### ADRIANCE BINDER

## W. P. Hartzell Hartzell & Kemper.

Have the largest stock of Vehicles, Harness and Farm Machinery of any house in the county. We defy any firm to show a better line of goods for less money. Our stock was selected to suit this trade. Our prices are as low as the lowest, quality considered. Our profits are small and our reputation at stake, so you can rest assured we will not misrepresent. We add a percentage on our goods and sell them according to what they cost us. We serve all alike. We do not make one man pay for what we lose on another. When we guarantee goods we make good our guarantee. We protect our customers, and not the manufacturers. Why? Because the manufacturers are of no use to us without the customers. If you want a Buggy, Surry, Phaeton, Business, Pleasure or Team Wagon, Hand or Machine-Sewed Harness, or anything in the Harness line, Blankets, Robes, Dusters, Nets, Turf Goods, Currying Tools, Whips, Saddles, Trunks, Valises, Satchels, &c., we have them in large quantities and at low prices. And for Farm Machinery, we can furnish anything needed, from the plow to the separator. We guarantee our machinery to be as good as the best and second to none. If in need of anything in our line, write us. We will answer all inquiry, either by mail or in person. Our motto is, "Small Profits and Square Dealing." Our success depends on our reputation, and our reputation will be controlled by our representations, so you can depend on what we tell you to be true. We say we have the largest line of Vehicles, Machinery and Harness of any house in the county, and a visit to our store and warehouse will prove it. Store room, 215 S. Main Street, WABERSON 226 S. Main Street. Floor space 12,000 sq. ft. If in need of anything in our line, call on us before you make your purchase. It will pay you.

## A GOOD TEXT

A well selected text is half of the sermon. Given a good text and a preacher who is in earnest, and the result is sure to be good. The text of this article is in the reader's own mind without argument. The text is "Good health is better than great riches."

Without health nothing really matters very much. A hacking cough takes all the beauty out of a landscape or a sunset. Erysipelas or eczema will spoil the enjoyment of a beautiful painting. The biggest bank account in the world won't pay a man for his health, but a very small amount of money will make him healthy and keep him healthy.

Most all bodily troubles start in the digestive or respiratory organs. It is here that improper living first makes an opening for disease. The development differs as constitutions and temperaments differ. The causes are almost identical. To get at the root of the matter is simple enough if you start right.

Dr. Pierce's Golden Medical Discovery is a medicine for the whole body. It works through the digestive organs on all the others.

It cures the first thing that comes to and after that, the next it puts health in place of disease in the stomach, and from the vantage ground thus gained, it attacks every fiber of the body and drives disease before it—indigestion, liver troubles, kidney complaint, biliousness, skin and scalp diseases, salt rheum, eczema, and all the troubles caused by impure blood.

## PAINT cracks.—It

often costs more to prepare a house for repainting than it would cost to have it painted in the first place with cheap ready-mixed paints, than it would cost to have it painted in the first place with strictly pure white lead, ground in pure linseed oil.

## Strictly Pure White Lead

forms a permanent base for repainting and never has to be scraped off or cracked. It is always ready and clean. To be sure, it is strictly pure white lead, prepared any of the following brands: "Armstrong & McKelvey," "Beymer Bauman," "Davis Chambers," "Falmestock."

For Colors.—National Lead Co.'s Pure White Lead Tinting Colors, a compressed can of color and an ounce of linseed oil, makes a perfect paint for any surface. Saves time and money in repainting. Saves time and money in repainting. Saves time and money in repainting.

Sand paper and get your book on painting and color-card, free. It will probably save you a good many dollars.

## THE CITIZEN.

A Mean Franklin Girl. The Oil City Herald says: Mention is frequently made in various papers of the "meanest man" in a community, but now Franklin comes to the front and lays claim to having the meanest girl in Pennsylvania. It is doubtful if any one will contest her claim to the title after reading the following story, as related by herself to a lady friend.

"Do you know," said the girl in a burst of confidence, "of the scheme I have for getting even with my enemies and persons whom I dislike? I have worked it out on a large scale. I have had a letter from a recently had a little trouble with Mrs. —. Did I get even? Well rather. I gathered up what bed bugs I could find, put them in an envelope, and when I had a good opportunity I didn't do a thing but distribute them in her bed. The bugs did the rest. You can readily imagine that she made it lively around that house for a time. I have worked the scheme on several other families and have never yet failed to produce the desired effect."

The lady who related this story to the Herald man recently had occasion to call the girl down, and says a day or so later she found a small bunch of rags in her bed room, which had evidently been thrown through an open window, and the rags were literally alive with the little pests.

The girl is said to be well known in Franklin, and while she does not bear the most enviable reputation, her alleged manipulation of the bugs does not tend to improve it.

—It looks like an absurdity that one of the vital principles of air can be extracted. Yet such a thing is said to be a fact. The Cleveland Citizen, commenting upon it, says: "The discovery of argon, the new element in the atmosphere that is creating a furor among scientists, has led to the use of great possibilities to capitalists. After condensing machines costing \$20,000 are placed upon the market it will only be another step to secure titles to portions of the atmosphere, and as argon is so necessary to preserve life, the extraction of hydrogen, the drawing off of considerable quantities of the new element in certain territories will leave people at the mercy of manufacturers. Monopolization of the air is not impracticable."

## Dead in His Bed

"The most remarkable exhibition of nerve I ever saw," said C. A. Rodney, general agent of the Vandalia, "occurred on the Pennsylvania train. I was going east, and in the same car with me was a woman and her husband who were traveling from the west to New York. The first morning out the woman got out of her berth and told the porter that her husband desired to sleep, as he was not feeling well."

"All that day the man remained in his bed, while his wife read the papers, played cards and acted just the same as the other passengers. In the evening the woman got up to get water for the berth, and pulling back the curtains he was horrified to find that the man was dead. It was demonstrated that he had died some time during the previous night. The woman knew it, but explained that she did not give the alarm because she was very anxious to reach her destination, and she was afraid that if the conductor knew her husband was dead she would have to leave the train."

"All day she rode, knowing that her husband was a corpse a few feet distance from her and yet she never betrayed the fact, and if the porter had not insisted on changing the bed it is likely that she would have reached New York before the death of her husband was discovered. The corpse was taken from the train near Pittsburg. I have heard of nerve, but that beats anything that ever came to my knowledge."

—Mrs. Nancy Evans, of Independence, Mo., is 112 years of age, and no ailments are necessary to prove it. Her father was a captain in the American army under General Washington, her husband fought the British in the War of 1812, and her grandsons fought in the contests between the States in the 60's.
