**How Mineral Waters Cure.**

When a patient reaches a mineral water summer resort, he is examined by the resident physician and ordered to drink certain quantities of the water at certain times during the day: this is increased from day to day until the maximum quantity needed is reached. He is ordered to drink one or two glasses upon rising, two or three glasses between breakfast and dinner, the same quantity in the afternoon, and a couple of glasses before going to bed. The patient is urged to take it whether he is thirsty or not. He may say that he is thirsty, but that makes no difference; he must take it as a medicine. The quantity is increased until we have known thirty glasses per day to be taken.

A part of the benefit derived is because of the rest and change of scene; a part, perhaps, is from the small quantity of the salt and other bases contained in these waters (we are not speaking of cathartic or chalybeate waters), but the benefit from this source is very slight. The secret of the cure is in the quantity of water taken. If the water be pure, free from organic matter, and taken in sufficient quantity, the results will be substantially the same, regardless of the "traces" of lithia and small quantities of sodium chloride and other salts. You can perform these cures at home with ordinary drinking water, if of good quality, if you will require the patient to take it in the same quantity as at the springs. It is very easy to add lithia if desired; but you must not lose sight of the fact that the quantity of water not lithia taken is the important thing. It acts by flooding the kidneys; by washing out the bladder with a copious, bland and dilute urine; by unclogging the liver and clearing the brain. The patient feels better from day to day; he is better irritable bladder is relieved, the kidneys act freely and normally, for there is an intimate relation between the liver and kidneys—Med. World.

when the Creator said to woman, "In sorrow shalt thou bring forth children," that a curse was pronounced against the human race, but the joy felt by every Mother when she first presses to her heart her babe, proves the contrary.
