HOW TO CURE YOURSELF WHILE TRAVELING IT.  
 The tobacco habit grows on a man until his very system is seriously affected. Impairing health, sowing seeds of disease, and making it too severe a shock to the system, as when he is in a foreign country, he is often unable to get any relief from the usual remedies. It is in all these cases that the "Baco-Curo" is of great service. It is a natural substitute for the tobacco habit, and it is a natural substitute for the tobacco habit, and it is a natural substitute for the tobacco habit.

THE PRICE OF GOLD  
 Three Pertinent Questions Very Clearly Answered.  
 The subject questions have been asked of us by a correspondent:  
 "1. Does the price of gold fluctuate in a commercial sense the same as silver?"  
 "2. When the Jeweller buys gold bullion at prices quoted in the market report, is that an indication that the price of gold fluctuates commercially the same as the price of silver?"  
 "3. Is gold amenable to the law of supply and demand as a product, or only as money?"  
 The asking of these questions shows of itself the confusion that prevails in many minds on the subject to which they relate. The price of gold in any country in which gold bullion is coined without charge, or at a trifling charge, to the owner differs from the quantity of coin which it will produce only by the difference which the cost of melting and alloying, which is next to nothing, makes.

"There can hardly be a better title in any country for the legal than the market proportion. The presumption in such cases is that each metal finds its true level according to its intrinsic value in the general system of money operation."

"As long as gold, either from its intrinsic superiority as a metal, from its rarity, or from the prejudices of mankind, retains so considerable a pre-eminence as to be more stationary. The revolutions, therefore, which may take place in the comparative value of gold and silver will be changes in the state of the latter rather than in the former."—Alexander Hamilton.

"When it comes to the value of gold measured by commodities, a different rule prevails. The price of gold does not vary, but the quantity of it required to procure in exchange any article that is bought and sold, varies according to the market. An ounce of coined gold will buy, sometimes 30 bushels of wheat, sometimes 30, and, at present, here in New York, 25. When a Jeweller needs gold he can either melt up gold coin or buy uncoined bars, as he pleases; but, either way, he pays very nearly the same value for the same weight of gold as he would for the same weight of silver, or its equivalent, is the measure.—N. Y. Sun.

If the mints of this country were to coin all the silver in the world into dollars to-morrow and a single wheel in a single mill in the United States would begin to turn again, not a single unemployed operative would find a day's work, not a single farmer would find a new customer in the home market for his product. But if it were known that American goods would not be driven out of the American market by competitive products made abroad by cheap labor; if it were known that the product of American mills and factories could be disposed of in 1897 as it was disposed of in 1891 and 1892, then, within the time that it would take the holders of the American capital to put that capital into active operation again, one million American wage-earners would resume work and the wage payments of this country would be increased to their old figures or to still higher figures. Dollars do not make business and work. Business and work make dollars.

# Battle Ax PLUG

"Battle Ax" is popular with all parties because of its remarkably fine flavor, its high quality and the low price at which it is sold.

The people of the United States know a good thing when they see it, and they won't pay 10 cents for other high grade tobaccos while they can get "Battle Ax" for 5 cents.
