DR. JOHNSTON'S IMPROVEMENT IN DENTAL PLATES.

Patented February 25, 1890.

This improvement does away with the large suction plate in common use. The plates are very small, only about one-eighth to one-fourth the usual size, and being constructed on true mechanical principles, fit the mouth with perfect accuracy. Any number of teeth can be put in without extracting any good teeth you may have, and no plate in the roof of the mouth. The patent plate is specially adapted to partial lower dentures, since it is well known that the dental profession have nothing successful to offer in that line; and furthermore, partial lower plates have not nor cannot be successfully made by any other known method. This is an important matter when we take into consideration that lower teeth are as necessary as upper. For further information, call at

Mr. Smartchap (who thinks he sees the opportunity of his life)—I have noticed that business has been very dull lately.

Employer—Yes, it has.

Mr. Smartchap—And your profits have been greatly reduced, with no immediate prospect of improvement.

Mr. Smartchap—I have therefore come to you to ask you to reduce my salary.

Mr. Hardhardt (in a hurried whisper to his secretary)—Humor the poor fellow while I go and telephone to the insane asylum.—N. Y. Weekly.

False Pretense.

"I want my money back," said the square-jawed woman. "This stuff ain't what it's cracked up to be, by a heap."

"No?" ventured the druggist.

"No, indeed. Doesn't it say on the bottle that 'three applications to the hair will convert the most pronounced brunette into a charming blonde?'"

"I guess it does."

"Well, it didn't work with me. I'm blonde enough, but I don't seem to charm for a cent. He's gone and married that pug-nosed widder on Central avenue."—Indianapolis Journal.

"In the latter case I used Chamberlain's Cough Remedy, and I think with considerable success, only being in bed a little over two days, against ten days for the first attack. A Grateful Woman.

I am so thankful that Mrs. Wymen told her experience in your columns last month. My husband has been sick and we have several small children and I had to do something. Mrs. Wymen's success with the plater led me to believe that I could make a little money too. I obtained a plater for $5 and have been plating for the last three weeks, as I could find the time to leave the house, and have made $36.50. I would not have believed that it was so easy to make money with the plating machine. Everybody has a little work they want done, and I sold two plating machines and made $5 apiece on them to friends who wanted them for their children. Any one can plate and anybody can succeed, as I have done. There is no experience needed. My husband says when he gets well he is going into the plating business. Any one can obtain circulars by addressing H. F. Delno & Co., Columbus, Ohio, where I got my machine.
