Egyptian Soldiery. A not unimportent element in the consideration of the Egyptian question

is the value of the Arab as fighting material. Of the courage of the wretches who beat the brains of so riots, one may judge by an incident which took place in the course of them. On the great square of Alexandria some 200 of these patriotic pro-testors against the rule of the foreigner were engaged in hunting Europeans, when four attendants of the tribunal rushed out of the sanctuary with drawn swords, and the whole 200 took to precipitate flight, leaving the square empty of all but the dead and wounded and the four messengers of justice. Without some firm assurance of mustafiz or nizam it is quite certain that none of the rabble would ever have dared to raise a hand against a foreigner. A kourbash is quite enough for the courage of the Egyptian on ordinary occasion. As a soldier the bloody regime of Mehemet Ali has given him a prestige which, like the "scent of roses," lingers long after the organization is shattered. It is true that once Egpytian soldiers defeated Turkish, but the latter were in a much lower state of dicipline than now, while the former were ruled with a vigor of which the following incident related by a veteran who re-membered Mehemet Ali, will give an example. A milkwoman came to the Pasha one day complaining that one of his soldiers had robbed her of the milk she was bringing to camp. The oldier was identified, and denied having taken the milk. "What did he do with it?" asked the Pasha. 'Drank it," was the reply At a ign the man's head was cut off his body, and his stomach, being opened. was found full of milk. "Go," said the Pacha to the horrified woman,

paying her the value of her milk; but if he had not taken it, your head would have paid for it." Internal Revenue Taxes.

The internal revenue tax discussion was continued in the Senate at Washington, July 20, the pending amendment being to strike out the provisiou repealing taxes on bank capital and deosits, bank checks, drafts, &c.
