A National Currency Only.

The rich to revive State bank currency

has evidently taken a deep hold, and those

under its influence are industrious in

high places. The conference of the people

shows that it has gained foothold in

the leading cities and will probably be the

leading issue before the country when silver

purchase is made out of the way.

Senator Quay is confident that a State

bank currency would be safe in Penna.

Others are certain it would be per-

fectly safe in Massachusetts, New York,

Ohio and other States whose legislators

are wise enough to appreciate that the in-

terests of the people are best served by a

sound and honest currency. But the peo-

ple of Pennsylvania are not so easily

led. They are not so easily misled by

the promises of a few unscrupulous

politicians who are ready to sacrifice

the interests of the State to their own

ambitions. They are not so easily

Some of the Causes.

In his last speech in the Senate Chamber

of the United States, Senator Sherman

spoke as follows:

He said that the immediate question

before the Senate was whether or not

the United States would suspend the purchase

of silver bullion under the act of July 1890.

It was to decide that question that the

President had called Congress together in

special session. If that were the only

reason for the extraordinary session it

would seem to him insignificant. The mere

addition of 18,000,000 ounces of silver to

the mass of silver in the Treasury would

addition of 140,000,000 Treasury notes to

the thousand millions outstanding would

hardly justify the call. The call was justifi-

ed, however, by the existing financial

stringency, growing out of the fear that

the United States would operate under a

single standard of silver. This was the

real issue. The gravity of it could not be

stated in words. If the single standard of

gold were had, without the aid of the sil-

ver, the relations between capital and la-

bor would be disturbed, the industries

of the country crippled, and the value of sil-

ver still further reduced. On the other

hand, if the purchase of 54,000,000 ounces

of silver per year were continued the

United States would be eventually brought

to a single standard of silver.

On one thing Congress and the country

agreed. That was that these two extreme

conditions should be avoided, and that

both gold and silver should be continued in

use as money, as measures of value.

Monometallism, pure and simple,

never gained a foothold in the United

States. The free coinage of silver meant a

single standard of silver. It meant a reduc-

tion of the wages of labor—not in the num-

ber of dollars, but in the quantity of bread

and meat and other necessities of life that

it would purchase. In the population of

the United States it is thought that not

more than \$1,000,000 can be realized

from the auction. The Manufacturers and

Liberal Arts building, which \$1,000,000

and which has 500,000 in arched alleys

will be necessary, if the money is given to

the people, will be sold for less than the

material away. The magnitude of the

undertaking will be revealed when it is

stated that each arch contains twenty car-

loads of steel, all the pieces being firmly

riveted together. The weight on the arch

is such and the weight on the steel is

such that the steel will be strained.

The Mines building, on the con-

trary, is regarded as a more favorable

prospect. The steel arches are much lighter

than those of almost any other building on

the ground, and could be taken down and

set up again for a large workshop or factory.

They would also be available for a

depot of moderate size.

AND NOW there is a consulting of dictio-

aries in the kite shaped tract district of

Butler, Pa. The New York Sun says

that Mr. Sibley its representative, "is

only one of those freaks and malmalances

of politics who are changed in opinion by

the change of wind and grace before the

galleries for a term, and are heard and

heard of no more." The meaning of "mal-

malances" is what they are hunting and

they are finding with more or less satisfac-

tion that it is an Italian word meaning

mountain of excrement, and the majority of

the people will, with one accord, agree

that though its meaning is not generally

known its application was happily made

by the Democratic Standard to the Democratic

kite track Standard.

SENATOR CAMERON'S vote has been put

down as doubtful on the question of the re-

call of silver purchases but he dispels all

uncertainty by announcing that his mind

is unchanged on the silver question and

he will vote against the repeal of

silver purchases. The Philadelphia Press

remarks that it is about what should have

been expected from the senator. He and his

Allegheny Co. politics will, as usual, be

interesting this Fall. At a meeting in

City Hall last Thursday evening, a Fusion

or Independent county ticket was nomi-

nated as follows: For Sheriff, W. O. Kna-

ser; for Treasurer, J. D. McFarland; for Re-

corder, Wm. C. Irwin; for Register, H. E.

Armstrong; for Controller, Jas. A. Grier;

for Commissioners, Alex. Gilliland and A. M.

Swartz; for District Attorney, Jno. E.

Miller, for Director of the Poor, S. D.

Kearney; Maj. M. A. Woodward presided,

and in the long list of Vice Presidents we

notice the names of Thomas M. Marshall,

A. M. Brown, Albert Johnston, and others

who are well known in this county. The

regular candidates for Sheriff, Recorder,

County Controller were endorsed by the

meeting.

Tuesday evening the Democratic Con-

vention nominated the following ticket:

Judge—Common pleas No. 1, George P.

Hamilton; County Controller—D. J. Boyle;

Sheriff—W. O. Russell;

Register—Harry E. Armstrong;

Recorder—Alex. Wilson;

Clerk of courts—Thomas Johnston;

Treasurer—Conrad W. Smith;

Director of the Poor—S. D. Kearney;

Commissioner—D. J. Boyle;

Assistant district attorney—Mar-

schmitt.

Col. Jackson, of Apollo received an im-

mense outburst from his neighbors last Thurs-

day when he returned from Harrisburg last Thurs-

day.

This Scientific American says that the

beautiful white buildings of the Exposition

are to be sold as junk. They are soon to

be advertised and knocked down to the

highest bidder. About the only things of

value in them are the iron and steel

work. In the report it is thought that not
