

THE BUTLER

BUTLER, PA., FRIDAY, OCTOBER 3, 1890. VOL XXVII. NO 47.

WALL PAPER!

Believing that it is best to close out each season's styles before the coming season begins, even at a great sacrifice, I have marked over two-thirds of my entire stock of paper hangings, the largest and best selected line in Butler.

AT HALF PRICE

The balance of the paper was marked so low before that half price would give them away. These you will get below cost notwithstanding their former cheapness. Just imagine Browns at 50c double bolt, Whites at 10c and 12c, 6 1/2 15c and upward. Day now for your fall papering, you will not get such bargains then.

My Wall Paper, Stationery and Art Store is easy to find.

W. A. OSBORNE,

5 E. Jefferson St., next to Lowry House, Butler, Pa.

Dry Goods

AT LOWEST PRICES AT THE NEW STORE OF

D. E. JACKSON.

We are now coming, but have come to stay. We buy our goods at lowest cash prices and as we sell for cash only. We are enabled to sell goods at the smallest possible margins. We stock and carry in our store, new goods, no trash, from all parts of our store, especially on the following goods: Dress Goods, White Goods, Prints, Gingham, Shirtings, Muslins, Lace Curtains and Curtains, Poles, Corsets and Corset Waists, Ladies' Children's and Gents' Underwear, Hosiery, Gloves and Mitts, Kid Gloves, Ribbons, Silk and Velvet, Blank and Colored Silks, Cloth Caps, Broad Wreps, Jerseys and Jersey Jackets, Table Linens, Napkins, Towels, etc. etc. but as new goods are arriving all the time, we would not likely have the goods now quoted, but possibly have them at still lower prices as the season advances. We are proud to say that in this city and county our goods and prices have met with approval and commendation, although subjected to close scrutiny and comparison with the goods offered by others. We solicit your patronage, and will do all in our power to make our business transactions pleasant and profitable.

D. E. JACKSON, Butler, Pa.
Next door to Heitman's.

DOLLARS

Saved are as good as dollars earned, and the wise will take advantage of our closing out sale of

SEASONABLE GOODS.

We don't want to carry over one piece, and if low prices will sell them, we shan't.

Light Colored Stiff Hats, Summer Underwear, Straw Hats and Light Colored Neckwear are all to go.

Look alive now and don't get left.

COLBERT & DALE,

BE UP TO THE MARK

Not to Split! Not to Discolor!

BEARS THIS MARK.

TRADE MARK.

PELLULOID

MARK.

NEEDS NO LAUNDERING. CAN BE WIPED CLEAN IN A MOMENT.

THE ONLY LINEN-LINED WATERPROOF COLLAR IN THE MARKET.

WHAT IS SAPOLIO?

It is a solid handsome cake of scouring soap which has no equal for all cleaning purposes except in the laundry. To use it is to value it.

What will SAPOLIO do? Why it will clean paint, make old clothes bright, and give the floors, tables and shelves a new appearance. It will take the grease off the dishes and off the pots and pans. You can scour the knives and forks with it, and make the tin things shine brightly. The wash-bowl, the bath-tub, even the greasy kitchen sink will be as clean as a new pin if you use SAPOLIO. One cake will prove all we say. Be a clever housekeeper and try it.

Beware of Imitations. THERE IS BUT ONE SAPOLIO, ENOCH MORGAN'S SONS CO., NEW YORK.

COALS OF FIRE.

SOPHIE SWETT IS HARRY'S WEEKLY.

One of the most interesting subjects for examination under the microscope is *Falseria spiralis* (the grass which grows in aquariums), when prepared to show cyclois or diastole, or the protoplasmic Professor Lockwood, in the *Microscopist* says:

"I think that, to the amateur at least, a hint how to observe the circulation of this favorite plant to the best advantage cannot be too freely given. I have never seen it better displayed than when under the excellent manipulation of Mr. F. W. Deroe, of the New York Microscopical Society.

"Having selected a bit of leaf, not too mature, he shaves off one side with a sharp knife, although a razor is better. It is then put on a slide, the shaven side up. A drop or two of clean water and a cover glass of medium thickness, with good illumination, follows. Mr. Deroe uses a prism illuminator. Begin the examination with a sixteenth inch objective, and continue up to a sixth or a tenth. The result will be a vision of startling clearness. The vivid individuality of each bioplasmic molecule, and the mystic, almost a solemn, movement of this pellucid stream of infinitesimal life, form a sensational picture of which the beholder never tires."

A Peep at the Secrets of Life.

