from taxes. The policy of this State has been from the begining to encourage mer to invest their money in enterprises that will give employment to labor, and to that policy we perhaps owe our greatness as a manufacturing State. It was also deemed wise not to tax local building and loan associations, because that would virtually be putting a tax upon the indebtedness of poor people who are struggling to pay for little homes. No tax bill, however, can be popular, because people do not like to pay taxes. The most popular bills are appropriation bills, and we must have the first in order to secure the latter.——Spirit. from taxes. The policy of this State has been from the begining to encourage mer to invest their money in enterprises that will give employment to labor, and to that policy we perhaps owe our greatness as a manufacturing State. It was also deemed wise not to tax local building and loan associations, because that would virtually be putting a tax upon the indebtedness of poor people who are straggling to pay for little homes. No tax bill, however, can be popular, because people do not like to pay taxes. The most popular bills are appropriation bills, and we must have the first in order to secure the latter.——Spirit. from taxes. The policy of this State has been from the begining to encourage met to invest their money in enterprises that will give employment to labor, and to that policy we perhaps owe our greatness as a manufacturing State. It was also deemed wise not to tax local building and loan associations, because that would virtually be putting a tax upon the indebtedness of poor people who are struggling to pay for fittle homes. No tax bill, however, can be popular, because people do not like to pay taxes. The most popular bills are appropriation bills, and we must have the first in order to secure the latter.——Spirit.
