

THE CITIZEN.

MISCELLANEOUS.

The "Kicker" Man.

The last issue of the Arizona Kicker contains the following articles of interest:

"That paled specimen of an idiot asylum, Judge Hornback, of the adjoining county, made a speech to the people of Loe Jack the other evening, and in the course of his remarks he took occasion to say that the Kicker had no political opinions which money could not buy.

Judge Hornback is an Infernal Liar!

Of the first he lies! He not only lies, but he knows he lies! He not only knows he lies, but he means to lie! He is a villainous deceiver to get even with us because we refused to buy lottery tickets of him!

"The Kicker believes in the motto of 'live and let live,' but when attacked it will defend itself. Judge Hornback has sent it to open the ball we propose to buckle on our armor and prove:

"1. That he served five years in Jail.

"2. That he was tarred and feathered in Indiana.

"3. That he was egged out of Ohio.

"If there is anything left of him after that we will bring up our reserves and convict him of

Arson, Robbery and Bigamy.

"Meanwhile, if the Judge wants to call on us we shall be at home every day in the week."

"Last week a one-eyed greaser from Mexico struck this town with a string gun and cleaned some of our best citizens out of their spurs. He was shipped out just in time to avoid getting a neck-hold on a rope hung over a limb, and no sooner had he gone than there was a wild rush to our office and a general demand that we write

"We declined, and because we declined such epithets as 'alien,' 'coward,' 'tory,' etc., have been flung at us by a bunch of scoundrels. We don't propose to plunge the United States into a long and bloody war to accommodate half a dozen suckers and greasers, and those who don't like our policy order 'stop my paper' will meet with promptness and dispatch."

How to Light a Lamp with a Snowball and the Like.

The National Educator gives the following three curious experiments, which may not be to the professional chemist, but will be of interest to the chemist student.

When a small piece of potassium, the size of a grain of corn, is dropped into a tumbler of water, some of the oxygen of the water leaves its hydrogen, owing to the intense heat which the chemical action produces, and combines with the metallic potassium, causing a violent flame. If a piece of potassium is placed on the wick of a coal oil or alcohol lamp, the flame produced by touching the potassium with a bit of snow or ice or a drop of water will inflame it.

If under water can be produced by placing a small piece of phosphorus in a conical shaped glass filled with water, and some crystals of chlorate of potash covering the phosphorus, and then pouring through a long tube, of glass tube, a few drops of sulphuric acid down on the mixture at the bottom of the glass. Tongues of flame can be seen flashing up through the water. The intense chemical action produces sufficient heat to inflame the phosphorus, and the water. Where there is sufficient heat and oxygen fire will burn, whether in air or water.

The force of steam boiler explosions can be illustrated by getting a tumbler filled with a tumbler of water, and a inch in diameter, and closed at one end. Put a piece of ice the size of a cherry, or half a teaspoonful of water, into the tube and cork the open end tightly. Suspend the tube over a flame, so that the ice melts and is converted into steam. The cork will be forced out with a loud explosion. Candle bombs held over a flame will explode in a similar manner. Water will produce 1,700 times its volume of steam.

Do all the good you can and make as little noise about it as possible.

Wise is the mother who takes the trouble to "dress up" for the children.

The neglect of regular and frequent bathing in winter, favors colds and congestive diseases.

A small scrubbing brush (best for the purpose only) is the best thing that we have found for cleaning potatoes for baking.

The tendency of lime is downward, and when applied the best mode would be to broadcast it over the surface of the earth and allow it to remain until ready for spring plowing.

Do not use too much water on house plants. Simply moistening (not wetting) the earth is all that is required. Perfect drainage must be allowed at the bottom of the pots, and on cold nights the earth should be rather dry than otherwise.

If the brush weeds and stubble have not been cleaned over a fence corners it should be done before spring. The fence corners, especially if the worm tail fence is used, will harbor all classes of weeds, and become fruitful sources whence weeds are scattered over the farm.

To get rid of ants in the lawn a correspondent of the Ploughman says: "As soon as you discover where they are, dig to the bottom of their nest, throwing the loam to one side. When you get to the bottom cover with coarse soil, ten inches or more, filled in the loam, and you will be troubled no more.

The highest recorded price for a Stradivarius violin is said to be \$8,000.

Nineteen thousand more Irishmen left their native land last year than in the year before.

The daily production of the Rumney (N. H.) refining works is 1200 pounds of camphor.

What Your Friends and Neighbors Say on a Matter of Vital Importance.

Below will be found a sample of the multitude of letters of congratulatory messages, H. H. Warner & Co. of Rochester, N. Y., daily receive. The subjoined unsolicited testimonials are from your friends and neighbors, ladies and gentlemen you know and esteem for their honor and straightforwardness, and who would scorn to be a party to any deception. What has been done for others can be done for you, and it is toly, nay suicidal, to longer suffer when the means of recovery lie at your very door.

