THE SEASON FOR INSECT PESTS. The caterpillars, which are making their tents earliert his year thanusual, owing to the warm spring weather, should be looked after at once. The simplest and perhaps, on the whole, the best way of getting rid of them is to brush off the nests from the trees as fast as they appear, with a long-handled, conical-shaped brush. Early morning or evening is the time when the entire family nay be found at home, so that is the best time to destroy the nest.

The codling worm, which infests fruit rees throughout the land, should be look-
