Mrs. S. A. Sloan has returned from New York with the finest assortment of millinery goods ever brought to Butler. Cunningham St., near the Post Office. The Maher farm and stock in Buffalo township was sold last Tuesday. The farm was bought by Mr. Wakeham, of Tarentum, for \$1760, subject to mortgage of eleven hundred dollars with eight months interest. The assignee has been very successful thus far in putting things in shape and will make the most out of the wreck for the creditors.

A few days ago a cow died in Tioga county, and upon examination an axe was found in the animal's stomach. This they were not permitted to do. They then asked for something to eat, and were given food. Three other men besides the farmer were in the house, and the tramps concluded it would be unsafe to push their demands further. Three formidable cudgels were found near the house next morning. The same gang pilaged two or three neighboring spring houses along the road, and at one place shot a dog that interfered with them. Farmers and others cannot be too cautious in keeping this class of tramps out of the house.

Mr. Walker of Butler has taken a ten acre lease, and will put down a well on the same farm. Kerr McBride's well on the Gruver farm was down 650 feet last Saturday, but getting salt water below the casing, which necessitates taking the casing out and reaming the hole to below where the water comes in, will retard him for some days. The Phillips Bros. well at Renfrew's bridge is down over 500 feet and may now be the first completed. The Phillips Bros. will also start a well immediately on the McJunkin place, east of town, and have leased the Vogley and other farms in that vicinity.

A remarkable discovery in regard to that fearful disease, consumption, is alleged to have been made by Dr. Koch of Berlin. He states that tubercles from diseased lungs are invariably infested with a minute parasite, which he has been able to transfer, by inoculation, to healthy animals, never failing to bring on the disease. The importance of destroying immediately all matter expectorated by consumptives, and of otherwise avoiding scattering the infection, can hardly be exaggerated, in view of these facts. And Dr. Koch hopes to confer an unspeakable blessing on mankind by devising the means of inoculating some harmless form of the disease, so as to protect the patient from consumption, exactly as vaccination protects us from small-pox.

Fatal Accident in Jefferson Township. Mr. Charles Bunting, son of Jackson Bunting, of Penn township, met his death at the raising of the barn of his brother, Henry Bunting, in Jefferson township, last Wednesday afternoon. He and two other young men, Great Hall and Graham Fitzsimmons, were standing on part of the threshing floor of the new barn, while some others were putting in place the roof timbers immediately over their heads. By some means the end of a log, about seven inches square and lying across the top from the tie to the jarred from its place, when it fell and struck Mr. Bunting on the left side of his head, crushing it so badly that he died a few minutes later. It had rained that day and the logs were wet, which was, perhaps, the cause of the log being moved out of its place so readily. Mr. Bunting was about twenty years of age. He was a very excellent young man and his death is much lamented by all who knew him.

Lister's Standard Fertilizers. All farmers and florists, are unanimous in the opinion that stable-manure is by no means the only good fertilizer for general use. One of the oldest and most popular manufacturers of such fertilizers is Lister Brothers, of Newark, New Jersey. They are known in every section of the country as reliable and responsible business men, who have by fair and honorable dealing in pure fertilizers secured a high reputation. We have never known or heard of a single variety of complaint in regard to them from any quarter. They are probably the largest dealers in home products in the country, which are now used in immense quantities by them in the manufacture of bone-meal and Bone. Their sales of bone to other manufacturers are very large in the aggregate, and from these sources they are enabled to produce their fertilizer like home-made and Bone, is becoming more and more popular with the people. The Messrs Lister Brothers have had their fertilizers tested so long, in so many ways that they know and affirm that they are certainly equal to the best in the market. Chemicals have been used, and this has benefited the Messrs. Lister Brothers. It may be proper to say that we have written about the above with great satisfaction from any quarter and wholly without the knowledge of the worthy firm to which we refer. The agents in Butler for the excellent fertilizers manufactured by this firm, are G. WILSON MILLER & BRO. Opposite Lowry House, Butler, Pa.
