The Red Sunsets, Cyclones and Earthquakes Foretelling Coming Disaster-How

to Meet It.

The recent mysterious appearances ollowing sunset and preceding sunrise have attracted wide attention from generally. During the days of recent may share with him immunity weeks the sun seems to have been obscured by a thin veil of a dull leaden hue which, as the sun receded toward then yellow, then orange, then red; himself as perfectly willing to go. and, as night settled down upon the earth, a dull purple. At first it was thought these appearances were ordi-nary sunset reflections of light but it is now pretty certain that they are either the misty substance of the tail of some unseen comet, in which the earth is enveloped, or a surrounding stratum of world dust or very small meteors. Professor Brooks, of the Red House Observatory, Phelps, N. Y., has turned his telescope upon these objects and discovered what he thinks are myriads of telescopic meteors. If it is unorgan

These circumstances recall Professor Grimmer's prophecies that from 1881 to 1887, the passage of the five great planets-Mars, Neptune, Jupiter, Uranus and Saturn-around the sun would produce strange and wonderful phenomena. He says: "The waters of the earth will become more or less noisome odors. Ancient races will disappear from the earth." He attempts to prove his prophecy by the fact that in 1720, when Mars and Saturn made their passage around the their passage around the sun coincidentally, great destruction and mortality visited all parts of the globe. He also found the same results in previous perchelion passages of the planets, and down can it be called a gum drop?

A faint, hot feeling will be succeeded by chilly sensations while hallucinations and dread of impending ill will paralize all effort. "The birds of the air, the beasts of the field and even the fish of the sea will become diseased, poisoning the air and We are told on the other hand that those who shall pass through this period of trial will have larger enjoyment of life and health. The earth will yield more abundantly than ever before. The animal kingdom will be more prolific and life prolonged very materially. This prolongation of life will be owing to the healthy electric and magnetic influences that will pervade the atmosphere. It would per haps seem that the present redness of the sun, and the presence of a belt or veil of mosmic matter, justified, in a measure, the prediction of Professor Grimmer, but disturbing as his prediction may be we are told for our comfort that the strong and pure blooded need have little to fear in these calami-ties, those who are delicate or indisposed should adopt means to keep the system well supported and the blood pure and that the most philosophical and effective method of accomplishing this is to keep the kidneys and liver in good condition. From the testimonials of such men as Dr. Dio Lewis and Professor R. A. Gunn, M. D., Dean of the United States Medical College, New York, and thousands of influential non. professional people, it seems almos certain that for this purpose there is no preparation known to science equal to Warner's Safe Cure, better known as Warner's Safe Kidney and Liver Cure. This medicine has acquired the finest reputation of any preparation that was ever put upon the market. It is a radical blood purifier, which soothes and heals all inflamed organs, strengthens the nervous system washes out all evidences of decay, regulates digestion, prevents mal-assimilation of food in a philosophical and rational manner, fortifies the system against climatic changes and malarial influences and the

destructive agencies which seem to be so abundant in these "evil days." It is not our purpose to dispute the correctness of Professor Grimmer's prophecies. As we have said, the marked disturbances of the past few years would seem to give a semblance of verification of his theory. It is cer-

tain, as above stated, that we are passing through what may be regarded as crucial period and it is the part of wise men not to ignore, but to learn to fortify themselves against the possibilbeing overcome by these evils. It is a duty which each man owes to himself, and his fellows, to mitigate as much as possible the suffering humanty and in no way better can be accomplish this purpose than to see to it that be, himself, is fortified by the best known preparation in the strongest manner and that be exert the influence of his own example upon students from the skies, and the people his fellows to the end that they, too, the destructive influences which seek

fine is soldered on each side of a plate of hard nickel composition metal, and the three are then passed between polished steel rollers. From this plate the various parts of the cases—backs, centers, bezels, etc. are cut and shaped by dies and formers. The gold is thick enough to admit of all kinds of chasing, engraving, and engineturning. The composition metal gives it needed strength, stiffness and solidity, while the written guarantee of the manufacturers warranting each case to wear twenty years proves that it contains all the gold that can possibly be needed. This guarantee is given from actual results, as many of these cases have been worn perfectly smooth by years of use without wearing through
