Dispatch. —Gen. Grant's pastor, the Rev. Dr. Newman, suggested in his last Sunday's dis-course that "the generally accepted fact that women are more pious than men may possibly be attributed to the afternoon visits of the pastors." There is certainly no lack of cleri-cal assurance in this claim. Perhaps it makes some difference who the pastors and the women are, whether these afternoon visits are provoc-ative of piety.

Some of the members of Con-gress presented bills for expenses incurred in attending the funeral. The railroad companies alone refused to send in bills.

-According to some statistical ta-bles which have been prepared in Vienna-Great Britain has more breveries and produces more beer than any country in the world, Ger-many not excepted. The figures are:-Eng-land, 26,144 breveries, with an annual produc-tion of over one thousand million gallons; Ger-many, 23,940 breveries, producing eight hun-dred million gallons. The United States are credited with 3,293 breveries and a production of three hundred million gallons, or six gallons a year for every man, woman and child in the country. France has 3,100 establishments of this character; Belgium, 2,500; Austria-Hun-gary, 2,297; Holland, 560; Russia, 460; Norway and Switzerland, 400 each. Denmark and Swe-den have each 240. This gives a total of 63,544 breweries in Europe and the United States. These are disheartening figures for the the tem-perance and prohibition people, but they will serve to show them how much reform work there is to be accomplished in the world. -Beaver is much excited over the

Beacon, a former resi-dent of that place, has been sentenced to hang for murder in Texas. Beacon is thirty years of age and has a very interesting history. He gradnated at West Point in '72 and was ap-pointed Second Lieutenant to a colored regi-ment in Texas. He was expelled for drunken-ness. Through the influence of Col. Quay, Secretary of the State of Pennsylvania, he was appointed to a minor position in the New Or-leans postoffice, remaining there a short time and, by the aid of Quay, was appointed an as-sistant United States Marshal in Seuthern Texas, and, at the same time, it is said, was acting as leader of a gang of outlaws assisting to rob mail coaches and personally committing several murders. About four years ago he was tried for murder and acquitted. Last Septem-ber he was again arrested on the same charge, found guilty, and sentenced to be hung. Bea-con's father was a well known Methodist min-ister, now dead. —At the meeting of the Board of Justices of the Peace, The following is a list of the Justices of the proceedected in those boroughs and townships in which vacancies existed at the late election : Adams twp., A. -As a remarkable winter is near its close, the curious are beginning to inquire of J the weather wise what the summer is going to be like. The inquiry is made the more urgent in that the astrologists say that the relative positions of the planets will be such during the summer as to affect the earth's atmosphere, the theory being that heat will be so reflected in these planets as to evaporate the moisture and preven rain. But a signal service man scoffs at this and maintains that there will be planty of rain next summer, because the last was a dry one. seldom that one dry summer follows another. —Mr. Lewis Anderson, of Butler township, aged 35 years, died suddenly, on Monday morning of last week. He had been troubled with hemorrhage for some years, caus-ed by working in the slovel works, at Beaver Falls, where he inhaled small particles of steel, and on the morning he died had a severe attack in bed at about five o'clock. He jump-ad out of bed and went to the door to get air, and almost immediatly dropped dead, his blood gushing out of his mouth and nose. He was a son-in-law of Gideon Slagle, lately deceased, and was one of the administrators of his estate. 1882, at the parsonage, by Rev. R. A. Gilfillan, Mr. Jas. A. Thompson and Miss Emma E.  —The latest suggestion regarding

-The latest suggestion regarding --The latest suggestion regarding Polar exploration is that a telegraph cable be dropped as the vessel proceeds north-ward. By means of this cable, says a writer in the New York Herald, telegrams could be sent for days at a time without disturbing the instruments; and should destruction come to their ship as-sistance could be sent them and they could be advised what to do, stating their positions. Whoever conceived this idea ought to know, if he is not one of the great army bf cranks, that laying the cable would be as much as the ship could attend to without searching for the pole; and when she reached the ice fields there are ninety-nine chances in a hundred that cable-laying would come to an end. And then, the expense of such an undertaking would out-weigh the value of the whole unexplored top end of the earth --The treatment which the Fisk

Big Results From Little Causes,

'Do you know?' remarked a man to his friend on Chestnut Street, a day or two since, 'I believe both Conkling and Platt had a bad case of skin diseas when they resigned !' 'What makes you think so ?' inquired the listener in astonishment. 'Well, you see they acted in such an eruptive manner-so rash-ly as it were. Save ? 'Oh ! yes, I save,' replied the other, 'they were boil-ing over and merely resigned to humor themselves, I suppose.
