We believe we have succeeded in gathering up shout all that yet re-main. There are, no doubt, a few we have not learned of While the natter in one sense was of but little general importance, yet the result is aggestive of several thoughts. bistory never before occurring Then again, there is a similarity

of the Republican candidate now is the same as that of the candidate in

1840, besides being his grandson. This is a circumstance in our political

in the questions before the country. While the people are in a much more prosperous condition now, and the Nation not bankrupt nor business depressed now as then yet the same leading issue is before the people. Thep, 1840, the struggle of the Whigs was to get on a tariff on foreign importations, for the purpose of protecting and encouraging our own industries. Now the struggle of the Republicans is to keep the Democrats from taking off a tariff that does protect and under which the Nation has prospered and is to-day prosperous. Then there were hard times Now times are comparatively good. Then money was scarce and uncertain in yalue. Now it is of certain value, National in character and safe for all business. Then the Democrats were tinctured with free trade theories, the same as now. But they were then under the rule and control of the South, raising rice and cotton by slave labor, and sending them to Europe, and wanting no tariff on return goods brought into this country. There was some reason-self-interest -for their policy then There is none now. And why they want to take off the protection we have, and by the set of their President and their Congress force the issue upon the country, is one of the mysteries of the day But it is perhaps well The Repub licans are meeting them squarely upon the issue they have raised and the refult now will be the same as in 1849-apother Harrison will be elect ed President in November.
