Mr. H. W. English, a son of Jas. Y. English of Franklin twp. returned from another trip to West Virginia, last week. The mountain region of W. Va. is very rich in lumber of all kinds, coal and iron. Vast forest of caks, cherry and walnut are encountered on every hand, but it is hard to get it to market, though along the streams they float it to the mills and railroads. Some very large trees are found. On a tract of 1800 acres along the headwaters of the Cheat river (which is a branch of the Monongahela) owned by Geo. Ziegler of Butler, there is a walnut tree, eighteen feet in circumference, straight as an arrow and eighty feet to the first branch. Some of the coal veins are fourteen feet deep and some of the iron-ore veins eleven. It is for \$1200 and the amount of damages will probably depend on the verdict of a jury. Its consideration caused the manner of the construction of the abutments to be referred to, and committee was appointed to confer with the County Commissioners regarding it. It was asserted that the P. R. R. Co. makes

all its abutments solid with cement, which on a good foundation last forever, and are the cheaper in the end. Council adjourned to meet Thursday