One of the most interesting subjects for examination under the microscope is *Falseria spiralis* (the grass which grows in aquariums), when prepared to show cyclois or diastole, or the protoplasmic Professor Lockwood, in the *Microscopist* says:

"I think that, to the amateur at least, a hint how to observe the circulation of this favorite plant to the best advantage cannot be too freely given. I have never seen it better displayed than when under the excellent manipulation of Mr. F. W. Deroe, of the New York Microscopical Society.

The vivid individuality of each bioplasmic molecule, and the mystic, almost a solemn, movement of this pellucid stream of infinitesimal life, form a sensational picture of which the beholder never tires."

TOADS IN ROCKS.

Many well authenticated stories of the finding of live toads and frogs in solid rock are on record, and that such things are possible was demonstrated here recently, when the workmen excavating the Erie & Erie's time rock quarry, north of the city, broke open a large piece of rock which had been blasted out, and a frog hopped out of a pocket in the centre, says the Salt Lake Herald.

Of course, the occurrence creates a tremendous sensation among the workmen, and operations at the quarry were for the time suspended, and the movements of the frog were watched with great interest. The animal was somewhat smaller than the ordinary frog, and was perfectly white. Its eyes were unusually large and very brilliant, but the frog was apparently blind. Where the mouth should have been there was only a line, and on the feet was a dark, horny substance. Mr. Everitt at once took charge of the curiosity and put it in a terrarium which he had the next morning. He brought it down town, and it was examined with interest by a large number of people, and it was afterwards presented to the museum, where it will be preserved in alcohol.

THE LONGEST WORD.

A discussion has been going on in the columns of the New York Star regarding the longest word in the English language. The five words below have been unearthed, and certainly take the prize for length. The first one is found in the dictionaries, but the authority for the use of the others is not given:

1. Disproportionableness.
2. Honorificabilitudinitas.
3. Disambiguatorianism.
4. Unpronounceableness.
5. Velocipedistrianism.

REMEDY FOR ROACHES.

Take three pounds of oatmeal, or meal or Indian corn, and mix it with a pound of white lead, and mix it with enough water to form a good paste, and put a portion down at night in the infested building. Repeat for a few nights alternately, and in the morning remove the paste and the corpses to a convenient place.

—A mean, small, revengeful man will compulsively go away for a month's vacation just as his friends are coming home all tired out.

—In Arabia it is a common form of salutation to put cheek to cheek. A book agent and his partner, who were on their way to a pretty lively collision by adopting the custom.

Lift her up tenderly. Treat her with care. The banana peel tripped her. And then she fell.

—An eastern editor is inclined to doubt that the progress of a cyclone, because, as he says, air is invisible. It is evident that the editor never encountered a sight draft.

Now let the women do our work. And let us make the hash. For now they wear our laundry shirts. And we wear their wash.

—A New York actress was brought down a ladder the other morning from the fourth floor of a burning flat, bearing her pet dog on her arms. Considering that there was no time to get the dog, it is fortunate that she did not have a child.

—No barber should use sponges, said a medical-looking man to a man with a blotched face beside him. "It is almost impossible to cleanse them."

—A Philadelphia just from Asbury Park tells of the latest anti-prohibition dodge. An individual entered a drug store and presented an order for a pint of whisky, signed with his own name and the letters M. D. "You're no doctor," said the drug clerk. "No, I didn't say I was."

"Well, what does M. D. mean?" asked the clerk. To whom replied the individual briskly: "It means mighty dry!"

—Some of the big trees of California are not less than 6000 years old, or about 1600 years older than the pyramids.

—Reason and Instinct.—How to lie about it comes natural.

—Strangers always take advantage and sometimes cruelly treat lively stable horses and hotel ponies.

—Before you do anything wicked, remember that the papers will probably want to mention it.

—The history of Hood's Sarsaparilla is one of constantly increasing success. Try this medicine.

—One of the peculiar industries of a certain section of California is the collection and shipment of horned toads. They are sold to the Chinese, and used them for medicinal purposes. They are considered especially valuable in the treatment of rheumatism. The formula is as follows: Two parts whisky and one part horned toad; mix and let it stand one year. It may then be taken internally or applied externally to the rheumatic parts. The American improves on the Chinese formula by administering the whisky internally and trusting the jimjams to furnish the assortment of horned toads.

—Dr. Fenner's Golden Relief is warranted to relieve toothache, headache, neuralgia, and all other pains in 2 to 3 minutes. Also bruises, wounds, wire cuts, swellings, bites, burns, summer complaints, colic, (also in horses), diarrhea, dysentery and flux. If satisfaction not given money returned.

"How happy is he born and taught That secretly another's life will show? Whose armour is his honest thought? Who simple truth his utmost foe? Who knows no villain, who knows no deceit? Whose soul is still prepared for death, Not tied unto the world with care? Of public fame, or private breath?"

