ADVENTURES BY JULES VERNE.

Turning to Mrs. Allaire and Andrew Hollister who stood by her side, Capt. Willis cried out: "In your presence, madam, and in yours, Mr. Hollister, in the name of my officers and my crew, I make solemn oath not to be discouraged by any danger or any fatigue in my search for the Drednaught."

"With the aid of God and of the devotion of those who put their faith in Him!" exclaimed Mrs. Allaire. "Hurrah! Hurrah! for John and Molly!"

These cheers were taken up and repeated by the vast assemblage gathered on the wharf. The lines were now cast off and the Molly's Hope, under the pressure of the first revolutions of her screw, moved off away from her moorings and headed for the narrow channel between the islands.

The first attempt to start the screw. After a run of about a hundred miles, the Molly's Hope came in sight of Mount Kea towering fifteen hundred feet above the islands of Hawaii, which the most southerly of the Hawaiian islands in addition to five large islands and three small ones, this group contains a number of islets.

Neither captain or crew lost their self-possession for a moment during the long hours of this terrible night. On the morning of March 27, the steamer Molly's Hope, sighted the Marquesas Islands off the coast of Borneo.

"It is very possible," said Capt. Willis to his mate one day, "that the destruction of the Drednaught was due to a sudden attack of a number of piratical craft, and this would account for our not having been able to discover any traces of her."

"Very true," answered Willis, "but there's no chance of their being able to overhaul the Drednaught. With irregular and shifting winds a sailing vessel is more or less at their mercy. But so long as our engines are working and our crew are not discouraged, we can't be too careful."

On August 23 they touched at Odis, the largest of the Marshall group, visited by Kotzebue and the Russians in 1817. This group of islands due to a space thirty miles east and west by thirty miles north and south and doesn't contain fewer than sixty-five islands of various sizes.

When the ship was near the coast of Celebes island, the fantastic outlines of this island have led some geographers to compare it to a huge crocodile. The coast which is a favorite refuge for pirates.

Willis had fixed the meridian of Singapore, and he had also determined the position of the island of Java, which was the last of the islands he had to visit.

Ten days later Capt. Willis cast anchor in the port of Batavia at the western end of the island of Java.

It was from this point that Capt. Willis made his first report to Mrs. Allaire, but as all his labors had produced no results it was resolved to continue the search further west.

On the second day of December the Molly's Hope reached the Philippines, seven hundred miles to the westward of the Caroline group.

John in order to reach the Java sea.

Molly's steamer was now anchored in the port of Zamboanga, the residence of the governor, to whom and to whose subordinates Capt. Willis first applied for information of any vessel wrecked on the coast of Mindanao.

"The first is that she went down in a gale or after a collision, leaving no trace of her existence; the second is that she went ashore on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

There was no reason to conclude that the Drednaught and her crew had fallen victims to sea robbers at this point. Continuing her course toward the north, the steamer kept up her search among the islands along the coast of Sumatra.

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

HOW WE GET OUR TEETH.

An Eminent Dental Man's Interesting Statement. It would take too long to describe the formation of the teeth, but it may interest you to know that the enamel is derived in the first place from the epithelium, or scurf skin, and is, in fact, modified skin, while the dentine, which forms the bulk of the tooth is composed of a pulp, and is derived from the pulp of the future tooth, and even the tooth pulp in the old people sometimes gets obliterated by the calcareous deposit.

Hence Capt. Willis inclined to the opinion that the Drednaught had been struck and destroyed by one of these tornadoes so often let loose in immediate vicinity of the coast.

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."

"The second is that she was wrecked on the reefs and was completely destroyed by the pirates who were so often let loose in immediate vicinity of the coast."