COSVELLVILLE, Fayette Co., Pa., Jan. 12, 1888.—I have been in the employ of the B. & O. R. R. for the past 11 years. Eight years ago, while working in one of the Company's locomotives, I contracted a severe cold, which settled in my kidneys, and a report to that effect was made by him, to the B. & O. Employees' Relief Association. I suffered severely for 47 days with terrible pains in the back and kidney. Could not sleep at night, and was greatly depressed and almost wished for death as a relief. After being under the doctor's charge for the time mentioned, Dr. Graham recommended "Warner's Safe Cure." After taking six bottles I was entirely cured. Was benefited almost with the first bottle. Since then I have enjoyed the best of health. In fact I feel better than I have for many years. I have adopted it as a regular and remedy and always keep a supply on hand in my family. I cheerfully recommend the remedy to all of my friends and neighbors.

Chief Inspector B. & O. R. R.

D. B. Brown

NEW HAVEN, Fayette Co., Pa.

(Main St. between 6th and 7th), Jan. 12, 1888.—I suffer with stomach, liver and kidney troubles for about ten years. Five years ago commenced using "Warner's Safe Cure." After using two bottles my health commenced improving. Had several different physicians who did me no good. I was very thin, weighing only 110 pounds and I now weigh 147 and am enjoying excellent health and feel convinced that it is due to the use of "Warner's Safe Cure," as I use no other medicine.

John N. H. Wilson

NEW HAVEN, Fayette Co., Pa.

(7th Street), Jan. 13, 1888.—I have been troubled somewhat with irregular urinary action through kidney trouble. I have derived great relief through "Warner's Safe Cure."

Capitalist, *James Allen*

COSVELLVILLE, Fayette Co., Pa.

Jan. 13, 1888.—I have been troubled somewhat with irregular urinary action through kidney trouble. I have derived great relief through "Warner's Safe Cure."

John N. H. Wilson

INDIANA, Pa., Dec. 1887.—

Have used "Warner's Safe Cure" for some time for kidney troubles, and derived great benefit from the same.

Joseph Schaeffer

REDSVILLE, Pa., Dec. 29, 1887.—

Have used "Warner's Safe Cure" for the liver and find it a great benefit.

Edwin D. Men

A Cleveland (O.) steel mill

has put up a big "magnety" excoind on a chain for a crane which, when charged with electricity, does the work of fifteen men who were formerly employed in lifting billets to railroad cars. A boy can run the new laborer.

Allspice comes from Jamaica.

The product in 1880 was worth \$730,000. The grower gets about 2 pence per pound for the plant.

Some of the big redwood trees in California measure 80 feet in circumference 6 feet above the roots, and look to be 150 feet high.

A steam looper, or snow locomotive, lately constructed in use in Northern Michigan, where it draws the surface of the ground 29,000 feet of logs over snow sometimes a foot in depth.

The Population of Butler is about 7,000, and we would say at least one half are troubled with some affection of the Throat and Lungs, and those complaints are, according to statistics more numerous than others. We would advise all to not neglect the opportunity to call on that druggist and get a bottle of Kemp's Balm for the Throat and Lungs. Price 50c and \$1. Trial size Free. Sold by all druggists.

It has been estimated that there are 100,000 steam engines and as many men who will not be able to obtain employment on the Burlington Road now that the strike is over.

California has 150,000 acres on grapes. It is been that in 1890 the production will be as follows: Table grapes 40,000 tons; raisins 1,000,000 gallons; wine, 50,000,000 gallons.

Gold is often carried away by streams near the mines. A Colorado man places a number of hides on the surface of a stream over there and as the water passes over them fine gold lays on the hides. Every two weeks he burns his hides, and is rewarded with about \$80 or 90 worth of gold.

The 48 wool sorters at the Arlington Mills, Lawrence, Mass., have been laid off, there being no work for them.

THE FLOWERS.—Dr. Talmage's Poetic Discourse on the Angels of the Grass.

BROOKLYN, N. Y., April 1.—The flowers were gorgeously decorated with flowers and palms this morning in honor of Easter and Rev. Dr. Talmage's return from his Western jaunt. It was packed to its utmost capacity and many hundreds were turned away. The Doctor preached on "The Angels of the Grass," paying his text, Luke xix. 12, "God so choiceth the grass, which is today in the field and tomorrow is cast into the oven, how much more will he choiceth you?"

"The flowers are angels of the grass," he said. "They all have voices. When the clouds speak they thunder; when the whirl-winds speak, they scream; when the cataraets speak, they roar; but when the flowers speak, they always whisper. Remain in the first place, they are good for lessons of God's providential care. That was 'Christ's first thought. If you insist on asking me the question what are flowers good for? I respond, they are good for the bride and groom. They have them on her brow and she must have them in her hand; the marriage altar must be covered with them. A wedding would be as inappropriate as a wedding without music. So much of the pathway of life is covered up with thorns we ought to cover the beginning with orange blossoms.

"If you insist on asking me the question, What are flowers good for? I answer, they are good for honor and glory. The flowers of the field have them on her brow and she must have them in her hand; the marriage altar must be covered with them. A wedding would be as inappropriate as a wedding without music. So much of the pathway of life is covered up with thorns we ought to cover the beginning with orange blossoms.
