scotia, Newfoundland as Ireland. France stretches from the northern

boundary of Maine to the western boundary of Ohio, and to the southern boundary of Pennsylvania.

Germany could be got into the space lying between the souther boundary of Pennsylvania and New Jersey, the At-Pennsylvania and New Jersey, the Atlantic, the Ohio river, the Mississippi river and the northern boundary of Georgia and South Carolina. Spain is equal in area to South Cariolina, Georgia, Alabama, Mississippi and Louisiana. Italy resembles Florida, both in size and shape Austria would embrage Lake Michigan and the four States between the lakes and the Mississippi river—Michigan, Wisconsin, issippi river—Michigau, Wisconsin, Illinois and Florida. So that the area of the United States cast of the Mississippi, or about three-eights of the total area, is equal to the States of Europe, excluding Russia and Turkey.

A minister said to one of his flock who wept over the financial deficiency in some good Christian enterprise:
'My dear friend, never mind the tears,

This is a good thing to remember. It teaches its own lesson.

An enterpising rascal drew to New York a young countryman to whom he had agreed to sell \$10,000 in countefeit money for \$300. The young countryman received the counterfeiter in his room at that hotel, got the drop on him with a six shooter, and politely handed hin over to a police officer. It frequently happens that people from the coun-try are not so smart. If the counter-feiter has money which is good enough to pass, don't take any of it from him; let him pass it himself let him pass it himself.

There was joy, on the farm when Ben, the oldest boy, came back from college in his sophomore year and the village was proud of him. 'Cheese it, cully!' he said, when he met an old friend, the son of a neighbor, who joined farms with his father 'Cheese it, cully! Shove us your flipper! Clinch daddles, pardy! It is said that a man can always tell a sensible woman by the heel of her boot. There is the high heel, hooked in under the instep which indicates giddiness, bad taste, and a want of culture; then there is the medium heel, which indicates a desire for fashion and yet an objection to excess; then there is the lady-like small neel, slightly curved, not quite so low as the heel of a man's boot, but yet low enough and placed in the proper position for comfort, that indicates good breeding, good sense and delicacy. Young men should know this and judge according-
