TRADE MARK. ELLULOID MARK. NEEDS NO LAUNDERING. CAN BE WIPED CLEAN IN A MOMENT. THE ONLY LINEN-LINED WATERPROOF COLLAR IN THE MARKET.

THE FATHER'S PRAYER.

Lord, though his sins were scarred, And he went far astray, These years have I prayed These Show him the narrow way.

With this prayer on his lips, Lord, that he might learn, Though his sins may not come high These, The sinner may find grace; If he repents him truly, These will not hide Thy face.

For years, Lord, has he wandered, Let him arise and say: "Forbear, Thy love I stand, No longer here I stay; "I will return unto Thee, And at Thy feet will pray, That like the prodigal of old, I be not turned away."

It may be, Lord, that never Thou hast seen him, I dare not pray for that, Lord, While he is far from Thee.

Yet, Lord, all things are possible, And surely Thy grace is great, It may be the joy cometh, That shall see his face.

Face of him who left me, My youngest born, my pride; There came a day I don't know, For better he has died.

But now my prayer is only, O Lord, Thy will be done; It may be, Thy love will bring home my son. -The Acorn.

A CLEVER ROBBERY.

How the Duchess of Lincolnshire Lost Her Diamonds

NE or two days before the duke and duchess were to leave for their drawing room at Buckingham Palace, the duke's valet, Cropperton, of Lincolnshire came up to town from his place.

He was to present her Lady Muriel and Lady Constance Willoughby. Great things were whispered and expected of the two debutantes, the fame of whose names had for the duke is one of the richest peers in the kingdom.

He had traveled far and wide and created a furore by his purity, size and great value, but for their immense number. When not in use the more magnificent gems see the light only on a special occasion.

They were kept in a specially designed and extra strong safe at Coutts & Co's bank. The Duchess's maid, who had been with her from the time she was a girl, had prepared a magnificent new court dress and determined to wear all the family diamonds, or at any rate, as many of them as she could conveniently, respectably and decently get on her person.

For the Willoughby diamonds are not only world-famous for their purity, size and great value, but for their immense number. When not in use the more magnificent gems see the light only on a special occasion.

A GREAT GERMAN.

Count Von Moltke the Famous Soldier and Patriot.

Brief Review of His Grand Life of Four Score Years and Ten and His Services to His Country - The Secret of His Longevity.

"Few and evil, even at the longest and their best, are the days of mortal life." So in effect, says the patriarch Evening Herald, when the patriarch John, twenty centuries before the advent of Christ, and the world is saying that same song today.

"If you please, my lord," said Parkin, passing him into the room of the chambers, who showed him into the drawing-room and asked him if he wished to see the duchess.

"By no means disturb her grace at this early hour," said Lord Thornberry; "don't even tell her I'm here, or I know she would kindly come down."

"Yes, my lord," And so the groom of the chambers and the butler returned to their quarters.

In about twenty minutes the drawing-room bell rang. Lord Thornberry rose and went to the open doorway where the groom of the chambers came up.

"I shan't wait any longer for her grace," said Lord Thornberry; "I had no idea he would be so long. Tell him I had an engagement and couldn't wait."

"Yes, my lord," bowed the groom of the chambers, passing his lordship down to the butler and a couple of big powdered-headed footmen, who let him out.

"That's the new second coachman, I suppose," observed the butler to the footmen, "and he's a very good fellow."

"No, it isn't," replied his fellow-servant; "it's a man I never see before."

"So is the footman for that matter," said the butler, "and he's a very good fellow."

"No, it isn't," replied his fellow-servant; "it's a man I never see before."

"So is the footman for that matter," said the butler, "and he's a very good fellow."

"No, it isn't," replied his fellow-servant; "it's a man I never see before."

"So is the footman for that matter," said the butler, "and he's a very good fellow."

DEEP SEA SECRETS.

Important Discoveries Made in the Pacific Ocean.

Many Interesting Facts Learned About the Waters Along Our Western Coast - Singular Changes Occurring.

The United States steamer Albatross lately completed a survey of certain waters of the Pacific which have never been subjected heretofore to scientific examination.

There is a large portion of the Pacific ocean lying off the north-west coast of South America which has never been examined as to its fauna, temperature and currents.

The Albatross, under the command of Z. L. Tanner in command and Prof. Agassiz, the greatest living naturalist, representing the United States fish commission, was sent to discover what these waters contain on the surface, at the bottom and in the intermediate depths.

The first work was done, says the Chicago Post, between Panama bay and the Coocs and Malipelo islands, off the coast of Ecuador.

On March 20 work was begun under the command of the Albatross, along the coast of the latter country, through part of the Gulf of California and returning back to Guaymas.

The work was accomplished by means of a boat of heavy build. By rifling out the loose portions she obtained a blowy look which her regular levator could not give her.

She was let the tea-ly remain until strength is attained, while those taking the weaker drink soon remove the tartaric bag.

On the Altar of Vanity. A malicious man had to leave the service of Frederick Charles of Prussia against her will.

It has been told the most plausible way the means which he adopted to induce the king to maintain a slight despite her advancing years.

According to this authority the process is as follows: When her royal highness has almost finished her toilet the service of two sturdy maids with remarkably long hands are requisitioned.

These servants proceed to the front of the corset while the mistress of the robe pulls the laces with all her might, and are not allowed to relax their efforts until the princess has become almost unbearable.

Blood Oranges. "Blood oranges" have been investigated by order of the health officer of Washington.

The story that they are "fixed" with a syringe and a little aniline dye has been going the rounds of the newspapers.

It is said that the supply of "blood oranges" in the Washington market seemed to be abundant.

He directed an agent to obtain specimens from the fruit if it had been tampered with. The chemist to whom the matter was referred says in his report:

"The oranges were found to be entirely natural in color and of any kind having been used. The small spot on the side is a fungus spot and not a puncture.

It is impossible to obtain a specimen from the surface of the water, as a scoping net which carries with it large amounts of food.

The surface fauna was also in striking contrast with that of the Atlantic from the same cause.

There was a noticeable diminution of the great amount of animal matter which is found in the Gulf of Mexico.

THE WIZARD'S LATEST.

Edison Will Exhibit Several Astonishing Inventions at the World's Fair.

Thomas A. Edison, the famous electrician and inventor, is preparing to astonish the world by the exhibit he will make at the world's fair in 1892.

He has recently, "which I think will both surprise and please the visitors to the electrical department of the exposition, which, by the way, I am fully convinced, will be a great success.

Two of these inventions are not yet ready to be described, or even sketched. The third, however, is so nearly perfected, that I do not hesitate to say something about it.

"I hope to be able by the invention to throw upon a canvas a perfect picture of anybody, and reproduce his words, notes, and actions, as if he were actually present."

ANCIENT RECIPES.

Birds and Snails Employed in the Composition of Remedies.

The position of Remedies in the "Lima" and to recover it in a short time, though the Child be so lame as to go upon Crutches.

It is a well-known fact that the Child in every joint who perceives to be weak, therefrom the fire every morning and evening.

This I have known to be the case of a Child that was extremely weak to go alone, using it only a week's time.

By the many receipts given for curing this disease, it is evident that the "Ointment of Swallows" attracts one's attention; it would very hard to "make."

What kind of swallows? where could one find them, and how catch them? "Take swallows as many as you can get, ten or twelve at least, and put them quick into a mortar."

Alive or dead feathers and all we query. Added many herbs and spices. "Nest-foot Oyl" or "Nest-foot" much more than straight through a canvas cloth.

Truly a fine oil for divers complaints. -Elizabeth Robinson, in Popular Science Monthly.
