How Watch Cases are Made.

It is a fact not generally known that the James Ross' Gold Watch Cases really contain more pure gold than many "solid" The demand for these watch cases has led to the manufacture of a very poor grade of solid gold watch casesow in quality, and deficient in quantity. These cases are made from 4% to 10 karats, and a 5 or 6 karat case is often sold for 12 or 14 karats. It is NOT economy to buy a watch case so poor in quality that it will soon lose its color, or one so soft that it will ose its shape and fail to shut tight, thus letting in dust and damaging the works, or one so thin that a slight blow will break the crystal, and perhaps the movement It IS economy to buy a James Boss' Gold Watch Case, in which NONE of these things ever occur. This watch case is not an experi ment-it has been made nearly thirty years. ment—it has been made hearily thirty years.

Hallenon, Pa., Oct. 24, 1882.

I sold two James Boss' Gold Watch Cazes thirty years ago, when they first canne out, and they are in good condition yet. One of them is carried by a carpenter, Mr. L. W. Drake, of Hazleton, and only shows the wear in one or two places; the other by Mr. Bowman, of Cunninghars, Pa.; and I can produce one or both of these cares at any time.
