sidered incurable. Now it is known that Dr. Pierce's Golden Medical Discovery will cure 68 per cent. of all cases if taken in time. That is its record during a period of thirty years. Many of the thankful patients have permitted their names, experiences and photographs to be reproduced in Dr. Pierce's Common Sense Medical Adviser. Any sufferer who wishes to investigate these cases may secure a copy of this book *free*, by sending only, to the World's Dispensary Medical Association, Buffalo, N. Y., and then write to the patients them-selves. In consulting Dr. R. V. Pierce by letter, the sufferer consults as skillful spe-cialist who for thirty years has been chief consulting physician to the great Invalids' Hotel and Surgical Institute, at Buffalo, N. Y. With the assistance of a staff of able physicians, he has successfully treated tens of thousands of cases of bronchial, throat and lung affections. He will cheerfully answer letters from all sufferers, without charge. Address the Doctor as above. heartease preaches content, and there wood and tangled vines (labrusca) and old word teasen meant to card wool, "I had bronchitis of the Dottor as above. "I had bronchitis for eighteen years and I was treated by three physicians, but all failed," writes David Wartzenluft, Esq., of Shoemakers-ville, Berks Co., Pa. "They told me there was no cure for me. I then used Dr. Pierce's Golden Medical Discovery, and was entirely cured. My weight is now 172 pounds." and hence we get both "tease," which is a rubbing up the fur in a wrong di-

**HUMPHREYS'** Large Freight Cars. The introduction of freight cars of \$0,000 pounds to 110,000 pounds car-rying capacity renewed the "large car" question, which is always a fruit-WITCH HAZEL OIL ful subject for discussion among rail-C Piles or Hemorrhoids way officials of the operating and car departments. The 60,000-pound car which has been practically the stand-Fissures & Fistulas. ard, dates back only to 1885. IO CENT TRIAL SIZE. Ely's Cream Balm range of about 850 yards. This tor-pedo is built of steel and is propelled COLD IN HEAD axis, to neutralize the rolling tenden-cy of the torpedo. The screws are operated by a three-cylinder engine driven by air compressed to 1,350 pounds per square inch; and an intricate apparatus, called the Obry gear, is used to automatically keep the torpedo pointed straight during the run.

This Obry gear is essentially a gyroscope controlling the valves of the steering engine, which operates two rigidly connected vertical rudders. re "Life Savers

scriptive of the queer, impish little and 1896. His grandfather was the Nasturtium, which means first Hamilton Fish, who was speaker Young Fish was about 26 years old.

Like most members of the family he was very tall, standing 6 feet, 3 inches in his stocking feet. He was of powerful build, though stoop-shoul For two or three years he was a student at Columbia University, of which rero pinken, to pick out with a sharp years. He gave little attention to his instrument, as a border is pinked in studies, but devoted a good deal to notched scallops for decoration. Athletics, particularly to rowing. He "sundew," with its sparkling leaves. notched scallops for decoration. Charming pictures are given by the "sun-dew," with its sparkling leaves; "the Daisie, or else the eye of the day," as Chaucer calls it, from its habit of opening at dawn, and the asters are the "stars" of the field. vania at Poughkeepsie. this Fish left college and Soon after this Fish left college and went out to The exquisite blue speedwell and the beckoning sprays of traveler's joy seem to fling us greetings from mead-man, at the end of which tim several months he worked as a brake man, at the end of which time he ow and hedge-row. The bright little jammed his index finger in coupling cars. He came back to New York in is a sort of moral in the rough brush- 1896 to have the finger amputated, and remained here most of the time until the kindred adjective brusque. The six or eight months ago. Fish was always of a roving and ad-

venturous disposition, and it was merely a verification of his friends' teasel, a prickly, thistle-like plant West that "Ham" Fish had joined teasel, a prickly, thistle-like plant whose flower-heads, when dry, are whose flower-heads, when dry, are Roosevelt's rough riders. While the sometimes used for raising the nap on regiment was in process of organizaon at San Antonia, Tex., Fish receiv ed a Sergeant's commis-

company. Fish's prowess was displayed on several occasions while he was in this city in fist fights which he had, in most of which he was victorious. In spite of these exploits, Fish was ordinarily the best natured of men, and had hosts of friends who swore by him, many of them Columbia students and members of prominent New York families.

