Nothing is truer than that a man who attempts to be a Jack at all trades is successful in none. Equally true is it that hire is too short for a man to prepare himself for grappling with all kinds of diseases. We need specialists in medicine, and in large cities it is becoming more and more the custom for physicians to adopt some favorite special line of practice. The name of many such become familiar the world around, as that of Dr. Douglas who at tended General Grant, or that of Dr. Foote, of New York, whose original ideas of and successful practice in chronic diseases, have become widely known because his entertaining writings and remarkable cures are to be found in almost every county of every state of the Union. His favorite work, "Plain Home Talk," has worked its way around the globe both ways, via London and via San Francisco to Australia and New Zealand, with the result that the doctor, at his office, 120 Lexington Ave. New York, is in receipt of consultation letters and reports from patients in every foreign mail. But this prophet is not without honor in his own country, and it is mainly from his own country, and it is mainly from his own country, we would be consultant of the proper consultation, and to whom he offers the benefit of his thirty years experience. His career and success alone prove the advantage of specia. Sm.
