The Citizen

VOL. XVIII. BUTLER, PA., WEDNESDAY, SEPTEMBER 7, 1881. NO. 41

ADVERTISING RATES.

One square, one insertion, \$1; each subsequent insertion, 50 cents. Yearly advertisement exceeding one-fourth of a column, \$5 per inch square.

From the fact that the CITIZEN is the oldest established and most extensively circulated Republican newspaper in Butler county, a Republican country, it must be apparent to business men that it is the medium they should use in advertising their business.

A DOUBLE CRIME.

The wholesale produce and commission store of M. Purvis, on Delaware avenue, near Vine street, was robbed on the night of October 17, 1865. The safe had been apparently opened by false keys, and upwards of \$9,000 in greenbacks were abstracted.

Two clerks, both young men, usually slept in the store. August Yerkes had been in the employ of Mr. Harrison Purvis about four years, and enjoyed the confidence of his employer. Pembroke Sharon, the other clerk, had only recently been taken, but the manner in which he took hold of the business impressed Mr. Purvis so much in his favor that he predicted a successful future for the young man as a very able salesman and ultimate prominent merchant.

It was conjectured from this that Sharon, having provided himself with false keys, had opened the safe and had been surprised by his fellow clerk in the midst of his work, who in turn dealt him the blow near the temple, and then, after a severe struggle between them, Yerkes fainted from loss of blood and the robber fled with his booty.

Yerkes, the detective, and a physician, on one sent for, as while Dr. Edson tended the patient, the detective examined the premises with his usual carelessness, particularly the second floor, and returning to the lower floor that Yerkes had recovered and sat in an arm-chair with a bandage around his head.

Yerkes gave the following account: 'Not finding him on the second floor he descended to the first floor, and discovered him before the open safe. They saw each other at the same moment, and Sharon, who fell faintly, was discovered in his criminal act. The began the struggle, the evidence of which was so plainly evident, Sharon, being the stronger of the two, soon overpowered his opponent, and threw him so violently on the floor that he became insensible.'

While the doctor was applying restoratives to his charge the detective drew Mr. Purvis away to the rear of the store and remained there for half an hour in conversation with him, and judging from the frequent exclamations he must have been greatly astonished at what the detective told him.

'Retain the articles, Mr. Purvis and restore the clothes to the closet,' said Varnoe. 'I have another surprise in store for you, I think.'

INDUSTRIAL SCHOOLS.

The subject of industrial schools is one which is deservedly engrossing much public interest at the present time. The Senate of this State has twice passed a bill for the establishment of iron industrial schools, but the House failed to take concurrent action.

Some seventy years ago the desire and necessity of common education brought about in this State, by the law of progressive development, a system of education known as the common-school system. It cannot be maintained that by the progressive development of that system many public benefits have accrued.

The United States are overrun with statesmen, politicians and professional men of all colors and grades; and when any of our great manufacturing firms are in need of skilled mechanics they cannot get them here, but must advise their foreign agents to import skilled labor from England and Germany.

It is by the arts, sciences and mechanics of foreign States and countries that their wealth becomes visible and their industries known. It is not by reason of the huge stone and immense Pyramids of Egypt that it is well and favorably known among the countries of the world, but it is by reason of the art and science employed by the Egyptians in dressing that stone and building those Pyramids.

INTERESTING TO FARMERS.

Take the Lehigh Valley. About 600,000 tons of pig iron are manufactured there every year. One furnace in the city of Allentown makes more pig iron than the whole State of Massachusetts, yet in that State there are more mechanics than in the State of Pennsylvania, where one-half of the pig iron manufactured in the country is produced.

Many believe that horses are injured by the use of blinds, especially when they are allowed to stand close to the eyes. So by the check-rein. One writer demands the interposition of a Bergh to prevent this most cruelly-premeditated wrong and cruelty to a noble animal.

The following rules for judging a horse, says the Turf, Field and Farm, will be found useful: 1. Never take the seller's word; if dishonest, he will certainly cheat you.

A dog fight sends the pulse of a village up to 130, and a foot race or a knock down will almost restore gray hairs to their original color; but for real excitement, let a man come along in front of the tavern about sundown driving a hog.

There is scarcely any other branch or department of live stock breeding that pays as well as sheep-breeding, when properly managed, and it seems strange that more of our farmers do not give it at least a fair trial.

There is scarcely any other branch or department of live stock breeding that pays as well as sheep-breeding, when properly managed, and it seems strange that more of our farmers do not give it at least a fair trial.

MANAGING AND JUDGING OF HORSES.

If a colt is never allowed to get an advantage, says a writer in the Lancaster Farmer, it will never know that it possesses a power that man cannot control, and if made familiar with strange objects, it will not be skittish and nervous.

Many believe that horses are injured by the use of blinds, especially when they are allowed to stand close to the eyes. So by the check-rein. One writer demands the interposition of a Bergh to prevent this most cruelly-premeditated wrong and cruelty to a noble animal.

THE PRESIDENTS STRUGGLE FOR LIFE.

WASHINGTON, August 30.—As hope returns, more is learned in detail of the terrible anxiety of last Friday. It appears that the surgeons, after the alarming symptoms of the morning, decided that it was useless to continue the struggle, and two of their number were selected to wait upon Mrs. Garfield and to inform her that medical science could do no more, and that she must prepare for the worst.

The best cows are those which give the largest returns for the food consumed, whatever the breed, size, color, or pedigree. Poultry will produce more flesh—pound for pound of food—than the steer, sheep or hog, and is meat of the tenderest quality compared with the others.

The following rules for judging a horse, says the Turf, Field and Farm, will be found useful: 1. Never take the seller's word; if dishonest, he will certainly cheat you.

UNCLE RUFUS' ANECDOTE.

'Anything new?' a representative of the New York Commercial asked Uncle Rufus.

'No,' was the reply, 'the usual bulletins from the White House come to me. The stock market is a little down and little up, and vice versa. The stock market reminds me of a little story told me by a Judge of this city some years since on the train to Washington.

'Well, one day Mr. Greeley told his six feet of height, and he put into his room, as he was going to write his editorial; and it came to pass that this same day Vice President Wilson called and desired to see Mr. Greeley without delay.

'What has all this to do with the stock market?' the reporter questioned.

'Why, don't you see, young man, somebody has handcuffs on and cannot sell. The parties who have been buying stocks so freely are what are known as the Lambs, who cannot read nor write.'

'Suppose you tell me who the Judge was that regarded you with this amusing story.'

'I'll tell you this much: It was not Judge Noah Davis, though we have been friendly these forty years; and it was not Judge Brady,—he never told a story in his life,—he gets John C. Wyman to do all that kind of business for him. Really, young man, I don't like to tell the Judge's name—it might make him blush to see his name in print; but this is a true story, and if you don't believe it, you just ask Amos Cummings.'

TONIC, ALTERNATIVE AND CATHARTIC.

Simmons Liver Regulator, purely vegetable, is an unpleasant taste to the tongue, but is generally used in the South to arouse the torpid liver to healthy action. It cures malaria, biliousness, dyspepsia, headache, constipation and piles. The action of the Regulator is free from nausea or griping. It is most effective in starting the secretions of the liver, causing the bile to act as a cathartic.

There is scarcely any other branch or department of live stock breeding that pays as well as sheep-breeding, when properly managed, and it seems strange that more of our farmers do not give it at least a fair trial.