AGRICULTURAL.

A good fertilizer for face, hands and forehead is the following: Lemon juice, one ounce; powdered borax, one-fourth ounce; sugar, a half drachm. Mix well and keep tightly corked.

Be sure, when purchasing an animal, that it is free from any disease, and that it does not come from a section where the disease has prevailed. It is an easy matter to bring disease into a flock or herd.

When you have to drive your horse a long distance, begin quietly and let him work gradually into his pace, and when nearing home, or the end of your drive, slack up and let your horse take it easy for two or three miles or more, that he may come in cool and avoid some of the dangers of catching cold.

REMOVING A CINDER FROM THE EYE.

The proper way to get a cinder out of the eye is to draw the upper lid down over the lower, utilizing the lashes of the lower as a broom, that it may sweep the surface of the former and thus get rid of the intruder. Or, gently drawing the lid away from the globe, pass a clean camel's hair brush—or fold of a soft silk handkerchief—two or three times between them. This procedure will, in nearly all cases, suffice; when it does not, the services of a physician are necessary. It is a remarkable fact that a very minute bit will give rise to intense pain, and even after it has been extracted, the sensation remains for an hour or more. After the intruder is out, gently bathe the lids every fifteen minutes in cool water till the feeling subsides.—*Ladies' Home Journal.*

EFFECTS OF INBREEDING.

Take a flock of common hens, of all colors, shapes and sizes, so as to conduct an experiment. Place with them a pure-bred Plymouth Rock cock, and the chicks will be of the same color and so near like Plymouth Rocks that it will be difficult to distinguish them from pure-bred. To continue the experiment, the next season use a cock of the last season's production, with pullets of the same blood. This is kept one of the half-bred Plymouth Rocks and mate him with a few of the half-bred pullets. The result will be that chicks hatched from the eggs laid by the half-bred pullets will revert to their grandfathers, and instead of being pure-bred, like the cross from the pure Plymouth Rocks, will come of all colors, shapes and sizes (when larger). By inbreeding the uniformity is destroyed, because the parents are not pure-bred. Hence, always use a pure-bred male in the flock, no matter what breed it may be not only uniform, but superior to those of the previous season. The same rule applies to the breeding of cattle, sheep, and all domestic animals.—*American Agriculturist.*

WHEN TO CUT TIMBER.

The best time to cut timber is when the tree is filled with the gum and oil of the season, and when the natural forces of the tree are at rest. This term may be said to be between the 1st of September and the 1st of February, according to climate and locality. December and January are favorable months in many sections of the South, to prevent the extreme depression and consequent strain on the flexor tendon, and to break the concussion caused by the horse's great weight coming so rapidly to the ground. When once severely cut away from the frog never entirely recovers its original efficiency, and it will be a very long time before it will be moderately useful.

At the same time the enamel, like the enamel covering our finger nails, which covers the whole of the outside of the hoof, has an effect in retaining its moisture and suppleness, is rasped away to make his foot fit the shoe and to give it a round and uniform shape. Thus two of nature's most important provisions to secure an elastic tread are ruthlessly destroyed and the horse compelled henceforth to stamp and jar away with his sensitive foot and loaded shins resting entirely on the dried and unyielding crust of his hoof, made still more unyielding by being laid to an iron ring.

TAMWORTH SWINE.

English breeders have for some years past been giving increased attention to Tamworth swine, on the belief that this variety is unequalled for the production of lean meat. While the Tamworth hogs produce good saleable bacon, other pure breeds, taking them collectively, produce too much fat for the majority of consumers.

For headaches, biliousness, constipation, dizziness, sleeplessness, the blood, Dr. Fenner's Blood and Liver Remedy and Nerve Tonic never fails, warranted to satisfy or money refunded.

—An exchange says that on the 20th average, in frame dwellings, building hardware, and other goods, would last 20 years outside paint 5 and inside 7 years; shingles and outside blinds 10 years; cornice and base 40 years; weather boards, doors, windows, stairs, newels, and inside blinds 30 years; sheathing and insulation lumber 20 years; sills and floor joists 25 years.

—There is considerable discussion as to just who old Bluebeard was and when and where he lived. But it is generally conceded that he was quite a lady killer.

—"Gone to Meet the World's Fair and the Peach Crop" was the sign hanging on a street door lately. The man who had occupied the place had fallen.

—The time is close at hand when the dog will take off its muzzle, and the politician will put his in.

—Nobody seems able to account for the scarcity of apples, but the small boy will endeavor to find the cores.

—The reason why they kill spring chickens is because they are of no earthly use except in an ornamental way after they quit laying.
