—If the Pittsburgh Plate Glass Co. which
now owns the tremendous plant at Ford
City, and the plants at Tarentum and
Greighton, keeps on adding to its facilities
it will become a sort of Standard Oil Co.
affair to the rest of the business. It now
has sixty-six acres under roof at Ford
City. It makes all its own glass, and has
built a new plant in Michigan to make its
own soda ash; it owns its own gypsum
beds, also in Michigan; it handles all its
production by machinery moved by elec-
tricity, its pay roll now amounts
to over \$150,000 a month, and it has
immense tracts of land in Butler, West-
moreland and Armstrong counties leased
for gas, and is continually drilling, it has
eight pipe lines, running from eight to 12
inches, across the Allegheny river, and is
adding to its plant and output daily. The
bulk of its output is shipped to New York
and Chicago, and the company always has
more orders ahead than it can promptly
fill. It is not a great many years since
Capt. Ford built his first plate glass works
at New Albany, Ind., and induced Con-
gress to put a protective duty on the glass
and now there are a dozen big plants in
the country, the price is less than one-
fourth what we were paying European
manufacturers for the same quality of glass.
In the course of time, supplant the ordinary
glass.

Council Proceedings.

The most important business attended to
by the Council at its special meeting of
Tuesday evening was the adoption of the
ordinance providing for the payment of
the special tax levied for the northern
part of the town. The number of feet of
sewer pipe composing the system is 32,918;
the number of feet of frontage, with the
allowances as noted last week, is 32,217,
and the entire cost with allowances for
collection, etc., is \$20,757.88. This makes
the cost per foot front 91.810th cent.
Each assessment is noted in detail in the
ordinance, which will be printed in this
paper next week.

The petitions of several persons not on
the list of the present sewer for leave to
connect with it immediately were held
over for the reason that the sewer has not
yet been taken off the hands of the con-
tractor; and again the sewer cannot be
used until a supply of water for the flush-
ing tanks is provided. There are several
flushing tanks in the system, each of which
holds 200 gallons, and a contract for the
water will have to be made with the water
company. Mr. Meredith is to be in Butler
to-day and if the committee of the Council
and he cannot agree on prices the Council
will go ahead and connect, and let the
Court fix the price, which in New Castle
for a similar system is said to be \$12 per
tank per year.

The P. & W. R. R. Mr. Fullerton and
Mr. Robban have appeared from the report
of the viewers in the matter of straighten-
ing Centre Ave. and after some talk the
solicitor was instructed to ask the Court to
report the report back to the viewers for
some correction. The matter gets into the
Court it will have over for an indefinite
period, and the bridge will not be built
this summer.

The matter should be compromised or
settled as soon as possible. The matter gets
into the Court it will have over for an in-
definite period, and the bridge will not be
built this summer.

The question of the percentage allowed
the Borough Engineer was brought up,
and after consideration, the former action
of the Council fixing the percentage at 14
was reconsidered, and the matter was re-
ferred to the finance committee. It is
estimated that with the sewerage
and water works, the percentage of the
greater part of \$200,000 will pass
through the treasurer's hands this year,
which would make the treasurer's percent-
age over \$20,000—a greater sum than the
Council is disposed to pay for the work.

The bond of the borough treasurer was
fixed at \$40,000, and that of the high con-
stable at \$200.

The borough engineer was instructed to
establish the grades of N. McKean St.
The borough solicitor was instructed to
advise the owner of any contractor for the
postoffice building of the suit brought by
Mr. Smith, of Springfield, for injuries to
his daughter, and that if he secured a ver-
dict against the borough, suits to "recover
over" would be entered.

Stamm was instructed to see that
Fair Ground St. was opened to its full
width of 40 feet; the school board was
asked to take action on the paving of streets
adjoining its buildings; the sewer commis-
sioners were instructed to see that the
sewer building permits were granted.
Messrs. McKean, Haffner and Perrine
were appointed a committee to draft an
ordinance to protect the paved streets; the
petition to pave Centre Ave. was referred to
the paving committee; the whole Council
met on Brady St., Saturday, at 1 p. m.,
to consider the petition of Mr. Dale regard-
ing straightening and grading the street
between Steve Hueston and the Chief of
Police was talked over, and the Council
adjourned to meet next Tuesday evening.

Oil Notes.

The Hartman & Son well on the Pryor
heir, which came in some days ago, and
which had been doing about 400 barrels a
day, was drilled deeper last Friday and
surprised everybody by increasing to about
1,500 barrels a day. The firm has 100 acres
around the well and the leases are very
valuable. On Monday the well was re-
ported to be doing 30 barrels an hour.

The Phillips well on the Fisher is re-
ported to do 20 barrels, and the Burtner and
Sweeney farm wells at 100 each.

The Muller farm well, west of Zelenofsky,
has lately been the scene of considerable
activity. Marsh No. 1, on the Muller is
increasing its production.

Levine and Stoughton & Co. are drilling
on the Stoughton and Patterson & Lock-
wood on the Goeftman.

is rated at 50 barrels.

Concord twp. was completed, Wednesday,
and is a small producer.

week and was drilled through the sand
and bed, and is now pumping well.

The English well was shot Wednesday
and filled up with oil, but has been giving
in since.

A well is drilling on the Bentrion or old
Ripper farm, also one on the Snyder and
one on the Hockenberry.

Two rigs are up on the Double and one
on the Klingler, south of the Shanor and
east of the Ripper.

The people of W. Sunbury are con-
fident of having an oil field in their vicinity
in the near future. The wells on the Hoer-
er and McKinny farms are doing six barrels
each, and more wells are being drilled.

The Golden & Co. lease of the Graham
heirs oil farm was sold last Tuesday for
\$24,000. It consists of 15 acres and 5 wells
with 250 a day production, also the Nesbit
lease, 11 acres, 3 wells and 50 barrels a day
for \$13,000. Messrs. Brown & Sherman
were the purchasers.

Campbell & Nickles' rig on the Amberson
was burned last Friday.

Three thousand citizens of the county
signed the salt-water petition, and it had
its effect, and the refuse of oil and salt-
water wells has been excepted in the pro-
posed bill.

Russia has a 400,000 barrel oil well, ac-
cording to report—400,000 barrels of oil
flowing out of one hole every day.

—There have lately been placed upon
the market several cheap reprints of an
amateur edition of "Webster's Dictio-
nary." These books are given various
names, "Webster's Unabridged," "The
Great Webster's Dictionary," "Webster's
Big Dictionary," "Webster's Encyclope-
dia Dictionary," etc., etc.

Any announcement concerning them
are very misleading, as the body of each
from A to Z is the same,—forty-four per-
cent of the time, and the balance from cheap
plates made by photographing the old
pages.

The old book has been padded out by
various additions called from various
sources of questionable reliability, but the
body of the same was made from cheap