Fish was a member of the Union League Club and the St. Nicholas so-He belonged to the Delta Psi ciety. college fraternity. Capt. Allyn Capron was born in

Florida, and entered the Military Academy in 1863. He was graduated in 1867, and received an appointment as Second Lieutenant of Artillery. In Few cars of less than 60,000 pounds 1871 he became First Lieutenant, and capacity are now built for ordinary Captain in 1888. He was graduated from the Artillery School with honor in 1873. Capt. Capron was in command of Company E of the First Artil-lery, and was twenty-fifth on the list for promotion.

cars of 100,000 pounds, and even 110,-Among the wounded was Major Bell, 000 pounds capacity, are in service. a Pennsylvanian. He served during the civil war in the Eighty-sixth Ohio, and when honorably mustered out he The Whitehead torpedo, of which so much is heard, is 16 feet 5 inches long, became Captain of an independent company of cavalry which he raised in 17.7 inches greatest diameter, and weighs ready for service, 1,160 his native state. Afterward he served as a Captain in the Thirteenth Penn-sylvania Cavalry until in 1865 he was pounds. It carries 220 pounds of wet guncotton at a speed of about 28 knots mustered out. The next year he was appointed Second Lieutenant in the per hour, and at that speed it has a Seventh regular cavalry. He became First Lieutenant in 1867, Captain in by two two-bladed screws, revolving opposite directions on the same 1876, and in 1896 he was promoted to Major of the First Cavalry. He was brevetted Lieutenant-Colonel in 1890 for gallant services.

Capt. Knox is in command of Company K of the First Cavalry. He is a Tennesseean and entered the Military Academy in 1866. He was appointed Second Lieutenant in 1870, First Lieuenant in 1877 and Captain in 1889. Capt. McCormick was born in Ohio and entered West Point in 1872. He

was graduated in 1876 and was appo ted Second Lieutenant in the Tenth Cavalry. He became First Lieutenant in 1878 and Captain in 1895. He is a graduate of the infantry and cavalry

Lieut. Byram was born in Mississippi and was graduated from West Point in 1885, receiving an appointment as Sec ond Lieutenant in the First

How England Took Gibraltar Gibralter was taken by the English in 1704, during the war of the Spanish ession, a war which was provoked by the aggressive policy of France in indeavoring to place a monarch of the French hrone, and thus consolidate the two kingdoms into one. The fortress was then captured, almost by surprise, though the Spaniards and French, appreciating the strategic value of the place, made desperate efforts to re-over it, but wele repulsed at every oint. Between the date of its capture d 1779 repeated efforts were made by Spain to recover the fortress, and in he latter year the greatest armament that was ever brought to bear upon a besieged place hay before Gibraltar. The siege lasted, off and on, for many

months. The investing force comprised 12,000 troops of France, over twice as many of the best infantry of Spain. and the fleet consisted of forty-seven ships, all three-deckers; ten great oating batteries, esteemed invin arrying 212 guns; innumerable frigates, bomb-ketches, cutters, gun and nortar boats. For weeks together over 6,000 shells a day were thrown into the town and repeated attempts were made to storm the works, but the little garrison of only 7.000 men repelled every assault and finally succeeded in beating off the allied fleet. The blockade began June 21, 1779, and lasted until February, 1783, when the garrison was finally relieved by the arrival of a British fleet and army. Since that time the fortifications of Gibraltar have been so improved and increased that it is regarded as the strongest fortress in the world. The British government maintains there a garrison of from 5,000 to 10,000 men, with provisions for six months and it is said the supply of military material is sufficient to enable the fortress to stand a siege of indefinite length.

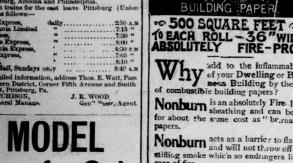

In the Mexican Household The arrangement of furniture is much more formal than in the United States. It is a very common sight to see a splendidly furnished parlor with of straight-backed chairs all alike with their backs against the wall and as close together as they can be placed clear around the room, Heavy single doors, such as are used in the United States, are practi-

cally unknown in Mexican houses either at entrances or between in terior rooms. All doors open in th middle and are fastened with bolts top and bottom. Exterior doors are always fitted with glass panels, for they also serve as windows. All such doors opening on the street or open court are fitted with solid shutters that are folded at the sides out of A good Mexican cook relieves th
