There has been but little sickness in the town this summer, and the serious cases have been mainly due to local causes and to contact with contagious diseases in other places, but there are some weak places in our public economy that would aid in spreading an epidemic of any kind, should it once secure a lodgment here. To begin with our water supply is not what it should be; the water pipes are full of fith, and the reservoir cannot possibly be in a much better condition, and this will continue until the water is filtered before it enters the reservoir. Impure water spreads disease as fast as impure air, and therefore we cannot be too care-ful regarding it. People who are yet us-ing well water should examine into the condition of their wells and surrondnings immediately, "an ounce of prevention," etc. Norz-All advertisers intending to make ngges in their ads. should notify us of heir intending to do so, not later than londay morning.

LOCAL AND GENERAL.
