A CONFIDENTIAL CHAT
between two men or women generally develops the fact that one or both are troubled by sickness of some kind. One man is all right except his rheumatism, another has a "slight touch" of dyspepsia, another has bilious headache, and another is too nervous to sleep well. What's the big deal about it? The situation is serious. Little things have a way of getting big. Big diseases do not come from the air. They come from the bad things. Sleeplessness brings irritable nerves, loss of flesh and appetite. Sleepless people soon get their bodies into such a condition that disease germs find it easy to lodge there and do damage. People die from the aggravation of an aggregation of little things. The more promptly a disease or disorder is met the more quickly it is cured. Most all sicknesses start in the stomach, liver or lungs. Rheumatism, scrofula, eczema, consumption, come about because impurities impair, impoverish blood in present. The diseased blood finds the weakest spot in the body and a local eruption appears. If the impurity is supplanted with good, rich, red, healthy corpuscles, the disease will have nothing to feed on. If the proper cleansing medicine is sent to the seat of the trouble, it will force out the germs and repair the damage done. Dr. Pierce's Golden Medical Discovery is a cleansing, purifying, medicinal, blood enricher, a nerve strengthener. It is an efficient tonic, aids digestion, creates healthy appetite and healthy flesh. It does not make people "fat." It makes them strong. It makes useful flesh—solid muscle. It will cure any sickness that has its seat in the digestive organs, no matter how long it has been there.

—Problems multiply as to how people naturally be obliged to discard familiar usage in abbreviating years, as for instance when speaking of '76 '48, etc. The trouble will begin with the next freshman classes to enter our colleges. Each coming "freshie" will belong to the class of '80. The chairman has to look or shall label him. Here is a knotty problem, and it is no wonder that next year's prospective freshmen are beginning to be worried. There is a possibility that some of the older members of the class of 1900 may be better-educated than the lads of to-day.

—Rich, red blood is the foundation of health. Hood's Sarsaparilla makes rich, red blood.

—When Slater, the unique faith curer who appeared in Denver, dubbed himself "the healer," few people realized the significance of the cognomen. When his disappearance was announced they knew that he was indeed a healer.

—Dennis Scott, reported to be 107 years old, died at his home, near Shieldsville, Minn., a few days ago. His age was said to be well authenticated. His hair has never turned gray and until a few days ago he had always good health and had daily worked upon his farm.

—What is believed to be the largest mirror in the world has just been set up in a New York hotel. It is 158 inches square, and was made in France. It cost \$5,900, and two days and one night were consumed in setting it up, but nothing smaller will do for a man 13 feet high.

—An Alabama paper says that an enterprising Yankee book agent is making a haul among Alabama ministers. From Connecticut, and has been selling books chiefly to negroes. He soon came to appreciate the enthusiasm of the negroes in matters of religion. He found that in all the illustrated Bibles the pictures of the angels were in white, and colored the idea of having a Bible made for the colored race, filled to overflowing with pictures of negro angels. The books cost him about \$1.10, but he placed the first large shipment at 88 cts, payable \$2.50 cash, the balance in monthly payments. He is selling his Bibles as fast as he can get them delivered.

—If any of our enterprising people contemplate building next year they had better contract for materials now. There is reason to believe that shortly after the first of January next, iron will advance, while lumber, stone, slate, glass, concrete and paint will jump up in prices very perceptibly.

—Charles Lloyd Barney, a butcher of Des Moines, Iowa, 21 years old, is a rival of Sandow. He is accustomed to kill cattle with a blow of his fist. He raises a beam on which eight men are seated, and holds it above his head. He recently raised a horse weighing 800 pounds on his shoulders and performed many of the remarkable feats of Sandow.

—A vintner bicycle is the latest thing out. It is a simple matter to change the ordinary safety into the winter wheel. The rear wheel fits tightly around the pneumatic tire, which forms a guard against punctures.
