The forthcoming annual report of the United States Geological Surrey will set forth many interesting facts concerning the bituminons coal industry of Western Pernsylvania. The report will show that twenty one or twenty-two coal seams of commercial value have been found and named in the bituminous fields of this se-ction. The quantity of available coal contained in seams has been estimated by Dr. H. M. Chance, assistant geologist of the State geological Survey. Abo places

Dr. H. M. Chance, assistant geologist of the State geological Survey, who places the total at 33,247,200,000 long tons. The extent and value of this immense quantity of workable coal will be better under stood when it is explained that the aver-age annual product for the past five years which largely exceeded that tof any preced-ing period, was 43,000,000 tons. At this average annual rate of production the ac-cessible bitaminous coal in Pennsylvania, according to the figures of Dr. Chance, would last for 830 years, A Remarkable Railroad Accident.

A train of 23 cars was conveying 400 Japanese soldiers, who were returning from China, where they had taken part in the military operations. A heavy storm was raging and as the train was running along the sea wall on which the tracks approaching the city named are laid, an immense wave leaped over the wall, separating the train and derailing the engine and 11 cars, which plunged off the wall into the bay. Most of the men in the cars were drowned. The accident oc-curred at about 1 o'clock A. M., and the night was pitch dark. The sea was run-ning so high that it was impossible to renning so high that it was impossible to ren-der any assistance to the men in the cars der any assistance to the men in the tale tale that had gone overboard, even had means been at hand to do so. Some of the men who managed to get out of the cars while they were in the water were dashed to death against the wall.
