—The first census of the children between the ages of 8 and 13 years required by the new compulsory school law will be taken in May, and in the following September all children of the commonwealth between those ages will be required by law to attend school. The law also imposes upon the school authorities the obligation to furnish schools for all the children.

-Have you ever noticed how little of —Have you ever noticed how little of the old fashioned double sheet note paper is now used. It is so much more convienent to use the single sheet paper. Then how much better it is to have your name and address printed neatly on one corner of the paper you correspond with. Many persons do not write a copper plate hand, as a consequence the address is often hard to make out and mistakes often occur. It is not very expensive to have your note heads printed and you will be well pleased Call and inquire about this.

—There is a preacher over in New Jersey whose congregation begin to believe that he has as many lives as a cat. He fell upon an icy pavement last week and was so badly hurt that he had to be sent to the hospital. A month ago he was in the hospital, having received serious injuries by being struck on the head with a pulley block. Prior to this he was badly injured by falling from his bicycle, was struck by a train on the Central railroad and still later fell down a cistern, where he was compelled to remain for nearly two hours before being rescued. He ought to be a good man for the Democrats to nominate for President.

—A good piece of advice to people who live in the country is to take up the habit of writing for newspapers from their neighborhoods. It is a pleasant diversion as well as a profitable one to the mind and greatly facilitates the passing of the long winter evening. Time spent in gathering up the happenings of a neighborhood is a good practice for the mind as it cultivates up the happenings of a neighborhood is a good practice for the mind as it cultivates detail and accuracy, two things which a great many lack in this busy rush of life. Then there is a sense of gratification indescribable in reading something written by one's self. Newspapers are always pleased to hear from any of their friends in the sountry and take great pleasure in publishing the items of news they gather and send.

So beautiful is the scenery of California that Nature must have expended more than her usual energy in its creation, and especially is this true during the months of March and April, when the rainy season has passed and flowers bloom everywhere. Fortunate, indeed, is the person who can exchange the wintry climate of the East for the flower-perlumed and healthful atmosphere of California, and no better method of doing this can be had by participating in the second "Golden Gate" tour, organized under the perfect personally-conducted tourist systen of the Pensylvania Railroad Company.
