BANCROFT.

EXCELSIOR.

"Twas growing dark so terrible fasht,
When through a town up the mountain there pashed.
A broth of a boy, to his neck in the schnow;
As he walked, his shillaleh he swung to a fro,
Saying, "It's up to the top I am bound for to go; Be jabbers!"
PADDY'S EXCELSIOR.

At the top stands the lines of ladies' and gentlemen's wear in the Strong & Carroll's, Howard & Foster's and Eddies & Webster's celebrated shoes, so many improvements have been made in these shoes that it would hardly seem possible to add any thing more, all solid, strong, pliable, and easy on the foot, only to be had of Robins Bros. Try a pair and if not all we claim bring them back.

New line of all kinds of Rubbers just received.

GRAVITATIONAL ATTRACTION.

it really is.

The fundamental experiments in electricity and magnetism, known to men for more than two thousand years, of lifting light bodies by rubbed amber and iron filings by means of a load-stone, demonstrate at once their incompanyly greater to war.

stone, demonstrate at once their incomparably greater power.

If, for instance, the attracting body had the moderate dimensions of a band specimen of amber or loadstone, we should require it to be of so dense a material as to weigh one billion pounds instead of a few pounds, as usual, in order that its gravitational attraction should equal that of either of the two forces mentioned. It is obvious, therefore, that the opposing nature of the force of gravity, as equally compared with other attractive forces, is due not to its superior qualitative magnitude,

thousand miles.

THE "BLOOMING JAY. THE PANIC AN AMERICAN TIN PLATE CREATED IN NEW YORK SCHOOLS.

Iow an Innocent Campaign Souven Children and Grown People Can Outwit Tammany, Harrity and Grover.

The Democrats are evidently afraid of the tin plate argument. They know that under the McKinley law the manufacture of tin plate in this country has not only become practicable, but many millions of dollars have been invested in it, forty or fifty establishments for its manufacture opened, and thousands of workmen given employment at good prices. So they see that the feature of the McKinley law, which they most strongly denounced, is already proved a blessing. But they want to conceal that fact and prevent people talking or thinking about it, or about the benefit which protection brings. And they have decided to use the official machinery of Tammany in New York city to prevent it. This was the way it came about: The Protective Tariff league, through its sec-Protective Tariff league, through its secretary, Mr. Wilbur F. Wakeman, de cided to bring the tariff question, and particularly the tin plate feature of it, to the attention of the families of New York by distributing to the school children as they came from the schools daily some cute little tin plates, made

of American tin, which bear a suitable legend and are a matter of interest to legend and are a matter of interest to everybody. So they sent men to the school buildings to distribute them free of cost as the children trooped out at the end of the day. The children went wild over it. Every one wanted one of the over it. Every one wanted one of the pretty, shining toys for himself or herself, and one or two for the sister or brother at home. The result was that hundreds of thousands of the bright, handsome little plates were going into the families of the city, and carrying upon them this legend:

see beautiful little souvenirs of this kind bearing protection sentiments going into the families of Democratic Nev York would not do. So a consultation was held in the secret chambers of Tamwith other attractive forces, is due not to its superior qualitative magnitude, but to the enormous masses of the bodies which exercise it.

Thus, while it requires the use of the most delicate torsion balance to demonstrate even the mutual attraction between a small and a large sphere of lead, yet where enormous masses, such as the earth, are concerned the attraction exerted by one hemisphere upon the other probably exceeds a force of five hundred pounds per square inch over a surface whose radius is four thousand miles. many, and blue coated policemen wer detailed to stand guard at the school and prevent the distribution of the plates. Of course they carried out their orders, and when the eager children next day looked anxiously for the dis-tributers they found them not. They had been informed that they would be arrested if they continued their distribu-

