

Over 700 tons of coal and coke were car-ried with the cars into the Juniata river, Thirty feet below. The line of telegraph poles standing on the north side of the tracks at the foot of mountain was transferred by the landelide isty feet to the opposite side of the road-bed, and still remained standing. Rocks which it took a derrick to remove, were cast upon the tracks. Trees of hall a cen-tury grouth were also toased upon it by the mountain's displacement. This debris in places reached a height of fifty teet above into the river, the wreckers used had shovels principally, though large derriess were brought into play in dislodging the big boulders and trees. Great stretches of the rails and roadbed were forced fifty feet aside. Superintendent Ellmaker was at once motified and called out all the available wrecking crews along the division. Wit Yardmaster Whitmoyer he was early at the scene of the sceident, directing the work of cleaning the tracks. An army of nearly 1,000 men toiled night and all day to remove the great slide. Both track Sunday afternoon, and the fifteen miles of trains that had been haited on either side of the mighty avalanche began to move east and west. Hotels in East India.

Hotels in East India.

A hotel is in some respects quite unlike 1,213 square miles, and yet she is the A hotel is in some respects quite nolike a hotel anywhere else in the world. Every guest has a servant of his own. The hotel has some servants, but the guests do not depend upon them at all. My servant takes care of my room, brings mo my tea and toast when I arise prepares my bath and woits upon me at table. He also keep my clothes clean and my boots blacked, when I want one, and does my errants. When traveling he will attend to the tickets and the laggage and makes my simple bed on the cars, for Inda is a coan try of magnificent distances, involving con-siderable night travel. There are no rega lar sleeping cars like ours, but the seataare long enough for the passengers to stretch long enough for the passengers to stretch competent speakers, with civic and in tary processions and displays to inte impotent sp akers, with civic and mi out on and wide enough to make a reason- the people. able couch which the traveler provides with his own thin mattress. pillow and wraps. The number of servants in a great hotel is confusing at first. In a long corridor you see one before each door. They usually sleep there, wrapped in a sheet or blanket and curled up on the floor.

The Great Frost

The frost and freeze of last Sunday night destroyed the applex, pears and grapes of which there would have been an abada ance on this section, this year. The nex growth in the walnut and hickory trees was killed, and in same particularly frozies locations the young growth on the white oaks and other trees was blighted Alti the corn and potatoe plants, and regetables above ground were killed, but the grain is far as we have heard, escaped serious injury. The grapes around Lakes Erie and Chautangaa are reported to be all killed. The trost was one of the most destructive and widely spread late frosts known for years. It extended over. Pennsylvanis New York, the Virginias, Tennessee, Kent to the Dakotas. At Chatanoogs the temp perature fell to 40 degrees, while at points along the lakes it reached to and helow the freezing point. Six inches of snow fell in Centia Michiggn, and in every State welded in the area there was more or less of "killing" frost. The frost and freeze of last Sunday night ed in the area there was more or less of "killing" trost.
