Some of our citizens took advantage of the excitement on the P. & W. R. R. last Sunday and went to Pittsburgh to hear Minister Capel and witness the ceremonies connected with the laying of the cornerstone of the new Catholic Church at Pittsburgh, on the hill overlooking the Monongahela. A strange and heretofore unknown disease is reported among the sheep in the southern part of Erie county. The afflicted animal comes stamping and will then run at a rapid pace with its head close to the ground. They then refuse food of every kind, but drink large quantities of cold water for two or three days, when they commence running at the nose and die in a short time. It is feared that this is the peculiar malady known as "crab," which has been making bad havoc in Ohio. It is said that the disease is caused by a worm, the eggs of which are already present in the soil in the sheep's nostrils in the summer. The eggs hatch out in the spring and begin burrowing up into the brain, which, when reached, causes death. No remedy is known for the malady.

More Gushers at Bald Ridge.

The drill of Andy Sheddmanite's new well on his strip of the Wallace farm reached the white sand last Saturday evening, when the well began to flow heavily, making 500 barrels during the first fifteen hours. On Sunday it was flowing at the rate of about 300 barrels per hour or 700 per day, and on Monday at the rate of about 350 per day. Drilling was resumed and the well will probably settle down to a 200 barrel pumper. Andy seems to be the lucky producer of the district. A year ago last fall he struck the first big well in this territory, on the Wallace farm, and he now has the second one. This well is about two miles east, or a little north of east, of the Wallace farm well, and seems to settle the direction of the belt. It looks as though the northern tier of farms in Penn township and the southern tier of farms in the Wallace farm struck the oil territory. The Fisher Bros' well on their part of the Wallace farm struck the oil territory Monday evening, filled up with oil, and made two heavy flows that evening and yesterday doing 12 barrels per hour. This well is located about 1 1/2 miles north-east of Sheddmanite's. The Cooper Bros' well on the Pearce farm, and Agnew's No. 7, on the McAlmon farm, are expected to come in this week. The production of this district is now so large that the pipe line pumps at the station there are kept going night and day.