But it will not stop here. Under re-publican administration of the United States government the mails are open to all who want to use them, whether Democrat or Republican, black or white, old or young, of American or foreign birth. And one of the pretty little tin plates, which is accurately represented in the cut, can be sent with safety by mail. And the children and grown people to of the city. —and grown people, too—of the city and the whole United States are smart enough to know that. They can outwit Tammany Hall and Chairman Harrity and Mr. Cleveland and all the Democratic machine by sending a two cent stamp to Wilbur F. Wakeman, Protect-ive Tariff league, New York, and asking for one of those cute little tin plates to be sent by mail. And they will get

European Bribes. Nothing has proven more conclusively the great advantage which our reci-procity treaty gives the United States what is the dismay of the early pedestrian, welopment of the scheme on the part Germany to induce South American evernments to break off their recitority treaties with the United States, the evidence seems to be beyond questors, that an offer was sent from Germany to the treachery of a slippery pavement. It will be a comfort to know that Salvation oil will cure his bruised limbs. of Germany to induce South American governments to break off their reci-procity treaties with the United States. The evidence seems to be beyond ques-tion that an offer was sent from Gertion that an offer was sent from Ger-many to President Heureux, of San Domingo, proposing to pay him \$50,000 a year if he would break off the reci-procity treaty with the United States. President Heureux, it seems, sent a spe cial envoy to the United States to see if

cial envoy to the United States to see if this country would make a higher bid. Secretary Foster replied promptly that "The United States is neither to be blackmailed or bullied. If your coun-try breaks the treaty it must be prepared to bear all the consequences, for in my mind the word 'reciprocity' is associated with 'retaliation.'" Pension Bill Vetoes. The following is an accurate record of the number of pension bills to which the presidents since 1860 have refused their signatures. It is verified by statements of the Democratic campaign text book,

12 Years Sentence.

Twelve years experience for your benefit. For twelve years we have been in the buggy business and in all that time not a single individual has accused us of misrepresenting the quality of a yehicle sold. It must be a satisfaction for eyeryone to know that they have a firm that never misrepresents—and that years of experience enables them to know the quality of A fish dealer in a San Francisco market had on his slab the other day market had on his slab the other day two specimens of a fish not a quently seen there, but pleuty from Vancouver island northward. In plain commercial language it is known as the candle fish. Technically the name is thaleichthys pacificus, a remarkable species of the family salmonide, strictly a sea fish, approaching the coast to spawn, but never entering rivers. The specimens that were shown a Call reporter measure a foot in length and have somewhat the appearance of an eel, work they sell. Our business has increased year by year until it is twice that of any other similar concern in the State, and we feel so good that we

nets \$1.50, wagon and buggy cushions 75 cents, top buggies \$45, two seat
spring wagons \$40, etc.

Vehicles of all kinds; harness of all kinds, lap dusters and everything
wagdin connection with a driving and team outfit except the horse,

measure a foot in length and have somewhat the appearance of an eel, except the head, which is pointed and conical. It has a large mouth. The color is greenish on the back, passing into silvery white on the sides and belly, which is sparsely spotted with dirty yellow. used in connection with a driving and team outfit except the horse, Now don't be backward, come in whether you want to buy or not dirty yellow.

The Indians of Vancouver island and vicinity use the fish both for food and light. It is the fattest or most oleage inous of all fishes, and, it is said, of all animals. It is impossible to either both or fry it, for the moment it is subjected to a certain heat it turns to oil. The Indians who use the fish for food take them, and, without cleaning them, run a skewer through the eyes and suspend them in them in the thick smoke that arises from wood fires. The fish acquires the flavor of the wood and the amoke helps to preserve it. When the Indians want to make a meal of the fish they heat them, reduce them to oil and drink the oil. When they want a light they take a dried fish, draw through it a piece of rush pith or a strip in the property of the wood and the sight they take a dried fish, draw through it a piece of rush pith or a strip in the property of the wood and the sight they take a dried fish, draw through it a piece of rush pith or a strip in the property of the wood and the sight they take a dried fish, draw through it a piece of rush pith or a strip in the property of the wood and the sight they take a dried fish, draw through it a piece of rush pith or a strip in the property of the wood and the sight they take a dried fish, draw through it a piece of rush pith or a strip in the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood and the sight through the property of the wood through the property of the wood through
